TELE**RADIOLOGY**

acetiam

Teleradiology services for public and private healthcare facilities.

BENEFITS

- Specific Teleradiology forms adapted to your medical needs (CT for Scans, MR for MRI CR for X-rays)
- Healthcare duty planning, scheduling, invoicing and management
- Diagnostic quality medical imaging web viewer for immediate (streaming) access to exams
- Training and support of X-ray technicians by Acetiam project managers

Acetiam Connect allows medical professionals and physicians to obtain and provide remote radiology diagnosis by sharing patients EHR documents, images and videos.

HEALTHCARE FACILITIES :
Quickly and securely obtain diagnoses from your community of teleradiologists by leveraging the Acetiam Connect customizable platform. Share patient data and images such as X-Rays and MRIs, obtain second opinions, and receive a diagnosis without the radiologist at the patient's side.

RADIOLOGISTS :
View patients' medical images and data to provide a diagnosis remotely and efficiently. Acetiam Connect also helps you manage many aspects of teleradiology activity, from duty planning to invoicing.

Medical imaging advanced features: 3D renderings, PET Fusion, MPR, MIP, annotations
