LIGHTING

Landing Lights for Antarctica

Mission: To create a portable, flashing guidance light system for landing aircraft in Antarctica

Visible from 9 miles away in sunlight

- Battery powered
- Wireless controlled
- Portable & rechargeable
- Rugged & weatherproof
- 'Running rabbit' sequence

First system 5 units bought for smaller runway 2016

Second, 9-piece system bought 2017 for main runway after success of first system in 2016

- Improved battery & charger system
- Larger control boxes to withstand cross-winds
- Securing system to stabilise head in cross-winds
- Improved 'running rabbit' sequence
