

Buckhorn has the answer

Cheese production : safe and hygienic handling of a quality product from maturing to market.

Food distribution : smooth clean surfaces promote hygiene from packaging to purchasing.

Chemical distribution : safe handling of hazardous liquids from H₂O to H₂SO₄.

Order preparation : compatibility with automated handling equipment from warehouse to wagon.

Automotive : Jumbopal pallets just-in-time supply and robot handling compatibility from supplier to saloon.

Recycling : safe handling of industrial waste from rubbish to raw material.

From the hygienic handling of food produce to the safe distribution of hazardous chemicals, from fully automated warehouse storage of industrial parts to the secure storage of forensic evidence, from the handling of delicate electronic components to the bulk harvesting of cabbages - millions of products of all shapes and sizes are every day protected, prepared, stored and transported in Allibert Buckhorn containers and on Allibert Buckhorn pallets. Allibert Buckhorn produce more models of plastic containers and pallets than any other manufacturer.
