

MODAS Mobile

MODAS Mobile – a powerful smartphone application that is designed to be your go-anywhere companion. MODAS Mobile is fully integrated with your CAD system and other MODAS Professional users, enabling the officer to be operationally aware of what’s happening on the incident ground in real time.

MODAS Mobile brings you the power of a fully integrated mobile data solution at the heart of the incident.

Greater efficiency

- Faster response time to incidents
- Location based information to facilitate allocation of resources
- Reduce stress within the control room with an integrated mobile data solution

Enhanced Safety

- Officers interact directly with the CAD or other resources in their moments of decisions
- Real time location of on-call officers
- Member of the incident group they’re attached to thus party to all messaging
- Emergency button

Easy to use

- Intuitively simple and convenient to use
- Requires minimal training by utilising modern usability requirements
- Touch screen interface designed specifically for operational crews

Lower cost of ownership

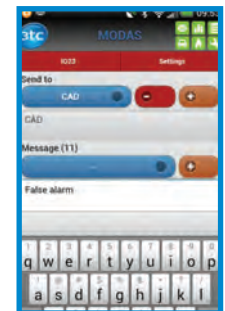

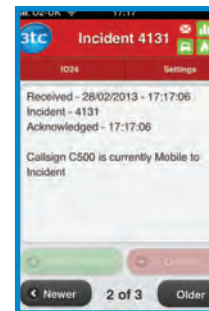

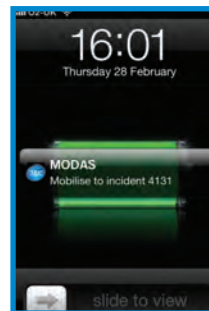

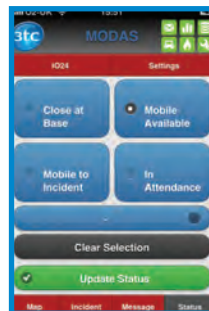

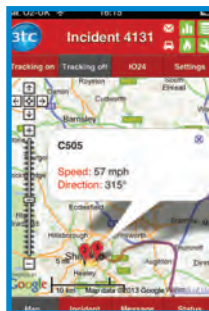

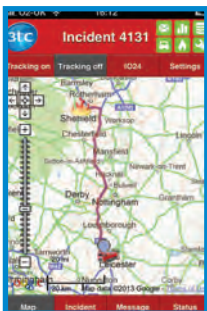

- Change management is centrally administered allowing changes to be distributed rapidly and safely
- Seamless integration with the CAD system
- Seamless integration the other MODAS systems and Users

Commercial Communications bearers supported

- Multi bearer support to provide robust and flexible end to end messaging demanded by FRS’s (3G/4G/WiFi).

Secure

- Communications traffic is secured using SSL
- Mobile Apps Gateway installed in the DMZ of the FRS network
- Secure logon to the MODAS Mobile Apps Gateway

Mission Critical Software

Delivering software solutions which, through our customers, make a **positive difference** to people’s lives.

Risk Critical Information

- Access to all your operational intelligence at the touch of a button via MODAS Web

Faster Response

- Push notifications supported for Apple and Android devices
- Decision making during emergency situations is quick and effective
- Shared location based information (AVL) to enhance the decision making

process within the CAD environment and within the organisation as a whole

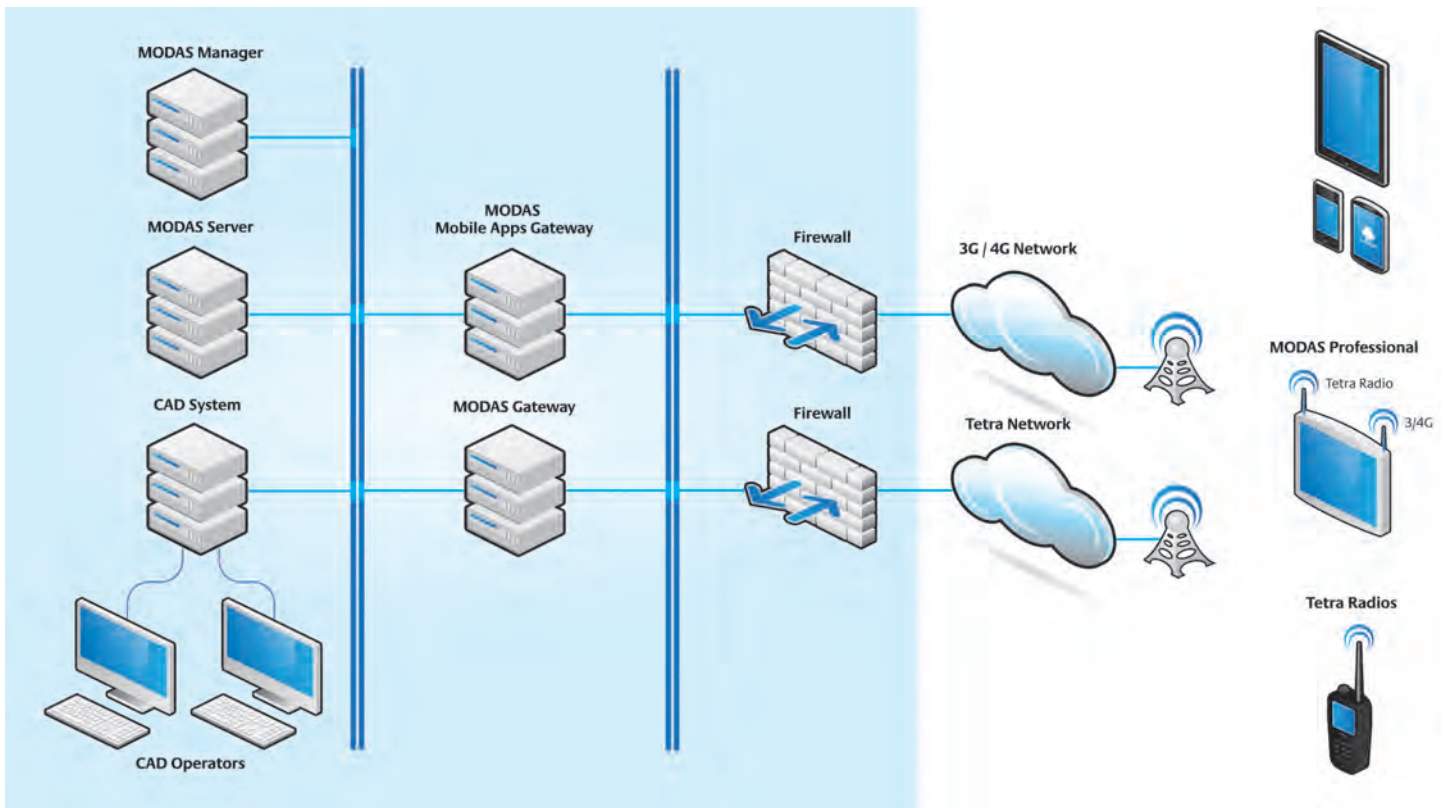

- Integrated mapping showing the incident location, route and location of other attending resources.
- Intuitive user interface
- Fully auditable to ensure the officer and the organisation are fully protected

- Integrated with Fire Service GD-92 protocol
- Store and forward messaging
- Message relay for enhanced situational awareness such as AVL, Cordon, RVP relay and incident updates
- Robust Communication utilising high level message acknowledgements

Flexible Communications

- Supports the full repertoire of fire service messages

MODAS Solution

Mobile Computing Platform System Requirements

To successfully install and run MODAS Professional software, your system must meet the minimum hardware requirements:

- Apple iPhone, iPad (IOS 5.x, 6.x)
- Android device (2.x, 4.x)
