

Gas & Electric STOVES

A warm welcome

Nothing creates an inviting atmosphere quite like a Gazco stove.

The centrepiece of any home, a Gazco stove adds warmth and character to a room or living space – even if you don't have a chimney!

Whether you want to achieve a minimalist, contemporary look, or have your heart set on a more traditional stove, this brochure will help you make the perfect choice, whatever your style or budget. From the highly efficient contemporary Gas Riva Vision range with all its style and elegance, to the stunning cast iron detail on a more traditional Huntingdon stove, these innovative designs will provide warmth and character to any modern or traditional home.

There is also a range of highly realistic, electric log-effect stoves featuring Gazco's VeriFlame™ technology. These electric stoves open up new possibilities such as conservatories, kitchens, dining rooms and bedrooms for you to have the warmth and character of a Gazco stove in your home.

Relax – it's a Gazco stove

When you choose Gazco, quality and innovative technology are assured. From traditional models to contemporary designs, Gazco is committed to creating the ultimate flame-effect gas and electric stoves.

Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances.

Gazco is an ISO9001 accredited company. Our rigorous quality control system ensures that all our appliances comply with British safety standards as well as stringent European regulations. All fires in this brochure are CE marked. This means they have been independently tested to exacting European standards for safety as well as both heating efficiency and emissions.

Warranty

Your Gazco Expert Retailer will provide you with a Five Year Extended Warranty for your new gas stove and Two Year Extended Warranty for your new electric stove provided it is registered with Gazco. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year Warranty. Full warranty terms & conditions are available to view at www.gazco.com

Selecting Your Stove

Before you choose your new stove you will need to know what type of chimney (if you have one) or flue you have. Please turn to pages 6 - 7 to identify your chimney or flue type.

Expert Retailer Network

We take great care to ensure that our stoves are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will enable you to see a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home. These retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Gazco fires and stoves purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at www.gazco.com

What's your type?

Before you select your stove, your local Gazco retailer will need to make sure it's suitable for your home. Firstly, you need to know what fuel you will be running. Secondly, you will need to be aware of what type of chimney or flue you have. If you do not have a chimney then don't worry, Gazco have models developed to suit your home too! To assist you in selecting the right stove for your home, a general guide to which models can be installed with the various flue types is given on each page.

Fuel - Gas or Electric?

The majority of our stoves are available in either gas or electric versions. All the electric models run on a standard 13amp plug and have no need for a chimney.

Which Gas type...

All Gazco gas stoves in this brochure can be specified for use with either Natural Gas or LPG. Natural Gas is provided through mains pipelines, whilst LPG is usually supplied to homes in rural areas from a tank in the garden or gas bottles.

Your Home...

The type of chimney or flue you have usually dictates your choice of stove. To help you understand which stoves are suitable for your home, please use the information and pictures shown opposite to identify your chimney. Don't worry, if you don't have a chimney though, you can still find the perfect stove for your home. Once you have identified your chimney(or confirmed you do not have one), take note of the symbol that represents this, as this has been used throughout the brochure to represent the stoves that are suitable for installation in your home.

Conventional Flue

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney, pre-fabricated or pre-cast chimney system. Should your home have none of these at present, it is usually possible to have a pre-fabricated system installed in your home if required.

Brick or Stone Chimney
(Class 1) **1**

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-Fabricated Flues
(Class 1 & 2) **2**

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Pre-Cast flues
(Class 2) **3**

Many modern homes have been built with such flues. You can readily identify them by either a metal flue cowl or a raised ridge terminal on your roof. Again, the natural circulation of heated air expels the products of combustion. This option is only available on the small stoves.

Balanced Flue

Balanced flues work in conjunction with Gazco's Glass Fronted gas stoves. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

Balanced Flue
(No chimney required) **BF**

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the stove selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components. Please refer to our dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at www.gazco.com.

Powered Flue
(No chimney required) **PF**

A powered flue uses an extractor unit mounted to vent the combustion gases directly outside. This means that your stove does not have to be installed against an external wall, so it can be located in more rooms around your home. A mains electricity supply is needed to operate this system.

Electric Stoves
(No chimney required) **⚡**

Gazco produce an excellent selection of electric Marlborough, Stockton, Huntingdon 30, Clarendon, Ashdon, Steel Manhattan and Riva Vision stoves which do not, of course, require a chimney or flue of any kind.

No Air Vent required (UK)

All stoves shown with this symbol, boast the advantage of not normally requiring an air vent* where the air permeability is greater than 5.0m³/hr/m². Please discuss this in full with your local Gazco retailer.

*Requirements in the Republic Of Ireland are different.

Gas Marlborough

Small Gas Marlborough balanced flue with log-effect fire

Large Gas Marlborough conventional flue with coal-effect fire

Country or city, traditional or contemporary, the innovative Gas Marlborough has the flexibility to suit your lifestyle and your décor. It is available in three sizes and each has an extensive window area to allow you to enjoy the dancing flames and warm ambience of the coal or log-effect fires to the full.

Operation is simplicity itself too. There's Piezo ignition and a manual control to adjust the flame height and heat output. Choose Gazco's Command upgradeable remote control and you can adjust the flames and heat from your armchair. Alternatively, opt for the deluxe Programmable upgradeable remote control to set the stove to switch itself on and off and heat the room to the temperature you select.

Electric Marlborough

Featuring the same distinctive styling as the Gas Marlborough, the two electric versions offer you an amazingly realistic log-effect fire at the touch of a button. At its heart is Gazco's unique VeriFlame™ technology which allows you to choose from two heat settings that can both be thermostatically controlled; three flame brightness levels, plus the additional option for a blue flame effect on the high setting so you can match your mood exactly. Furthermore, you can select fire effect only; fire effect + 1kw heat; and fire effect + 2kw heat according to your heating needs with full control* from the remote for complete convenience.

The Electric Marlborough simply plugs into a 13amp socket, so is particularly suited for conservatories, bedrooms or home study in fact any room without a chimney.

* The thermostat is controlled manually from the stove.

Electric Stockton

Using the same cast iron door and heavy gauge steel body as the Gas Stocktons, the electric version combines the classic looks of a woodburning stove with the ease of Gazco's unique VeriFlame™ technology. This means you can enjoy two heat settings that can both be thermostatically controlled; three flame intensity levels, plus the additional option for a blue flame effect on the high setting to create a remarkably authentic log-effect fire - a superb focal point for any room. The fan heater is discreetly hidden beneath the stove with full control* of both heat output and flame effect by remote control.

Choose from the Stockton Small, Stockton 5 or the Stockton Medium.

* The thermostat is controlled manually from the stove.

Gas Huntingdon 30

Gas Huntingdon 30 conventional flue with coal-effect in Matt Black

Gas Huntingdon 30 with log-effect in Ivory enamel

A popular model in the Gazco range, the Gas Huntingdon 30 successfully combines refined styling with efficient heating technology. The Gas Huntingdon 30 is available in a choice of three high quality enamel colours as well as Matt Black and Matt Ivory. This authentic stove also features beautiful tracery windows, that frame the flame picture perfectly, giving great warmth and style to any interior.

Choose from either realistic coal or log fuel effects, the latter sporting a new glowing ember bed feature for the ultimate real fire ambiance. Both fuel effects are available in conventional flue versions, whilst the log effect is also available in a balanced flue model.

The Gas Huntingdon comes with manual control or, for total ease and convenience, upgrade to one of Gazco's command remote controls.

Electric Huntingdon 30

Electric Huntingdon 30 in Laurel Green enamel

Electric Huntingdon 30 in Matt Ivory

The electric version of the ever popular Huntingdon 30. The fine castings and beautiful tracery door of the stove are brought alive with Gazco's VeriFlame™ technology which provides you with two heat settings that can both be thermostatically controlled; three flame brightness levels, plus the additional option for a blue flame effect on the high setting. Your choice of fire is then set against the highly realistic fuel bed and individually hand painted 'logs', perfectly mirroring the look and atmosphere of a real woodburning stove.

Operation is simple too as the remote control* not only allows selection of the flame and glow but also fire/heat combinations. These can be fire effect only; fire effect + 1kw heat; and fire effect + 2kw heat according to the amount of warmth required.

* The thermostat is controlled manually from the stove.

Gas Clarendon

Superb heating efficiency, finely detailed castings, a real fire effect and choice of three sizes make the Gas Clarendon perfect for a wide variety of homes. Further, whilst the tracery of the standard window provides minimal obscuring of the flames, there are also 'clear glass' versions to attain the fullest possible view of the fire. The small clear glass models are also available in two enamelled colours; Laurel Green and Midnight Blue and a Matt Ivory paint finish.

According to size of model, the fires may be coal or log-effect. All feature a fully adjustable flame and heat setting whether you opt for manual controls, the Standard remote control or the Programmable remote control. Select the Programmable remote control and you can even set the stove to switch itself on and off twice a day and thermostatically maintain the temperature in your room.

Medium Gas Clarendon in Matt Black with tracery door and log-effect fire. Also shown: Victorian Corbel Mantel in Antique White Marble from Gazco.

Electric Clarendon

Authentic styling and elegant castings give the small and medium Clarendon all the character of a real stove but with the convenience of electricity. Simply plug in and switch on for Gazco's highly realistic log-effect fire, complete with your choice of three different brightness levels, including the additional option for a blue flame effect on the high setting, and two heat settings that can both be thermostatically controlled. Soothing comfort and instant controllable warmth.

The heater is discreetly located under the stove but, as heat outputs and VeriFlame™ effects can be controlled from the remote control*, unnecessary crouching or stooping is avoided. Simply sit back and relax in your favourite chair!

* The thermostat is controlled manually from the stove.

Gas Riva Vision

Sporting an eye-catching glass-fronted door and integral glass plinth, and boasting four sizes, Small, Midi, Medium and Large which is shown overleaf, the high quality Gas Riva Vision is a sparkling new addition to the Gazco stoves range. The Small, Midi and Medium models feature our latest highly-realistic log effect fire and a Thermostatic remote control which allows complete operation from ignition to extinguish, all from the comfort of your sofa.

The flames on the Riva Vision Medium are enhanced further by the stainless steel lining panels, creating extra illumination in the stove with a mirror-like finish that echoes the Vision's reflective exterior!

To further increase your interior design possibilities, why not also opt for a contemporary stove bench (see page 57) or black gloss flue pipe* - the perfect complement to these stylish contemporary stoves.

Gas Riva Vision Large

The Gas Riva Vision large offers a greater heat output than its Small and Midi equivalents, providing a comforting warmth for larger rooms. There is a choice of either a realistic log or contemporary white stone fuel effect, with the option to customise your white stone fire with a choice of three glass bead sets. The log-effect models can be styled even further with a choice of either the timeless black reeded or the lighter vermiculite linings. Whichever you choose, these high-efficiency, stunning flame effects are displayed to their full potential in this wide screen format, complemented by the sleek glass styling and ease of use from the Programmable Thermostatic remote control.

For conventional flue versions you can also opt for gloss black flue pipe to continue its reflective qualities and really create that designer look. Consider including a stove bench to further accentuate the contemporary styling (see page 57 for more details).

Electric Riva Vision

Electric Riva Vision Small

Electric Riva Vision Medium

The Riva Vision is a contemporary, electric stove that comes in three sizes: Small, Midi & Medium; each sporting a highly reflective black glass door, integral glass plinth, black glass top plate and stainless steel detailing for a clean stylish look.

Incorporating an eye-catching flame effect created using Gazco's unique VeriFlame™ technology, the Riva Vision's alluring visuals glow over a realistic hand painted log-effect fuel bed to give all the ambiance and depth of a real log fire.

The three brightness levels can be easily altered with just the touch of a button on the remote control* to create a look to suit your mood. Furthermore, each level is available with or without the 1-2kW of heat output, so you can enjoy the atmosphere created by your electric stove whatever the season!

To increase your interior design possibilities, you can enhance your Riva Vision by choosing from one of ten stylish Riva Stove Benches as shown on page 57.

*The thermostat is controlled manually from the stove.

Gas F67 Riva

Gas F67 Riva on 120 high Riva bench

Gas F67 Riva

If you need a high level of heating performance and efficiency but are seeking a look that is, perhaps, a little closer to a contemporary fire than a stove, then the F67 Riva offers an exceptionally stylish solution.

This highly efficient gas log fire not only provides a 'real fire' atmosphere, complete with comforting glow and flickering flames, but also up to 4.9kW of effective heating at the turn of a switch. Alternatively, opt for one of our Command remote controls and operation is easier still!

As an alternative interior design option, the F67 Riva can also be mounted on a bench or pedestal.

The specially designed stove benches and pedestals provide extra height, so you can make the most of the view of the fire through the generously wide window, whilst the additional width creates a more striking focal point in your home. The pedestal version even has a tapered design to the rear allowing you to install it into the corner of a room.

Additional Information

Impressive features

All Gazco gas stoves have an outstanding list of standard features:

- **Ceramic fibre coals, logs or driftwood** - skilfully sculpted for maximum 'real fire' effect and atmosphere
- **Multi-purpose control knobs**- for simple, fingertip control of ignition, pilot light and gas supply
- **Piezo ignition** - automatic sparking without batteries or electricity
- **Adjustable flame setting** - infinitely adjustable between high and low
- **Convection system** - for improved heating efficiency and safety
- **Flame failure device** - automatically shuts off the gas supply if the pilot light goes out
- **Flue Sure System[®]** - Gazco's special safety system shuts off the gas supply in the case of accidental flue blockage (conventional flue models only)
- **Choice of flue exit** - top or rear exit options for greater flexibility of installation (except small balanced flue models which are rear exit only)

Command remote controls

Gas Stoves

Gazco was the first UK company to introduce remote controls for gas fires. Today, our Command remote control systems allow most stoves to be upgraded, either at the time of purchase or at a later date, with either:

a) Standard upgradeable remote control

Once the pilot light has been ignited manually you can vary the flame height and heat output from the comfort of your armchair.

b) Programmable Thermostatic upgradeable remote control

This deluxe version has two additional features. The first allows you to thermostatically control the room temperature whilst the second allows you to programme your stove to switch itself on and off twice a day. Use both and you can even come home to a glowing fire that has heated the room to the temperature you select.

c) Programmable Thermostatic remote control for Gas Riva Vision Large

This deluxe remote is loaded with exciting features that make it possible to programme your stove to perfectly complement your lifestyle. Not only can you ignite, extinguish and thermostatically control your stove, this remote control system benefits from advanced technology that gives you the option to create an automatic, intelligent heating program that means your home is comfortable and cosy at any time of the day or night.

Electric Stoves

Our range of Electric Stoves are as easy to install as plugging in and switching on! They are available in a range of designs from traditional to modern, ensuring that there is an electric stove available to suit all pockets and locations. The heater and VeriFlame™ controls for each fire are discreetly located under the stove and can be operated using the supplied remote*.

The VeriFlame™ technology consists of two heat settings that can both be thermostatically controlled, three flame intensities, plus the additional option of a blue flame effect on the high setting - so you can mix and match to create the perfect ambience. Select from fire effect only, fire effect + 1kW heat and fire effect + 2 kW heat. Every VeriFlame™ setting beautifully highlights the highly realistic hand painted log-effect glass fibre fuel bed.

*The thermostat is controlled manually from the stove.

The Gazco VeriFlame™ Difference

Unique on the market, Gazco's VeriFlame™ technology produces the ultimate in realistic fire effects. The complementary remote control allows you to independently adjust the brightness and colour of the flames and fuel bed so you can produce the exact ambience you require. Complete flexibility at the touch of a button. There are also discreetly concealed manual controls should the batteries in the remote control run out of power.

Technical Specifications

All specifications given in the main part of this brochure are approximate. Actual specifications for each individual product will vary according to the exact model and are given on pages 46-55. Your Gazco retailer will be pleased to help explain specific model specifications and provide any further information you may require, or you can view/download specification sheets from www.gazco.com.

Installation and Safety

Gazco gas stoves must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or Bord Gais registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by downloading them from www.gazco.com.

Please note that all parts of these stoves become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

Colours

Owing to variations in studio lighting and printing inks, the colours of stoves illustrated in this brochure may differ slightly from actual models.

Product improvement

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

All fire and flame photography has been taken from genuine products; however, the exact appearance of the flame picture for any appliance will vary depending on the nature of the flue type, installation surroundings, local geographical features and the way in which the appliance is operated.

Please note: The operation and appearance of gas appliances depends on variable factors such as the gas pressure supplied.

Warranty information

Your Gazco Expert Retailer will provide you with a Five Year Extended Warranty for your new gas stove and Two Year Extended Warranty for your new electric stove provided it is registered with Gazco. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year Warranty. Full warranty terms & conditions are available to view at www.gazco.com.

GAS STOVES - dimensions and options

Model	Overall dimensions (mm)			Approx weight (kg)	Conventional or Pre-fabricated flue
	Width	Height	Depth		
Gas Marlborough - Matt Black only

GAS FLUE SYSTEMS

1. Closure Plate and Spigot Extension^Δ

This is a flue system suitable for homes with existing conventional chimneys in which an airtight, steel closure plate is fitted over a fireplace opening or Class 2 pre-cast starter block and a short piece of flue extends from the back of the stove, through the plate, into the chimney. The products of combustion are carried up the chimney by natural convection.

Models which can be fitted with a closure plate and spigot extension are:

Small Gas Marlborough, Small Gas Stockton, Small Gas Clarendon, Medium Gas Marlborough and Medium Gas Stockton.

Models which can be fitted to a pre-cast chimney with a closure plate are:

Small Gas Marlborough, Small Gas Stockton and Small Gas Clarendon.

2. Rigid or Flexible Metal Flue^Δ

With this flue system rigid metal tubes, or a combination of rigid and flexible metal tubes, extend vertically directly from the stove to the outside of the property. This may be either straight through the ceiling or roof with the flue pipe exposed, or by using the channel of a chimney or a studwork enclosure. The products of combustion are carried up the flue by natural convection.

Models which can use this system are:

Small, Medium and Large Gas Marlborough, Small and Medium Gas Stockton, Gas Stockton 5, Huntingdon 30, Small, Medium and Large Gas Clarendon and clear glass, Gas Ashdon and clear glass, Small and Medium Steel Manhattan, Gas F67 Riva, Gas F67 Riva Bench, Gas F67 Riva Pedestal and Gas Riva Vision Small, Midi, Medium & Large[†]. ([†] Top outlet only)

3. Balanced Flue

Where a room has no chimney, then a Balanced Flue version of a Gazco stove is a practical option. The flue consists of one tube inside another. The outer tube brings air into the stove for combustion whilst the inner one emits the products of combustion.

Options: A - Rear outlet (max 600mm wall thickness).

B - Top outlet/up and out (min rise 500mm, max 3m), horizontal (min 250mm, max 5m).

An additional bend can be incorporated in to the horizontal section of the 'up and out', dependent upon a 1m min vertical rise.

C - Top outlet/vertical (min 3m, max 10m).

D - Top outlet/vertical with offset (min to first bend 500mm, max flue length 10m).

Ask your retailer for full technical details or see our Concentric Flue System brochure at www.gazco.com.

Models which can use this system are:

Small* and Medium Gas Marlborough, Small* and Medium Gas Stockton, Gas Stockton 5, Gas Huntingdon 30, Gas F67 Riva[†], Gas F67 Riva Bench[†], Gas F67 Riva Pedestal[†], Small* and Medium Gas Clarendon and Clear Glass, Gas Ashdon and clear glass, Small* and Medium Steel Manhattan and Gas Riva Vision Small, Midi, Medium & Large[†]. (*Rear outlet only [†] Top outlet only). All Balanced Flue models are log effect only.

4. Powered Flue

Where a room has no chimney then a Powered Flue is the answer. It is a special extractor unit which attaches to an outside wall and removes the products of combustion, along a rigid metal pipe by fan action. Generally the flue pipe can be of longer lengths than with a Balanced Flue and can also include a number of 90° bends.

Models which can use this system are:

Small, Medium and Large Gas Marlborough, Small and Medium Gas Stockton, Small, Medium and Large Gas Clarendon and clear glass, Gas Ashdon and clear glass, and Medium Steel Manhattan.

Use Powered Flue with coal effect only.

^Δ Due to the high efficiency and the limited flue flow of the closed convector stoves, a 5" (125mm) flexible flue liner is required when installing the stoves into a brick chimney or a larger than 5" (125mm) diameter lined flue. The only exception to this is stoves that are listed as suitable for installation with a Gazco closure plate and spigot over a standard 22" x16" fire opening.

* Small Electric Marlborough is 1" (25mm) higher.

† (Balanced flue version 5¹/₄" 134mm).

* (Small balanced flue version 14¹/₂" 370mm).

* (Medium balanced flue version 17³/₈" 453mm).

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear must be a minimum of 2" (50mm).

The Marlborough has a choice of top or rear flue exit and can be supplied with an optional rear closure plate: Small (**8108**), Medium (**8109**) and spigot extension (**8111**). Small balanced flue stoves are rear exit only.

Stove Flue Pipe

Balanced flue versions of the Gas Marlborough must only use the 6" stainless steel flue provided. For additional Matt Black, Midnight Blue, Laurel Green and Ivory enamelled flue collars, please see the Gazco Stoves price list. Gazco recommends the use of 5" matt black enamelled stove pipe with the conventional flue version Marlborough stove. The components usually required are:

Description	Product Code
1' Straight pipe	4500
2' Straight pipe	4501
3' Straight pipe	4502
90° long 'elbow' adaptor (9" projection)	4514

Longer legs - Matt Black only

A set of longer legs, raising the height of the Clarendon by 2½" (55mm) is available as an optional extra*. Product code **8113**.

*Not suitable for use with optional rear closure plate.

⊗ (Small balanced flue version 17" 430mm).

* (Medium balanced flue version 20½" 520mm).

† (Medium balanced flue version 6¼" 158mm).

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear must be a minimum of 2" (50mm).

The Clarendon has a choice of top or rear flue exit and the Small Clarendon can be supplied with an optional rear closure plate (**8104**) and spigot extension (**8111**). Small balanced flue stoves are rear exit only.

Large BF	173	97	115	646	320	171	62	69	656	375	876	438	152

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear 2" (50mm). The Gas Riva Vision Large has a top flue exit only.

The Gas Riva Vision stoves can also be placed on one of our ten Riva Stove Benches. Please see page 57 for further information.

Stove Flue Pipe

Balanced flue versions of the Gas Riva Visions must only use the 6" stainless steel or anthracite flue pipe. For the conventional flue version of the Gas Riva Vision Gazco recommends the use of 5" matt black or gloss enamelled stove pipe. The components usually required are:

Matt Black Flue Pipe	Product Code	Gloss Flue Pipe	Product Code
1' Straight pipe	4500	1' Straight pipe	4500GB
2' Straight pipe	4501	2' Straight pipe	4501GB
3' Straight pipe	4502	3' Straight pipe	4502GB
90° Long 'elbow' adaptor (9" projection)	4514	135° Bend	4512GB
Flue collar	8549		

Balanced Flue Gas Stove Systems

The Gazco Balanced Flue system means no chimney is not a problem if you opt for a balanced flue gas stove, as it draws combustion air from outside through its concentric pipe systems. A full range of optional flue components is available to suit configurations shown on page 48.

Gazco have specifically developed a range of flue system components to complement your balanced flue stove. Crafted from 304 grade stainless steel and aluminium with some items additionally offered in anthracite and matt ivory paint finishes. Designed with ease of installation and flexibility in mind, these flue systems simply push together without the requirement for lockign bands or screws. Both the inner and outer pipes are secured with easy fit, self locking, high temperature silicone seals. For further information, please speak to your retailer or visit www.gazco.com

Components for balanced flue models

Basic Stainless Steel Kits	Product Code
Rear exit, horizontal - complete with terminal guard	8526
Top exit, up & out, stoves	8523
Top exit, up & out, Riva Vision Large & F67	8534
