enablesIT

INFRASTRUCTURE AS A SERVICE

EnablesIT High Availability Virtual Enterprise Network (Haven) gives you instant, pay-as-you-go access to our ready-to-go platform. Delivered from our Tier III UK and US data centres, Haven provides a highly reliable, resilient and secure infrastructure to support your computing needs.

Infrastructure as a Service (IaaS) provides a trusted, reliable and scalable platform on which to build your applications and host your data.

Our Haven IaaS platform serves customers from Tier III UK and US data centres, and is immediately available for you to deploy your next project. Our team of highly experienced specialists can work with you to migrate or deploy your service. Haven IaaS offers immediate access to compute resources and storage capacity. Server images are available in a range of processor and memory configurations and storage can be sized to meet your expectations for growth. We can also augment the solution with additional services, such as backup and disaster recovery.

With enablesIT managing the infrastructure, your valuable, in-house IT team can concentrate on what it does best – supporting your organisation with business-focused solutions.

KEY FEATURES OF INFRASTRUCTURE AS A SERVICE INCLUDE:

- Delivered from our Tier III UK and US data centres
