TECHMIRE

die casting solutions

FOR Conventional machines , NT, NTX

Mold lubrication system for conventional High Pressure Die Casting machines and larger Techmire models.

- Robust system made to lubricate mold cavity and to clean mold halves from remaining residues.

- Lubricant and air mixed together at spray head + dry air spray
- Possible to adjust the mist by reducing the air pressure and the volume of lubricant.
- Large lubricant reservoir equipped with level detector.
- Lubricator arm moving down and back up. End switch include for position detection.
