transforming children through singing

**PRESS RELEASE - FOR IMMEDIATE RELEASE**

**Oct 8- RFP for ground breaking learning site for leading UK children's music charity**

In November 2018 The Voices Foundation will be celebrating its 25th anniversary and as a commitment to supporting change through music we are seeking to release an online learning centre for teachers to support our offline training.

Teachers have told us that they need digital resources to support their ongoing learning and head teachers tell us about the pressures and time limitations on teachers for planning music lessons. Schools want us to provide resources which are more prescriptive so that teachers are empowered to get on with using ready-made resources. The resource will be simple, accessible and immediately useful for teachers.

The project centres phased approach and the delivery of a Minimum Viable Product which we would like to showcase (could be XD designs or prototypes if not full site) to potential sponsors and contributors the importance of the tool. We are seeking to create an award winning online destination that meets the needs of teachers but will grow and develop in the next 12-18 months. We are seeking a developer to support the MVP and the larger project scope.

We will be seeking to hear proposals the week commencing October 8. Please contact us for a brief [vf@voices.org.uk](mailto:vf@voices.org.uk)
