## Bremont launches America's Cup Collection

JUNE 2015

May 2015 saw Bremont announce a partnership with the America's Cup Event Authority and ORACLE TEAM USA to be the Official Timing Partner of the 35th America's Cup and ORACLE TEAM USA. As the first official British timing partner to the America's Cup since 1851, Bremont has embarked on a very exciting project to produce a special edition series of timepieces to celebrate its involvement.

Giles English, Bremont Co-Founder; "Bremont is incredibly proud to be involved in such a historical event, not least of all to be the only watch company allowed to build a watch associated with the 35th America's Cup and ORACLE TEAM USA. The America's Cup is possibly the only team extreme sport out there; these boats are built using pioneering technology which makes the race more exhilarating to watch with each Cup. We're excited to see these new watches be put through their paces on the water, they will certainly be Tested Beyond Endurance."

The build-up to the 35th America's Cup is well underway and ORACLE TEAM USA have relocated to Bermuda to test and sail on the waters that will host the adrenaline-fuelled event in 2017. With Australian skipper Jimmy Spithill at the helm, the team will be looking to secure their third consecutive win. Jimmy became the youngest ever skipper to win the Cup with ORACLE TEAM USA in 2010, and oversaw their remarkable 2013 victory, thrilling audiences with one of the greatest comebacks in sporting history.

The precision engineering of modern America's Cup boats provides a genuine correlation to Bremont's precision manufacturing of luxury timepieces

After visiting Bremont's Mayfair boutique in London Jimmy said that the watch company's enthusiasm for being Official Timing Partner to ORACLE TEAM USA was clear: "They understand a lot of our componentry, what makes a boat go fast, and all the aviation similarities like lift and drag. So they'll be thinking how can we help these guys, as if they were helping a pilot, what can we do to help him make better decisions and have an edge over the others. Thanks to their background and their interests, I really see it being a strong relationship."

## AMERICA'S CUP COLLECTION

### AMERICA'S CUP SERIES

The America's Cup Series is a classic watch collection befitting the history of the Cup and Bremont has launched two Special Edition watches, the Bremont AC I and AC II. These models have been inspired by the legendary J-Class yachts of the 30s, both classic and beautiful. Carrying the 'London' mark on the dial, all of the watches are built in the UK using the highest quality components. The watches are also delivered in Bremont's English made America's Cup leather wallets.

#### BREMONT AC I

The Bremont AC I was inspired by the simple lines of the J-Class yacht with its classic and understated design; it incorporates sea blue steel hands and a fine ivory white opaline dial embossed with outlines of the Cup to give subtle pattern and depth to the face of the watch. Taking its design reference from the SOLO range, this is the first time Bremont has introduced a polished steel version. The AC I is chronometer-rated with a top execution automatic movement, an obvious choice for anyone interested in the allure of mechanical watches. The movement and robust anti-shock movement mount can be viewed through the sapphire crystal exhibition case back. The hand polished case is water resistant to 100m and comes on a blue Temple Island rubber strap.

#### BREMONT AC II

In keeping with the style of the AC I, the AC II is a bi-compact chronograph made from rose gold inspired by the iconic polished ALTI-C. The beautifully shaped blue steel hands set against the fine ivory white opaline dial once again capture the timeless elegance of the J-Class yachts; the AC II is an archetypal watch that resonates well with the history of the America's Cup. Bremont has incorporated the subtle motif of the Auld Mug outline on the two sub-dials offering a wonderfully refined pattern to the face of the watch. Integrating an impeccably modified, chronometer-rated, Valjoux 7750-SO BI AC movement that can be seen through the exhibition case back, the AC II exemplifies fine watchmaking at its best.

## AMERICA'S CUP COLLECTION ORACLE TEAM USA SERIES

In partnering with ORACLE TEAM USA, the current defenders of the America's Cup, Bremont has a very special and unique opportunity to work with them to create a practical and beautifully engineered collection of sailing watches, setting a new standard in technical innovation, precision and durability.

### BREMONT ORACLE I

The Bremont Oracle I is a purpose built timepiece that is constructed to be used on the water, or in the water, as a reliable piece of equipment for any seafarer. The design has very much evolved from the Supermarine range that is used by divers and military around the world demonstrating its durability and robustness. Incorporating the ORACLE TEAM USA branding on the new off white dial together with applied index numbering has produced a modern yet classical sailing watch. The red tipped minute hand and beautifully cast case back are also clear indications that this is a team associated watch. The watch is designed with a sapphire crystal uni-directional rotating bezel to give a clean and distinguished look.

The Oracle I is built using a highly technical 500m water resistant case, incorporating the Bremont anti-shock movement mount and anti-magnetic Faraday cage which encases the beautifully finished, chronometer-tested, BE-36AE movement. Each case incorporates an automatic helium valve.

### BREMONT ORACLE II

The second watch in the ORACLE TEAM USA Series is designed on the same principles as the Oracle I but features a titanium case with a second time zone enabling GMT functionality. The striking fine varnished matt black dial with applied index markers is finished off with 'America's Cup' written above the '6', and the beautifully engineered titanium case back has the ORACLE TEAM USA branding etched into it.

The Oracle II is built using a highly technical 500m water resistant case, incorporating the Bremont anti-shock movement mount and anti-magnetic Faraday cage which encases the beautifully finished, chronometer-tested, modified caliber 13 1/4" BE-92-2AE movement. Each case incorporates an automatic helium valve.

## BREMONT AC I

### FEATURES

#### MOVEMENT

Calibre 13 1/4" BE-36AE automatic chronometer, 25 jewels, Glucydur balance, Anachron balance spring, Nivaflex 1 mainspring, 28,800 bph, 38 hour power reserve, Bremont moulded and skeletonised decorated rotor.

#### FUNCTIONS

Hour/minute/second, date at 6H.

#### CASE

Polished stainless steel Bremont Trip-Tick® construction with scratch-resistant DLC treated case barrel. Protective anti-shock decorated movement mount. Case diameter 43mm, lug width 22mm.

#### CASE BACK

Polished stainless steel with integrated flat crystal, 5 stainless steel screws with polished heads.

#### DIAL

Metal 'Auld Mug' embossed dial with blue steel hands and classic numerals.

#### CRYSTAL

Domed anti-reflective, scratch resistant sapphire crystal.

#### WATER RESISTANCE

Water resistant to 10 ATM, 100 metres.

#### RATINGS

C.O.S.C chronometer tested and certified.

#### STRAP

Temple Island rubber strap with polished stainless steel pin buckle.

#### CERTIFICATION

Individually serial numbered with accompanying C.O.S.C certification.

## BREMONT AC II

### FEATURES

#### MOVEMENT

Calibre 13 1/4" BE-50AE automatic chronometer, 28 jewels, Glucydur balance, Anachron balance spring, Nivaflex 1 mainspring, 28,800 bph, 42 hour power reserve, Bremont moulded and skeletonised decorated rotor.

#### FUNCTIONS

Hour/Minutes, small seconds counter at 9H. Date at 6H. Chronograph centre sweep seconds hand, 30 minutes counter at 3H.

#### CASE

18 carat rose gold Bremont Trip-Tick® construction with scratch-resistant DLC treated case barrel. Case diameter 43mm, lug width 22mm.

#### CASE BACK

18 carat rose gold with integrated flat crystal.

#### DIAL

Metal dial with blue steel hands and classic numerals. 'Auld Mug' embossed subdials.

#### CRYSTAL

Domed anti-reflective, scratch resistant sapphire crystal.

#### WATER RESISTANCE

Water resistant to 10 ATM, 100 metres.

#### RATINGS

C.O.S.C chronometer tested and certified.

#### STRAP

Embossed alligator with 18 carat rose gold pin buckle.

#### CERTIFICATION

Individually serial numbered with accompanying C.O.S.C certification.

## BREMONT ORACLE I

### FEATURES

#### MOVEMENT

Calibre 13 1/4" BE-36AE automatic chronometer, 25 jewels, Glucydur balance, Anachron balance spring, Nivaflex 1 mainspring, 28,800 bph, 38 hour power reserve, Bremont moulded and skeletonised decorated rotor.

#### FUNCTIONS

Hour/minute/second, date at 3H.

#### CASE

Stainless steel case with sapphire uni-directional rotating bezel and SuperLumiNova® luminous coating. Inner soft iron anti-magnetic Faraday cage to protect movement. Protective patented anti-shock movement mount. Automatic helium escape valve and crown protector. Case diameter 43mm, lug width 22mm.

#### CASE BACK

Stainless steel ORACLE TEAM USA screw-in and decorated case back.

#### DIAL

Metal dial with applied indexes and ORACLE TEAM USA mark. SuperLumiNova® coated indexes and hands.

#### CRYSTAL

Domed anti-reflective, scratch resistant sapphire crystal.

#### WATER RESISTANCE

Water-resistant to 50 ATM, 500 metres.

#### RATINGS

C.O.S.C chronometer tested and certified.

#### STRAP

Integrated red rubber strap and black kevlar style strap with stainless steel pin buckle.

#### CERTIFICATION

Individually serial numbered with accompanying C.O.S.C certification.

## BREMONT ORACLE II

### FEATURES

#### MOVEMENT

Calibre 13 1/4" BE-93-2AE automatic chronometer, 21 jewels, Glucydur balance, Anachron balance spring, Nivaflex 1 mainspring, 28,800 bph, 42 hour power reserve, Bremont moulded and skeletonised decorated rotor.

#### FUNCTIONS

Hour/minute/second, date at 3H. 24H GMT hand.

#### CASE

Satin and polished titanium with uni-directional rotating bezel and SuperLumiNova® luminous coating. Inner soft iron anti-magnetic Faraday cage to protect movement. Protective patented anti-shock movement mount. Automatic helium escape valve and crown protector. Case diameter 43mm, lug width 22mm.

#### CASE BACK

Titanium screw-in and ORACLE TEAM USA decorated case back.

#### DIAL

Metal dial with applied indexes. SuperLumiNova® coated indexes and hands.

#### CRYSTAL

Domed anti-reflective, scratch resistant sapphire crystal.

#### WATER RESISTANCE

Water-resistant to 50 ATM, 500 metres.

#### RATINGS

C.O.S.C chronometer tested and certified.

#### STRAP

Integrated red rubber strap and black kevlar style strap with titanium pin buckle.

#### CERTIFICATION

Individually serial numbered with accompanying C.O.S.C certification.
