Electronics

The **Callfree 3G** is a GSM remote control switch that is activated by calling its mobile phone number. There are no call costs incurred as it will reject the call without answering. This will turn the device it is connected to , on or off.

The Callfree 3G can be connected to a wide range of devices such as electric gates, central heating, burgular alarms, passive infrared sensors, water level or leakage sensors, Carbon Monoxide detectors and many more. The Callfree 3G will send a text with information when an alarm condition is triggered.

Product Features

- No expensive keys or remote controls to lose or damage
- Can be used to turn on heating & lights remotely
- Alarm input can be used to link to PIR's for remote monitoring
- No call charges to operate
- Remote operation from anywhere in the world, at any time
- Compact aluminium design with easy mounting feature
- Optional weatherproof IP65 enclosure

Technical Specifications

Operating Voltage	12 / 24 volts AC / DC
Operating Current	Maximum 250mA, typically 55mA
GSM Module	Cinterion / Simcom
GSM Frequency	GSM 850/900/1800/1900 Mhz, WCDMA 850/1900 or 900/2100 MHz
Physical size	9.5 (L) x 6.0 (W) x 2.5 (H) cm
Antenna	Short Antenna
Humidity	Less than 80% RH
Operating Temperature	-20°C to 50°C
