

## LEGIONELLA RISK ASSESSOR

We are looking to appoint an experienced Legionella Risk Assessor or Built Environment Scientist to join our Built Environment Division, based at our Southern Area office in Aldermaston, Berkshire.

This division specialises in the monitoring of water and environmental quality in commercial and industrial buildings, advising our clients on the management of water quality and Legionnaires' Disease, and indoor air quality.

### Key tasks and responsibilities:

- Undertaking Legionella risk assessments and reviews to a wide range of buildings throughout the UK
- Undertaking inspection and auditing of Legionella risk control programmes. To include reviewing records and checking accuracy of schematic drawings and asset lists, and reporting.
- Undertaking water sampling and inspection works to a wide range of building services.
- Preparing schematic drawings for domestic and other water systems
- Communicate and liaise verbally and in writing between customers / suppliers / visitors / enquirers and relevant staff

### Attributes:

- You will need to be honest, confident, flexible, well-motivated and committed to meeting client deadlines, with an ability to work independently and as part of a team
- Maintain regular consistent and professional attendance, punctuality, personal appearance, and adherence to relevant health & safety and quality procedures
- Must be flexible with regards to travel and overnight stays where necessary

We offer a highly competitive remuneration package, including a company vehicle and pension plan.

All positions are subject to a full clean UK driving licence, enhanced DBS (formerly CRB) clearance, proof of qualification/experience, and satisfactory references.

We would also be interested in speaking to candidates with experience in related disciplines from Occupational Hygiene, Asbestos Surveyors, Risk Assessors and Business Development.

First Environment Limited is a professional practice of independent environmental consultants offering a wide range of safety, health and environmental services.
