

Engineering

- Aish has one of the most technologically advanced engineering design facilities.

The latest tools are:

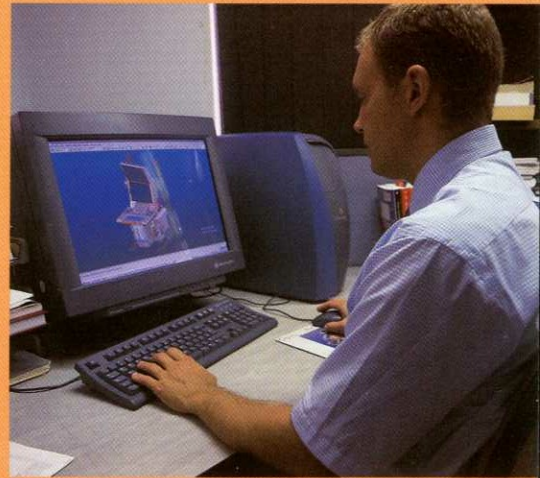

- Pro-Engineer 3D Design
- Pro-Mechanica Finite Element Analysis
- Medusa Design and Draughting
- Pro-Cabling - Cable Form Design
- Flotherm - Computational Fluid Dynamics (Thermal Analysis)
- Orcad - Electronic Circuit Design
- Artisan
- U.M.L. for Software Design and Development
- Tornado
- Borland Builder
- C++

Aish
Technologies

Innovation in Action

- We specialise in the design of ruggedised enclosures for military hardware and COTS equipment, having specialist knowledge in EMC, shock, vibration and environmental protection.
- Our designs can ensure that mission critical equipment remains fully functional under the most severe combat conditions, be it at sea, on land or in the air.
- Aish has become involved in a range of commercial designs where innovation, style and cost effective solutions are of paramount importance.
- Software and electronic design meeting the demands of exacting military requirements.
