

metroSTOR **PSL** Mobility Scooter Storage & Charging Locker

metroSTOR Mobility Scooter Storage & Charging Products

metroSTOR PSL, PSM and PSH are modular product systems providing compliant, secure storage and charging solutions for mobility scooters. Our units are designed to look great, with a robust, easy-to-use functionality that makes them ideally suited for locations close to building entrances. From a single locker type unit to a communal hub building, metroSTOR products can be configured for the exact storage and charging fit. All metroSTOR products are engineered to prevent the spread of fire and are available with a range of fire cladding finishes to satisfy your specific risk assessment criteria.

metroSTOR PSL Mobility Scooter Storage & Charging Locker

metroSTOR PSL is an individual storage and charging locker for class 1 and 2 mobility scooters and electric wheelchairs. A low profile unit with superb aesthetics, metroSTOR PSL is ideally suited to locations in front of domestic properties, including under windows.

With class-leading good looks created by its curved aluminium framed roof section, matching powder coated panel trims and TGV timber plank infills, metroSTOR PSL is a storage and charging locker that doesn't have to be hidden from view!

With ease of use central to all of our products, metroSTOR PSL can be specified with our range of access control options from key operated deadlock to the keypad magnetic locks. The powered roof section is controlled from inside the unit once access door is opened preventing any unauthorised access.

Ease of specification is a further product quality and metroSTOR PSL units are supplied pre-wired with integrated charging points and interior lighting. The tough steel frame, internal floor, flexible threshold and base plate system adjustable for level internally, allows metroSTOR PSL to be easily relocated, ensuring an efficient long term solution for your scooter storage and charging requirements.

Ease of Use

metroSTOR PSL powered access cover is manufactured from high strength low weight aluminium with powered lift and lower.

Ease of Installation

Internally adjustable base plate fixing system enables swift installation to uniform line and level without costly groundworks.

Fast Set-Up

Prewired charging and internal lighting units is factory fitted for no-hassle site installation.

Durable Construction

Tough, fully welded steel frame, adjustable base with internal floor and flexible threshold enables unit relocation over time.

Access Control Options

metroSTOR PSL can be fitted with our modular locking systems or keypad operated magnetic lock as user management requires.

Relocatable Units

metroSTOR base plinth design enables swift and economical installation allowing for relocation of the units as site requirements change over time.

metroSTOR PSL Scooter Storage & Charging

Model:	PSL
Storage:	1no. Class Mobility -Wheeled Scooter/e. wheelchair
Depth:	1630mm
Width:	1455mm
Height:	1125mm

Can't see the size or layout you need here? Extensive custom build dimensions and configurations are available for all metroSTOR products. Please contact our sales team on 01227 200404 or email enquiries@streetspacegroup.co.uk for further information.
PLEASE NOTE: Product dimensions given are maximum external unit dimensions correct at time of publishing July 2019. All product dimensions are in millimetres and capacities in litres and do not form any part of the contract.

Fire Safety

metroSTOR products can be specified to meet relevant fire risk assessment criteria. Our fire retardant options for TGV and sheet type cladding have a Fire-board MgO internal liner with either treated SW timber, HDPE 100% recycled plastic or coated steel panel outer to provide Euro-class A1, UK class 0 reaction to fire. The panels are manufactured from materials of limited combustibility throughout to provide 30 minutes fire resistance to BS 476. Where fire retardant properties are required for an open-spaced cladding type, SE timber plank can be specified with an HR Prof treatment process providing a Euro-class B, UK class 0 Reaction to Fire classification.

metroSTOR is the leading outdoor storage system for today's built environment, delivering social, economic and environmental value. Combining superb aesthetics with durability for the toughest environments, metroSTOR offers a configurable, modular product system to comprehensively address the challenges of outdoor storage; from waste and recycling bins, mobility scooters and cycles to household items, site equipment and service plant enclosures.

Mobility Scooters

metroSTOR PSL, PSM and PSH provide space-efficient, mobility scooter storage with user-friendly integral battery charging, making for safer communal areas while helping users to maintain their independence.

Waste & Recycling

metroSTOR PBL, PBM, PBE, PBC and PBH products help control waste-streams with robust enclosures and stores for all standard bin sizes. Their smart appearance and unobtrusive physical profile enable recycling centres to be located in spaces that may not have previously been considered.

Household Items & Site Storage

metroSTOR PTL, PTM and PTH are tough, versatile products providing attractive, secure storage for equipment and bulky items in an unobtrusive design. Highly configurable for capacity, layout, access, security and finishes, the proven modular system makes for ease of specification.

Cycles & Motorcycles

metroSTOR PCL, PCM and PCH for custom cycle parking solutions with the efficiency of modular build from transit shelters to cycle hubs. Stands, racks and carousels can all be specified with a number of options available for roofing, enclosure and layout type, finishes and access control.

Service Plant & Industrial

metroSTOR Custom Build is driven by the inherent design flexibility of our products, working in partnership with client input informing the design process. This enables the development and delivery of effective solutions, achieving a consistent design aesthetic.
