

SEPSIS

TAKES THE LIVES OF OVER
18 CHILDREN EACH DAY

MORE THAN CHILDHOOD CANCERS

SEPSIS IS A COMMON AND SERIOUS COMPLICATION OF AN INFECTION

If your child has any of these symptoms you should take immediate action:

- Skin abnormally cold to touch
- Bluish or very pale skin
- Rash that does not fade when pressed on
- Very fast or rapid breathing
- Seizures
- Lethargy or difficulty waking up

Acting quickly could save your child's life.

If your child has any of these symptoms* don't be afraid to go to the hospital or call 911 and say "I AM CONCERNED ABOUT SEPSIS."

*Particularly if they recently had an open wound (cut, scrape, bug bite, etc.), surgery, some type of invasive procedure, or infection.
