kim

Senior .NET Developer

Kim Technologies is an early stage Software-as-a-Service provider of an enterprise Knowledge Management platform that has artificial intelligence capabilities such as neural networks and machine learning, among others, as an integral part of its design.

We are looking for a hands-on .NET developer/architect to join our New Jersey development team. This is a great opportunity for the right individual to grow professionally. You must be a self-starter able to work on own initiative within a small high-caliber team and fast-paced entrepreneurial environment.

Key Responsibilities:

- Extend capability and support cloud-first solution developed in .NET 4.5 / ASP.NET / C#.NET / Entity Framework / SQL / Web API / HTML / CSS / JavaScript / JQuery
- Support production users, debug production related issues, fix and deploy dev, integration, and test through to production
- Other responsibilities and duties as assigned

Requirements:

- 5+ years' experience as a developer (lead developer would be a plus)
- 5+ years' experience with ASP.NET/C#.NET/Entity Framework
- 5+ years' working with SQL Server 2005/2008 and current on 2012/2014
- Solid understanding of object-oriented programming (OOP) and computer science foundations, such as memory management and low-level algorithm performance
- Deep knowledge of the .NET 4.5 Framework, including Visual Studio 2013, C#.NET, ASP.NET, ASMX, SOAP, Web API, Entity Framework, and ADO.NET
- Strong knowledge of software development best practices
- Strong experience designing and working with n-tier architectures (UI, business logic layer, data access layer) along with experience of service-oriented architectures (SOA)
- Ability to design and optimize SQL Server 2008/12/14 stored procedures
- Ability to adapt quickly to an existing and complex environment
- Experience developing one or more of the following: CMS, DMS, BPM, workflow, case management or enterprise search solutions would be helpful but is not required.
- Experience in deep learning, contextual analytics, predictive analytics or expert systems would be helpful, but is not required. But you must have a desire to learn these and related concepts.
- Nice to have experience in responsive UI, localization and globalization
- Passionate about building high-quality software using best practices
- Candidate should be self-motivated, independent, detail oriented, responsible team-player and exhibit exceptional relationship management skills

Third Party Agencies need not apply.
