

PREMiTEC

Simple Production Solutions

Pneumatic Die Lifters

A simple solution to lifting and moving heavy loads throughout the manufacturing process.

Widely used on presses and machine tools within the automotive, white goods and heavy manufacturing industries and available as BALL ACTION for multi-directional movement (main picture) and ROLLER ACTION for linear movement (inset below).

Benefits of Pneumatic Die Lifters:-

- Choice of movement
Ball Action – for multi directional movement
Roller Action – for linear movement
- Simple and fast to connect
- Easy installation in existing T slots
- Low initial cost
- Minimal maintenance / reduced down time
- Long life

Our Pneumatic Die Lifters:-

Die Lifter	Maximum Lift Capacity / Metre
T22	1,300kg
T28	1,700kg

Die Lifters from 250mm up to 2,400mm in length

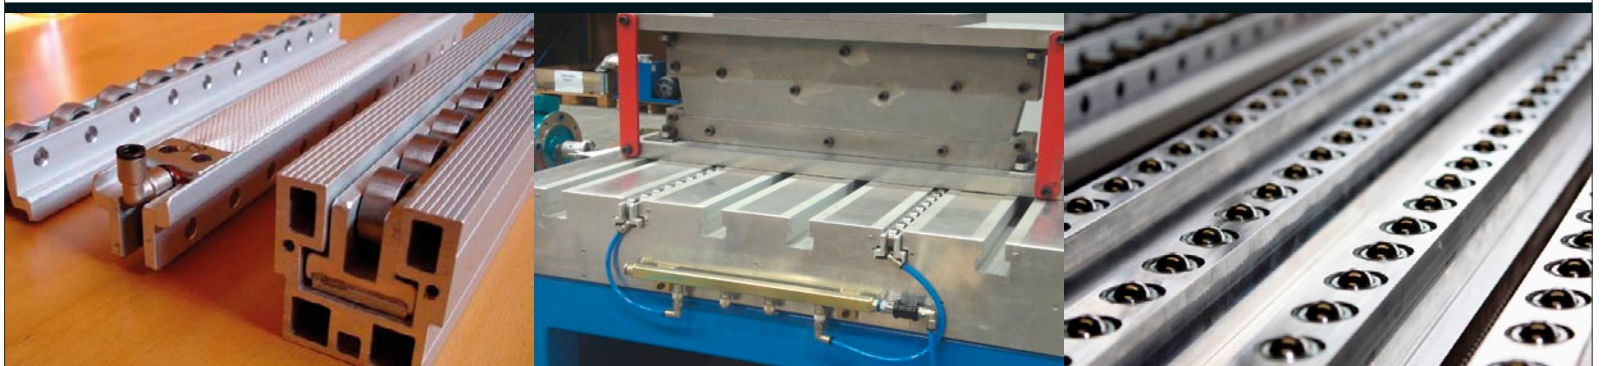

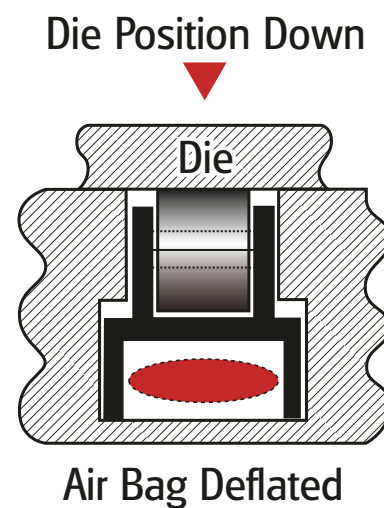

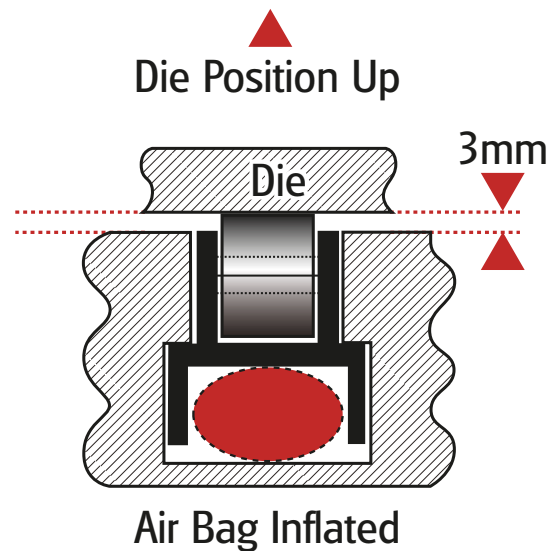

Our customers include:-

- Denso Manufacturing
- Siemens
- Jaguar Cars, Halewood
- BAe Systems
- Rangemaster Sinks
- GKN Autostructures
- Indesit
- Calsonic
- The Royal Mint
- Crosslee – tumble dryers
- Strix
- Mi-King
