

Time and Attendance Made Simple... and Smart!

uAttendTM
Employee Management System

The Time & Attendance market is changing...

In the cloud – keep it simple!

Time and Attendance used to be difficult to implement...

Not any more!

The uAttend system can be up and running within 15 minutes of receiving your terminal, it really is that easy.

Gone are the days when HR and IT departments needed to worry about how they were going to get the time and attendance system working!

The uAttend system is delivered directly to internet browser screens. This means there is NO software to install and there is universal access.

- It's Plug 'n Play – Installs are fast, easy and in-expensive

The uAttend system comes with...

- **Lifetime Warranty**

The system will always be there for you

- **Lifetime Support**

Help will be there whenever you need it

- **Known (very low) Monthly Membership**

Never be surprised by a large bill again!

Multiple Sites and Remote Locations

uAttend – Revolutionising T&A...

uAttend can collate data from hundreds of sites and collect data by many different means:

Choose from:

Clocking Terminals

Landline Telephone

Smartphone App (with GPS)

Web

Employees Clock

Built for Ease and Simplicity

Unlike a time clock that is linked to a computer and client-based software, uAttend uses cloud computing to give businesses the flexibility of doing time and attendance anywhere and anytime.

Additionally, the system is extremely flexible, enabling employees to “clock” in and out from a time clock, or a web-browser, or by phone. Unlike other systems, all the clocking data, no matter what the source, is combined online for easy editing and reconciliation.

There is no need to network together different solutions for different employee types or to access a single client-based computer for time and attendance.

Installation...

These are the easiest-to-install time clocks ever invented!

Enter the time clocks unique code into your uAttend account, plug it in, switch it on, and it works!

It really is as simple as that!

Even the Wi-Fi unit only needs the Wi-Fi code entering into it and then it just works as well.

How can we make it this easy?

The terminals do NOT need a fixed IP address or any port forwarding set up as they communicate with the uAttend system, not the other way around. Therefore they are only ever communicating out on port 80 and never interact with the local network at all except for requesting an IP address.

This means that terminals can be installed on anyone's network without any issues arising with security as the units just communicate with uAttend and not any local computers.

Finger Prints

When finger print templates are recorded for employees, they are only stored as numbers.

There is NO way that the image of the employees finger can be reconstructed by anyone who has access to the terminal once it has been stored.

In fact your finger prints are much more readily available on the surfaces and objects that you touch each day than they are through the clocking terminal.

Summary

- **uAttend is Easy to Set Up and Use**
- **Cloud Based Technology so...**
- **NO Software to install**
- **Real Time Remote Monitoring**
- **Plug 'n' Play Internet Ready**
- **Lifetime Technical Support**
- **Lifetime Hardware Warranty**
- **It couldn't be simpler!**
