

## Customer Reference Story (Landfill Engineering)

---

→ **Situation**

Crapper & Sons Landfill, Royal Wootton Bassett, England.

→ **Critical Issue**

New landfill cell being installed, cost effective solution required to provide a leachate drainage layer. The PAS108 Tyre Bales have high permeability and are easy to handle make them ideal for these applications

→ **Reason**

More and more waste is created in the U.K. New landfill cells are required to deal with this waste.

→ **Capability (when, who, what)**

Rob Morris Environmental Ltd supplied 750 PAS108 Tyre Blocks (Approximately 75,000 waste Tyres.) The Bales were delivered to site over a 3 week period 2012 with no logistic or offloading issues. Rob Morris Environmental ltd then installed the Tyre Blocks with specialist laying plant and equipment.

→ **We Provided**

An effective and successful solution cost effectively.

→ **Result**

The job has recently been completed and delivered successfully. Rob Morris Environmental Ltd is now established in the market for supplying correctly produced PAS108 Tyre Bales anywhere in the U.K..
