FONO

BROUGHT TO YOU BY

IN PARTNERSHIP WITH

MATERIALS AND CONTROLS

Fono is a meeting point for youngsters with a DJ system at its centre. This DJ system challenges teens to express their musical creativity and make music which they can edit and share through their phone.

- Sturdy HPL roof
- Optional solar panels for green energy supply

- Stainless steel DJ interface and speaker plates
- Durable ertalyte PETP touch-buttons
- Optimal protection against vandalism

- Soundshield 'ears': More sound for DJ, less for neighbours
- Integrated speakers
- 80 DB for DJ, 60 DB for surroundings

- Extremely robust concrete design

- Galvanized steel chill tubes to relax and sit on

- Anchoring to the floor

- All electronics are tucked away in a safety box under stainless steel hood
- Secured with special anti-theft bolts

INCREDIBLY STRONG. PRECISELY ENGINEERED

The focus during the development of the Fono has been on durable design. No detail has been overlooked to make sure the construction can withstand the harshest treatment, from weather, but of course also from the users. It has been subjected to several tough (user-) tests, ranging from throwing sand and soda in it, to standing on the turntables and roof.

Only when it passed those tests with flying colours, it would get a seal of approval. This resulted in a very strong concrete structure combined with durable galvanized bars that can safely be placed at youth hangouts all over the world.

PLACE YOUR PHONE ON AND GO!

Developed in association with many DJs, Fono replicates a professional DJ system specifically designed to be very easy to use.

To make it work, you only need to place a mobile phone or any other music player device onto one of the pads. Sound will automatically amplify and play live. This DJ system challenges teens to express their musical creativity!

A DJ TABLE FULL OF GREAT FEATURES

1. MOBILE DEVICE PADS

By putting the mobile device on the mobile pickup pad the sound is amplified by the Fono DJ table. Fono can be used with mobile phones or any other music player device with speakers.

2. VOLUME

Variable sound levels

3. CROSSFADER

The crossfader can be used to balance the output of the two different channels of the Fono

4. 5. 6. EFFECTS, DISC AND RING

Add effects to the music like an echo or crossfader. Very recognizable are the black, turnable disks to scratch.

7. MOBILE AND LOOP BUTTONS

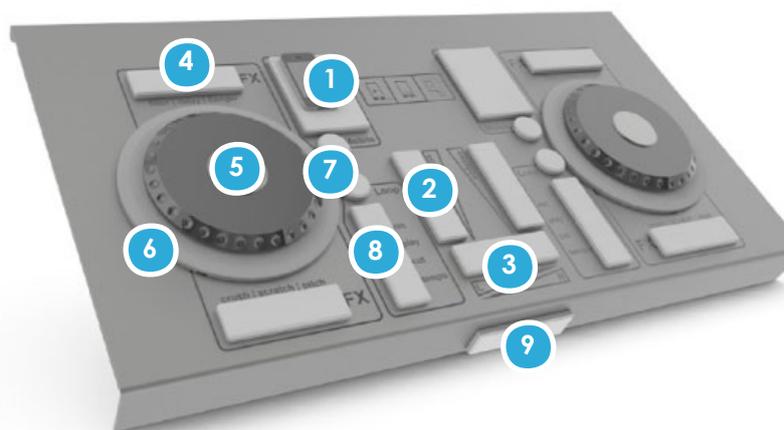

The mobile option plays music from a mobile device while the loop plays sound from a recorded loop.

8. LOOP - ADVANCED FUNCTIONS

Pressing the REC button will activate the record function. Pressing the play button will play the loop and the tempo button will allow the user to change the tempo using the spinning discs.

9. HEADPHONES

Users can connect their headphones to the headphone insert (3.5mm Jack) on the front of the Fono DJ table. This way they can listen to the one channel, preparing it for playing, while playing the other for the audience.

SUCCESS STORIES

Allan Moffat, Mill Park, Bracknell - UK

Bracknell Town Council in Berkshire were the first council to join the Fono movement in the UK. The DJ booth can be found now at Mill Park in Bracknell and they are absolutely delighted with it. Bracknell Town Council Recreational Facilities Manager Allan Moffat commented: "We wanted to give teenagers a place to meet with their friends and hang out. Fono is a great addition; we are very pleased we've added it into our park".

For noise concerns, Fono comes with adjustable settings that allow you to choose the hours that the product can be used giving you total control. The Fono has been specially designed to contain sound. Allan Moffat added "We were a little worried about the noise levels but this has proven not to be a concern and we are very pleased with the noise".
