### 11-piece Technical Rider

#### **ENGINEERS**

Get Funked travel with one FOH sound engineer and one monitor engineer.

#### FRONT OF HOUSE SYSTEM

High quality full range system professionally set up and adjusted to the acoustics of the venue, capable of delivering a minimum of 110dB across the entire frequency spectrum without distortion. System flown or floor mounted as appropriate to the venue, with delayed speaker groups if necessary to deliver high quality audio to all parts of the auditorium. Mix position with clear view of the stage, slightly raised if necessary, not next to room boundaries, or under overhangs. All system controls (Crossovers, EQ, Drive) should be easily accessible from FOH mix position. Please inform us of any environmental noise limiting or curfews well in advance of show day. Please provide a sober, english-speaking system technician who knows the equipment to assist for the duration of the soundcheck and performance.

#### **SPEAKERS**

1st preference: D&B
2nd preference: L-Acoustics

Acceptable: Meyer, Adamson, Nexo Alpha, Martin

#### **FOH MIXER (DIGITAL)**

1st preference: Yamaha CL5 2nd preference: Yamaha QL5 2

Acceptable: Yamaha M7CL, PM5D, Digidesign Venue Profile, Midas Pro, Digico.

PLEASE NOTE: A SHOWFILE WILL BE EMAILED IN ADVANCE, OR PROVIDED ON THE DAY TO INSTALL VIA USB STICK

#### **FOH MIXER (ANALOGUE)**

Due to the complex nature of our show, we no longer accept analogue consoles.

#### **PLAYBACK**

Get Funked's playback is operated by the drummer and is accounted for in the channel list. FOH should also be provided with 1 x iPod cable (mini jack to XLR) and 1 x CD player.

#### **COMS**

- Microphone for talk to stage (FOH and monitor positions).
- A professional intercom system between monitor and FOH.

#### **AC POWER**

AC power (13 amp) is required as per the attached stage plan. Keys, Bass, Guitar and Drums.

#### **MONITOR REQUIREMENTS**

#### Vocals:

 Wireless IEMs must be provided for all three vocalists. Pro Sennheiser or Shure systems are preferred with individual stereo mixes. Wedges are not acceptable.

#### **Band:**

- High quality monitor speakers e.g. L-Acoustics, D&B, Meyer, Nexo, Martin.
- 7 x Bi-Amped Monitors all running on the same visible high quality amplifiers on individual mono mixes.
- 1 mono drum fill including sub.
- 2 Mono Side fills for large stages.
- 1/3 Octave graphic EQ on each monitor mix clearly labeled & flat.

For aesthetic purposes at some events, the client may wish to minimise monitors and cables on stage, in which case an Aviom / IEM system for the entire band may offer a suitable solution. This will be both at the client's request only and is not a specific band request.

#### MONITOR MIXER

1st preference: Yamaha CL5 2nd preference: Yamaha QL5 2

Acceptable: Yamaha M7CL, PM5D, Digidesign Venue Profile, Midas Pro, Digico.

Please provide a console that is appropriate for Monitor mixing and please position the monitor console at the side of the stage with clear view of all musicians. Stage left where possible. Please always include a listen wedge.

#### PRODUCTION MANAGER NOTES

- Unless restricted by the venue our average SPL over a 1-hour period will be approx. 98dB
- If there is a support act, there will be no channel sharing (except at festivals) and they must use their own backline unless by agreed otherwise with Martyn Strange.
- At whatever time the band are instructed to arrive to set-up and sound check, all patching should be completed, with line-checks completed and monitors and IEMs pre-tested.

#### **STAGE DIMENSIONS**

Get Funked require a 8m x 4m stage (or larger) for their 11-piece line-up. The front of the stage should be 20-30cm in height for smaller venues and marquees, however stage heights are subject to the size of the venue and for large arenas should be raised accordingly.

#### **RISERS AND TIERING**

The rear half of the stage should be tiered by 20-30cm for non-permanent stages with 2m x 2m for drums tiered a further 20-30cm. If the stage is a permanent feature of the venue and tiering is not possible, three risers must be provided:

- Drums 2m x 2m at 40-60cm in height
- Percussion 2m x 2m at 20-30cm in height
- Horns 3m x 2m at 20-30cm in height

Risers must be dressed in black, carpeted, of safe and stable construction and rolling if at a festival. Please see attached stage plan for positions.

#### PARKING AND LOADING

Secure parking must be provided for up to six vehicles or one tour bus. If requested, one adult must also be provided to assist with load-in and load out (all at no cost to the artist).

#### **SOUNDCHECK**

Once set-up, patched in and line-checked, Get Funked will require a minimum of 50 minutes of uninterrupted time for soundchecking (excluding at festivals).

#### **RECORDING AND PHOTOGRAPHY**

Get Funked do not permit audio or visual recordings of their performance without prior written consent.

#### PLEASE READ\*

- Get Funked request that they do not share equipment with other acts (except at festivals).
- All equipment must be supplied tested and in good working and cosmetic order.
- Any adjustments to this list must be agreed in advance with Martyn Strange two weeks prior to the show. LEAVING IT UNTIL THE DAY OF THE SHOW IS NOT ACCEPTABLE.
