

BUILT TO LAST IN A COLOURFUL WORLD

Precision dispensing
and mixing equipment

DIMENSIONS

Width = 64cm | Depth = 63cm | Height = 122cm
Standard unit load height 50cm

SPECIFICATION

- » Maximum product weight: 35kg
- » Maximum Can Height 46cm, Dia 33cm, Min Ht 6cm
- » Superior 25 litre shaker, efficient quiet and safe
- » Manual patented can clamping arrangement
- » 60 second / 2.5 minute and 4 minute shaking cycles (alternative times available)
- » Visual display of time selected and countdown in seconds
- » Operational instructions displayed
- » Electronic diagnostics of the electrical system
- » Safety features to prevent incorrect use
- » Door lock delay keeps door locked until all movement has stopped
- » Shaking cycle stops if can becomes loose
- » Machine will not run if no can is present or if can has not been properly clamped
- » Override facility for shaking difficult plastic containers
- » Enclosed cabinet
- » Precision engineered in heavy gauge steel, powder coated finish
- » Flameproof option available

OPERATION

Operation is simple, load the can onto the platform, release and lower the clamp plate onto the can.

Move the locking lever to the lock position and close the door. Press the required shaking time start button. The door will lock and the shaking will start, the LED display will show the selected time and the remaining shaking time.

At the end of the shaking period the machine will stop and after all movement has stopped the door will unlock.

Robust, solidly built reliable unit on market for over 10yrs.
