20 YEARS OF  
**BRITISH**  
INNOVATION

**It's a fact that hand knives can be dangerous.** This includes their use at work. Warehouses, Retail, or any location where the removal of packaging is involved, are high risk areas for hand cuts. Most of these injuries, ranging from minor cuts to serious lacerations, are due to the knife slipping during cutting. And, to think a simple safety knife could prevent this.

**Moving Edge**, a brand of COBA Europe, is a leading name in the safety knife industry with a reputation for innovative, high-performance product design. We have developed a **user-friendly** range that includes both 'enclosed' and 'retractable blade' safety knives, as well as many handy accessories.

We bring our customers choice and product support, and are continually introducing new lines. Our new metal version of the AutoSafe, the **AutoSafe Pro** is one example, and is ideal for demanding conditions. Fewer blade changes mean reduced risk of injury. That is exactly what is achieved with our new **Ceramic Blades** that last up to 10 times longer than standard stainless steel.

Cut safely, choose wisely - use Moving Edge.
