

MirrorVision⁺ Glass Detail

Producing a television product which gives a true mirror finish when the television is switched off requires a specialist glass finish.

Aquavision have achieved a perfect balance between the conventional 100% reflective “silver” mirror and the minimally reflective glass normally required for television viewing.

The end result is MirrorVision⁺; a perfect mirror and a perfect picture.

Ideal for every room in the house, hotel, office, everywhere that you may require a mirror or a television. With absolutely no visible signs of the television when it is turned OFF and a clear, bright picture when the television is in use.

MirrorVision+ - High Brightness Mirror Glass	
Glass Thickness	5mm
Glass Weight	12.5kg/m ²
Glass Substrate	Crystal Blue on Clear
Production Standards	ISO 9001; Lead Free; ROHS
Performance: Light test with spectrophotometer	
Light/Energy Transmission	23.78%
External Light Reflection (coating side)	50%
Internal Light Reflection (glass side)	26.91%
Visible Colour Reflection	100%
Visible Colour Transmission	99.90%
100% Colour Match to a Natural Mirror	
94% Brightness to a Natural Mirror	
Distortion-free Mirror Reflection	

Unlike many competitor products, MirrorVision+ even works in high ambient light environments.

The glass has been sourced from a specialist manufacturer with many years’ experience in vacuum coating. They are the world’s originators in using high-tech magnetron sputtering in the production of vacuum mirrors. Utilising this system, we have innovated a proprietary hard-coating technique which, when applied to the final stages of glass formation, produces a surface that is 5 times harder to scratch and which substantially increases the product’s shelf life. The propriety coating is strengthened using Stainless Steel and Titanium.
