

Are You Doing Enough To Protect Your Staff?

There are **193 assaults** on doctors, nurses and paramedics every day in England so your organisation needs to have a heightened sense of **Security Awareness**. See the parliament debate at <http://goo.gl/EciM90>

Specific Critical Incident Threats For NHS Hospitals

- Easy access to hospitals and internal spaces
- Mishaps (operations) blame, distraught family members
- Patient with mental health issues
- Terrorist Attack (Soft Target)

The Solution - Critical Incident Management Awareness Training

- Staff awareness raised to identify threats and intruders mitigating a potential critical incident
- Enhances security posture through employee knowledge and collaboration with the security department
- Enhances Crisis Management Program
- Staff can respond quickly
