

Don't be Caught in the Dark®

Because we care
about your Safety

Our Commitment towards Sustainable Development

Don't be Caught in the Dark®

**SAFETY
WARNING**

Cyalume Snaplight™

We care about your safety

Phthalates are dangerous chemicals used in everyday products and present in most chemical light formulations.

Of course yet:

The baby's bottle of your child is BPA free...

Your body lotion is Paraben free...

Your antiperspirant is Aluminium and Phthalate free...

What about your lightsticks?

- ✓ DBP was banned in the EU in 1999.
- ✓ We went further, for your safety!

Don't be Caught in the Dark®

Since 2008, REACH requires manufacturers and importers of chemicals to register their components.

It is the reseller's responsibility to ensure that suppliers comply with the REACH regulation.

Cyalume Snaplight™

We care about your safety

✓ Cyalume Snaplights use our patented phthalate free formulation

✓ 100% Disposable

✓ Cyalume adopted the EU's precautionary principle since 2003

✓ REACH registered

Don't be Caught in the Dark®

**Cyalume Technologies
informs you**

Currently offered on the European market:

Cheap products

- At the expense of quality and safety?
