# Cable Wrap Kit

(a)   (b)

1. The Cable Wrap Kit contains 6 Common Loop Connectors (a) and 72" of self-securing tape (b). This tape can be cut to the desired length for your particular purposes.

3. Wrap the opposite end of the tape around your cable and repeat step 2 to finish securing . If desired, one end of the cable can be captured in the tape as shown (e) to keep the Cable Wrap ready for use at all times.

(c)   (d)

2. To secure the Cable Wrap Kit, thread one end of the tape through the common loop connector (c). Fold the tape back onto itself "fuzzy" side to "fuzzy" side and press (d).
