Our service is designed to ensure complete customer satisfaction, everything comes together perfectly.

We pride ourselves on providing a truly individual service for all customers, complementing an extensive choice and good stock levels with a comprehensive design service. Customers can choose from a range of hand-made mosaic designs or commission one to their own specifications.

Working from detailed drawings or just a sketch or picture, our skilled, experienced creative team will develop bespoke mosaics. The result can truly be called a work of art, inspired by the customer's own imagination.

We can use any of the true, cut or full tile methods of mosaic depending on which is suited for your specified environments.

Digital Print

This method uses state of the art inkjet technology to print a digital image onto the surface of the mosaic.

Full Tile

The full tile method of mosaic is created using the full uncut mosaics placed in set trays to your chosen designs. Full tile is the most economical method of production and design.

Tile Bands & Fades

Tile bands and fades are usually produced using the full tile method primarily for the decoration of pool walls.

True Mosaic

The true method of mosaic is created using tiny colourful pieces of broken mosaic that when put together form a beautiful work of art.

Cut Tile

The cut tile method consists of tiles that are precision cut and positioned into the mosaic grid to form the exact shape of the chosen design.

1 Choose image

2 Send image

3 Printed mosaic

Digital Print

One of our most contemporary methods of mosaic design production, Digital Print literally replicates any image to any scale. Picking up the minutest of details, it is ideal for intricate designs in a small area or where photographic reproduction quality is required.

Our design team can use any high definition image you desire, be it a family member, favourite landscape or iconic image and reproduce it onto vitreous glass mosaic suitable for use in the pool or any internal or external wall application.

Full Tile

A cost-effective way to personalise any pool is to create a simple but stunning motif using the “full tile” mosaic method. Simply supply a picture of your required design and it can be reproduced using mosaic in various colours.

Motifs can be produced using most of our popular mosaic ranges, the smaller the mosaic the more detail can be achieved within the available area, eg. the image above was created using 12x12mm glass mosaic whilst the image below was made using 25x25mm Harmonie mosaic.

Examples of full tile designs are available upon request

- Dolphins
- Mermaids
- Compass
- Anchors
- Birds
- Crests
- Company logos

Tile Bands & Fades

WX-4 Squares

WX-1 Kos

WX-3 Chain

WX-2 Ibiza

WX-12 Bali

WX-8 Wave

Feature bands and graduating fades can be produced in any size and any colour combination using most of our popular ranges of mosaic.

An extensive archive of patterns is available to choose from or alternatively we can re-create any pattern of your choice.

The example shown are some standard designs reproduced using colours from the Harmonie collection

DF-614 Azure Fade

DF-607 Royal Fade

True Mosaic

The origins of a true mosaic are derived from Greek and Roman artisans who created painstakingly detailed designs of significant scenes, by using broken pieces of glass, ceramics and stone. Their longevity is confirmed through the many mosaics still standing after thousands of years of wear.

Our True Mosaic method borrows techniques from this original formula, by using tiny colourful pieces of ceramic and porcelain tile to form a spectacular art piece. Our design service meticulously places each tile to suit the form of your image, creating a beautiful and original piece of art.

Cut Tile

The cut tile method is one of skill and intricacy ideal for creating highly detailed motifs with smooth flowing lines. Motifs are made by hand painstakingly cutting and shaping each individual mosaic to replicate even the smallest detail.

General Information

Floor Wear Rating Guide

	Guidance for use as below
①	Floors with very little traffic. No abrasion. (eg Bathrooms)
②	Floors with light traffic. Light abrasion. (eg All rooms in the house except Kitchens and rooms leading directly to the outside)
③	Floors with moderate traffic. Medium abrasion. (eg All rooms in the house, entrance ways must be protected with mats)
④	Floors with heavy traffic. High abrasion. (eg All rooms in the house, restaurants and light commercial)
⑤	Floors with very heavy traffic. High abrasion. (eg Commercial areas, Shopping Malls)
⑥	Unglazed tiles. Suitable for all very heavy traffic areas.

Anti-Slip Rating Guide

Ramp Testing

DIN51130 - Shod traffic

Classification	Angle
R9	6° < 8°
R10	10° < 19°
R11	19° < 27°
R12	27° < 35°
R13	> 35°

DIN51097 - Barefoot

Classification	Angle
A	12° < 17°
B	18° < 23°
C	> 24°

Pendulum Testing

SRV = Slip Resistance Value

SRV Pendulum Test Result	Slip Potential	Rating
0 - 24	Dangerous or high potential for slipping	Dangerous
25 - 35	Marginal or moderate potential for slipping	Moderate
36 - 65	Safe or low potential for slipping	Safe
66 +	Very safe or extremely low potential for slipping	Very Safe
