

THE NILFISK VL
WET & DRY SERIES

WET & DRY VACUUM CLEANERS FOR ALL APPLICATIONS

The new family of wet & dry vacuum cleaners contains variants from 20 to 75 liter containers so you can feel certain that we have something that fits your needs.

The VL series offers you a wide portfolio of thoroughly tested machines with a number of new innovations to help you do a good cleaning job with maximum help from the machine.

Whether you need to clean huge areas or small spots, wet, dry or a combination - we have the machine for you.

The VL wet & dry series from Nilfisk is designed and developed to the highest standards: Yours!

By partnering with our customers and users we have achieved a wet & dry vacuum cleaner that meets the requirements of the most demanding end users.

Combined with Nilfisk service and support, our wet & dry portfolio provides you with a reliable, high performance cleaning solution that is easy to operate with an attractive cost of ownership.

VL200 and VL500 are ideally suited for hotels, contract cleaners, education, exhibition and conference centers as well as public buildings, manufacturing and industrial applications.

VL200: This handy machine is available with an Inox container for the extra tough environments.

VL200: Compact and ergonomic design for easy transportation

WE ASKED YOU, AND THIS IS YOUR ANSWER

VL200 is the compact and transportable solution

For small wet and dry cleaning applications our VL200 machine is the perfect choice. You can choose between a 20 or 30 liter machine with nice and handy features. Both variants have the built in semi-automatic filter cleaning system

Push & Clean for quick and handy cleaning of the filter helping you maintaining the high suction power on the machine. The handy machine is available with an INOX container for the extra tough environments.

VL500 makes daily operation easy, fast and safe

- By transferring the weight as you lift the container, the Nilfisk Ergo Tipping system enables you to empty a completely filled container of fluid without excessive effort.
- Emptying the container without having to remove the motor head makes operation fast and easy, without risk of damage to critical components.
- With the dual filtration system, the VL500 can be used in both wet and dry environments without the need to change filters for different applications.
- The unique design of the VL500 with single latch locking is not only signaling quality and innovation but also high performance and reliability.

Easy and fast emptying of the VL500 container thanks to the unique Ergo Tipping system. Emptying the machine without having to remove the motor head makes daily cleaning easier and safer.

VL500 35 liter version

Big areas to clean? Try the squeegee accessory for the VL500.

Dual filtration enables you to clean both wet and dry without changing filters

A flood pump is available as an accessory, and is the ideal solution for moving large volumes of liquid

VL200 MODEL OVERVIEW

Available with stainless steel container in 30 litre version →

Push&Clean semi-automatic filter cleaning system →

Washable PET filter →

Robust design →

← Built in flexible storage of hose and accessories

← Exhaust air blow function

← Compact and ergonomic design for easy transportation

← Lightweight container with handle for easy emptying

VL500 MODEL OVERVIEW

→ The motor head remains closed and in place during container emptying

→ Wet sack filter protects motor from foam ingress

→ Stainless steel tubes prevent corrosion and wear

→ Choose from 35, 55 and 75 litre versions

← Dual or single motor

← Dual filtration for both wet and dry cleaning

← Fail safe filter design makes operation easier

← Ergo tip makes emptying the container easy and effortless

← Features like the motor head, push handle and container locking mechanisms are designed for single handed use
