

Storage Tanks (Polyethylene)

Carter Pumps have been installing water storage tanks of all types for many years. Whatever your application we are sure we can help.

Rainwater Harvesting Tanks 500 to 5,000 Litres

- UV stabilised polyethylene, tough and durable
- Ribbed design for added strength
- Range of filters, calmed inlets and pumps available

Vertical Tanks 500 to 25,000 Litres

- UV stabilised polyethylene, tough and durable
- Ribbed design for added strength
- Low profile version available
- Larger / additional outlets available
- WRAS approved version available with Byelaw 30 kit for potable water applications

Horizontal Tanks 200 to 5,000 Litres

- UV stabilised polyethylene, tough and durable
- Ribbed design for added strength

Cone Bottom Tanks 1250 to 21,000 Litres

- 30° or 60° cone with full drain fitting for total evacuation
- Banjo fittings
- 4 positive tie down points
- Heavy duty galvanised steel frame
- Suitable for liquids up to 1.7 specific gravity
- Translucent option to allow visibility of liquid level

Bunded Tanks 500 to 25,000 Litres

- Specifically designed with pollution control in mind
- Protection from tank leakage and overfilling incidents
- Contains a minimum 110% volume of the inner tank
- Helps compliance with current health and safety legislation.

Carter Pumps can also help with . . .

Civil works. Casting of concrete base.

Ground works. Undertaking all types of ground works including trenching of pipes and cables.

Electrical works. Installation of low level floats / alarms.

Cleaning out, refurbishment and sterilisation of old tanks. Carter Pumps engineers are confined space trained.
