## We know how to keep you moving.

You cannot afford to stand still; downtime simply costs too much. Your conveyor belts must keep going. Stevens Belting can help you reduce downtime to the absolute minimum.

### We Know Your Belts

Our many years of experience in the conveyor belting business means we know your application and we continually keep up to date with the latest developments. We can advise on the correct material to maximise both lifespan and cost-effectiveness. We also offer service and maintenance contracts to avoid breakdown.

### Service Around The Clock

In case of belt breakage or damage, we offer 24/7 service to help you minimise downtime.

### Quality Materials

Stevens Belting sources only the highest quality materials; we understand that longevity and reliability are key. We also share exclusivity agreements with top European suppliers, ensuring a consistent flow of top quality products.

### Nationwide Supply & Service

Thanks to our strong relationships with a number of independent belting specialists, we can offer our products and services throughout the UK and Ireland. Discover more at [www.stevensbelting.co.uk](http://www.stevensbelting.co.uk)

EXPERIENCE

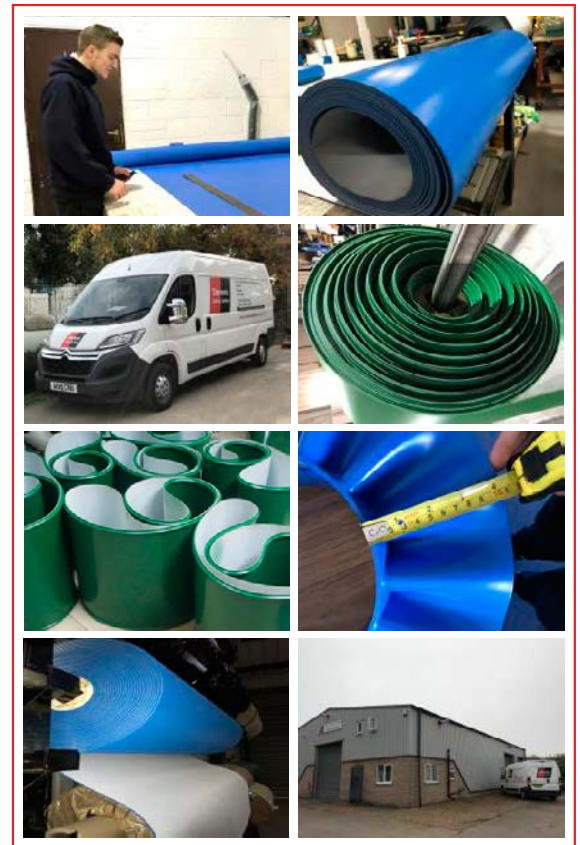

## You Supply High Quality Machines, We'll Take Care Of Your Belts.

**As an equipment manufacturer you have many different things to worry about.** It's your customers' breakdown time that you want to minimise. You want all your machines to be equipped with the right belt for the application. In these times of fierce competition, you want to offer the best value for money.

**Your partner for belts.** The conveyor belt or transmission belt is an important part in your machines and Stevens Belting is just the partner you need. In our fully equipped workshop we can fabricate all of your belts made to measure.

**Latest developments.** There are a huge number of different conveyor belts and even more possible applications. At Stevens Belting we keep watch on all the latest developments. Truly independent; we use and source the best belting technology.

**We know your belts.** New developments are important to keep up with your market. It will be our pleasure to assist you in any new developments. In co-operation with your R&D department we can determine the right belt material to be used in a specific application. Make sure you use the right belt, that will last longer and run better. Happy customers that want to buy more will be your reward.
