# Home Run - International

## INTRODUCTION

---

The International module of Home Run provides the customer with the most essential tools for European operations. The additional modules include the ability to forward plan all movements on a weekly and/or monthly basis. To plan holidays for drivers, service dates for vehicles and forward load booking. To view operations at home or abroad on separate screens. To arrange schedules in trailer, cargo and load or area order at the press of one key. It includes an additional module to give the operator the facility to accurately quote for work, which will incorporate currency conversion (EURO) and ferry crossing or Euro tunnel cost.

### FEATURES:

- ◆ User friendly windows (3.11, 95/98 and NT) based system.
- ◆ Millennium compliant, multi-user system.
- ◆ Can be easily customised for end user(s).
- ◆ Planning can be done on a daily, weekly or monthly basis.
- ◆ Determines vehicle and driver availability.
- ◆ Load, vehicle, trailer, driver booking system.
- ◆ Flexibility to view the daily activity in any determined order.
- ◆ Can plan European operations separate to home operations?
- ◆ Facility to use and quote in various currency including the EURO.
- ◆ Ability to tender/quote for work with fixed and flexible costing.
- ◆ Built in communication system to send and receive fax orders.
- ◆ Ability to arrange shipping schedules and report directly to accounts
- ◆ Facilities to implement sub-contract work.
- ◆ Prepares and issues all work up to invoice.
- ◆ Fully integrates with most quality accounts systems.
- ◆ Additional features to create your own management reports.

## SCHEDULER

### DESIGN LAYOUT - HOME RUN SCHEDULER

The SCHEDULE represents the starting point for all traffic management planning. The top menu bar contains the essential functions for a transport manager to perform his daily activities. The ability to view the planned activities and movements on a day to day basis, or view a week or month at a time can be easily achieved via the ZOOM in and out functions. In addition new customers, drivers, vehicle, collection point and destination address can be inserted by referencing the database via the **Database** button. Print outs for management reports, driver's instructions etc. can be simply executed via the **Print** button.

## SCHEDULER

Details of all planned work can be retrieved by clicking the **Job** button or by clicking on the planner at the work in question. The planner holds details of all Import, Export or Home jobs to be done for each day. Jobs can consist of multi-company, multi collection of multi commodities and delivery to multi destinations, giving a totally flexible solution for today's company needs.

There is even a **Distribution** button to allow you to plan the loading for each vehicle.

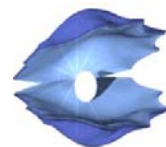

The planner can give a brief summary of a job at a particular instant in time. The manager can retrieve details on the company, the delivery point of the job, vehicle and trailer details (as indicated by the green line on 18<sup>th</sup> Dec on the previous page). The **Pending** button at the bottom of the page reveals all unscheduled work. The 'Number of Orders' indicates the number of new orders taken which the manager has not allocated yet.

Company	JobNo	NoCust	Duration	StartDate	STime	Collection	EndDate	ETime	Delivery	Status
MOULTON BULB CO LT	479	1	1	1/18/99		OUDE TONGE	1/19/99		SPALDING	I

## ORDER FORM

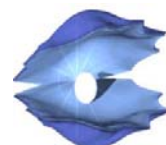

### DESIGN LAYOUT – ORDER FORM

The Order Form gives the user an easy method of entering all new orders directly. When a new order to collect and deliver goods have been received the user will find entering this information on to the spreadsheet below simple. By clicking on the **New Order** button the user will be given a blank record on the spreadsheet to enter new details of the order. The combined functions of click and select or using one letter to enter complete collection or delivery details makes entering details of a job quick.

JobDate	Customer	Status	Goods	Collection	ColQty	Units	On	Delivery	DelQty	Load	Split	Rates
