

Packaged Pumping Stations

Packaged Pumping Stations are ideal for situations where civil work and installation time must be kept to a minimum. The Stations are available in various sizes with submersible sewage or waste water pumps, guide-rail pump mounting system, internal pipe work, valves, float switches, lifting chains, control panel and access cover all pre-fabricated, assembled and tested before delivery to site.

Applications include domestic effluent for a single household right through to large housing developments, industrial units and commercial premises. In fact any situation where sewage or surface water has to be pumped to a mains connection.

Benefits

- Ease and speed of installation
- Models available for above or below ground installation
- A choice of specification
- Simple inspection and service
- Easily transportable
- Main components assembled and tested under factory conditions
- Simple pipe connections on site

Carter Pumps can sell packaged pumping stations on a supply only basis or we can install and commission.

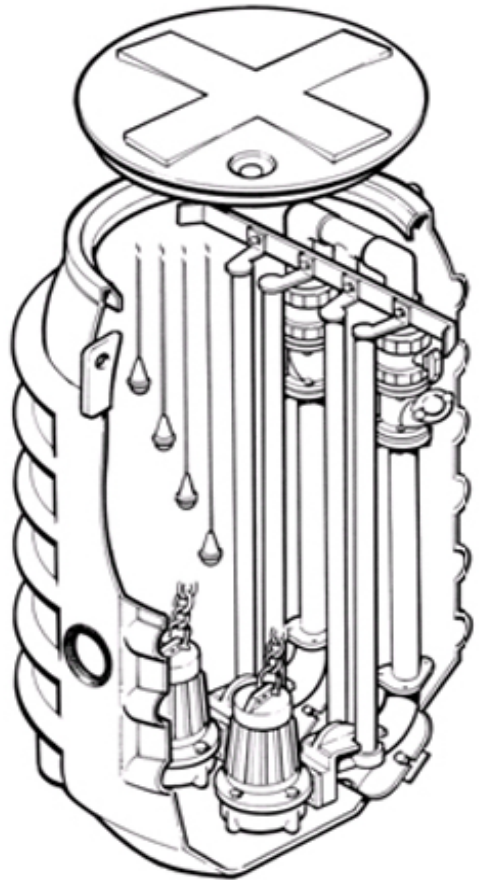

Available in vertical or horizontal configuration to suit site conditions. Manufactured from polypropylene or GRP.

Rest Assured!

All Carter Pumps service engineers are confined spaces trained so should entry into the sewage pumping station be required we can do so in a safe manner.

We are also an NICEIC Approved Contractor so any electrical works carried out will meet current regulations.

Carter Pumps can also help with . . .

Installation and commissioning

Replacement pumps

On site repairs

Tankering and jetting

Ground works. Undertaking all types of ground works including trenching of pipes and cables.

Electrical works. We are an NICEIC approved electrical contractor.

Contract maintenance

Floats, guiderails, lifting chains, control panels, relays, overloads, non return valves, isolating valves, MDPE rising main
