

rainwear&highvisibility

With more than 100 years of experience, Portwest is firmly established as a leader in the design and manufacture of stylish, comfortable, high quality rainwear and high visibility products that meet recognised international standards.

Portwest has distribution throughout Europe supported by warehouses in Ireland, United Kingdom and Central Europe. This ensures our unique rainwear and high visibility ranges protect people all over the world in many diverse industries and situations.

Welcome

At Portwest we listen carefully to our customers and continuously strive to originate better workwear.

Our experience results in a range of rainwear and high visibility that provides professionals with on-the-job comfort, protection and functionality all underpinned by Portwest's Product Promise of better quality, service and value.

BETTER QUALITY. Quality matters and our team of designers understand this.

They know the daily requirements expected from workwear and that the right choice of material is crucial to a given task no matter what the season. Our garment technologists control the production process. They design and test new materials as well as developing function and design, which means you will always have a Portwest product fit for purpose.

BETTER SERVICE. Our friendly and efficient sales team is supported by distribution centres in Ireland, United Kingdom and Central Europe. So you can always be assured of a quick and efficient response. You can also order online 24/7 and search and monitor current stock levels on www.portwest.info (password required).

BETTER VALUE. Portwest guarantees value for money. From our extensive range of quality rainwear and high visibility products to our efficient customer service and prompt delivery through to the final invoice, you can be assured of our commitment to delivering better value for our customers. Indeed, Portwest has consistently reduced prices over the last seven years and we now provide better value than ever.

Reference Guide

Key Fabrics

600D FABRIC

Constructed from 100% Polyester with a PU coating, this 600 Denier Oxford weave fabric is made up of strong filament yarns. This guarantees a heavy durable fabric suitable for the most demanding work environments. Weight 220g.

Rip Stop (RS) FABRIC

Made from 100% Polyester, PVC coated with a Rip Stop (RS) pattern. This results in an extremely strong yarn to stop the fabric tearing without the penalty of a heavier cloth. Weight 260g and 250g.

High Visibility Workwear FABRIC

Portwest's superior high visibility workwear garments deliver enhanced comfort and protection. Constructed from 80% Polyester and 20% Cotton with a satin weave and Texpel stain resistant finish. Weight 280g.

SEALTEX ULTRA FABRIC

Portwest's Sealtex Ultra is a breathable PU coated fabric on a pliable 100% Polyester tricot knit base fabric. Weight 185g. Seams are high frequency welded to guarantee a waterproof garment.

COLD STORE PORTWEST FABRIC

Made from 100% Polyester breathable Oxford fabric. ColdStore fabric is abrasion resistant and has a Texpel stain and water resistant finish, ensuring it stays cleaner for longer. Weight 190g.

SEALTEX FABRIC

Portwest's Sealtex fabric is 100% Polyester tricot knit with a PU coating. This durable, stretchable fabric is tear resistant, anti-fungal, oil, fat, diesel and grease resistant and can be easily wiped clean. All garments are finished with high frequency welded seams ensuring maximum water-resistance. Weight 200g.

Flame Retardant FABRIC

The Flamesafe Jacket is made from EN 531 Flame Retardant 100% Nylon with a PU coating. Weight 140g.

HiVisTex

HiVisTex Silver Retro Reflective tape is the ultimate reflective tape. Fully certified to EN 471, HiVisTex gives a superior performance in all weather conditions.

HiVisTex INDUSTRIAL WASH

HiVisTex Industrial Wash tape is extremely durable. Fully certified to EN 471 and certified for up to 60 industrial wash cycles.

Texpel

Texpel is a durable, stain repellent finish which protects against everyday spills without changing the feel or comfort of the fabric. Liquids bead up and roll off the garment and spills can be quickly cleaned up. It also makes the garment showerproof and is highly breathable.

Symbols

Carton

This symbol indicates how many products are packed per carton. All Portwest products are sold one size and one colour per carton.

Retail Merchandised Bag

This packaging aids product presentation for retail sales. All other styles are packed in flat-pack plastic bags to keep items clean. All products have barcodes. Ask the sales team for more information.

Mobile Phone Pocket

A mobile phone pocket is included in the garments which carry this symbol.

Taped Seams

This symbol indicates that the garment has taped waterproof seams.

Welded Seams

This symbol indicates that the garment has high frequency welded waterproof seams.

Print Access

This symbol indicates that garments have print / embroidery access.

Reversible Garment

This symbol indicates that garments are reversible.

Interactive Zip

Simply zip-in fleece to create a one-piece garment for all products that carry this symbol.

EN 340 - GARMENT SIZING

All Portwest garments are labelled in accordance with EN 340. This is the harmonised European standard that specifies the general requirements for the sizing and marking of protective clothing.

The measurement on the label is for the wearers body size and not the finished measurement of the garment. Portwest take the greatest care to ensure there is uniform sizing throughout the entire range of garments.

NOTE: Many of the following styles and features are registered designs by Portwest and cannot be infringed or copied by any person or company.

EN Standards

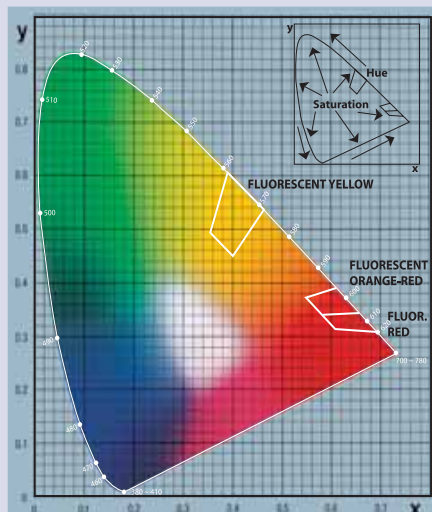

EN 471 – Quality Guaranteed

The cornerstone of Portwest's success has always been its stringent quality control. **Can you be sure the product you are wearing conforms to EN 471?** A certificate from a test house guarantees that the garment or fabric sent to the test house has attained the EN 471 standard. It is not a guarantee that the bulk production meets the standard. Therefore, Portwest check every roll of fabric and reflective tape with highly specialised equipment which guarantees all production from Portwest achieves the EN 471 standard. Portwest is committed to supplying our customers with continued and consistent high standards.

Fabric Testing

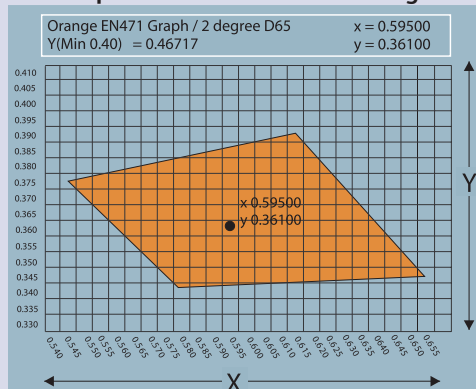

In the Portwest quality control laboratory we use the Minolta spectrophotometer to check every roll of fabric. This guarantees that the fabric used is fully compliant to the EN 471 standard.

The Spectrophotometer is used to check if the colour of the fabric conforms to EN 471:2003 standard.

This graph displays the CIE 1931 X,Y chromaticity diagram which defines a colour space for graphing colour.

Close-up view of Fluorescent Orange

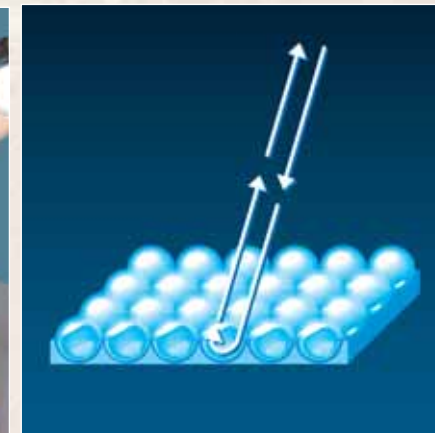

This graph shows an enlarged view of the Orange EN 471 colour range. The colour co-ordinates marked on the graph are a reading from the Portwest fluorescent orange fabric. This reading is taken using the Minolta Spectrophotometer.

Reflective Tape Testing

Portwest takes pride in assuring customers that the HiVisTex retro reflective tape used is of the highest quality and fully compliant to EN 471 standard. HiVisTex gives superior performance in all weather conditions. Every roll of reflective tape is tested separately to ensure that it meets the EN 471 standard.

Retroreflectometer for checking performance of retroreflective tape.

HiVisTex Reflective Tape has thousands of glass beads every CM2 - working as thousands of tiny mirrors, reflecting light back towards its source as a brilliant white glow.

EN 471:2003 - HIGH VISIBILITY

EN 471 is the harmonised European standard for high visibility clothing. It specifies the requirements for signalling the users presence day or night. It intends to make users in hazardous situations conspicuous under any light conditions.

The standard provides for two performance parameters:

EN 471

X = Surface of fluorescent and retro-reflective material (3 levels)
Y = Quality of the retro-reflecting materials (2 levels)

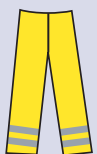

Class 3: Highest Level

Highest level of protection - required for any persons working on or near motorways or dual-carriage ways or airports. Must incorporate a minimum of 0.80m² of background material and 0.20m² of retro-reflective materials.
(4 metres of 5cm wide reflective tape)

Class 2: Intermediate Level

Required for any persons working on or near A and B class roads, also for delivery drivers. Must incorporate a minimum of 0.50m² of background material and 0.13m² of retro-reflective material.
(2.60 metres of 5cm wide reflective tape)

Class 1: Minimum Level

Minimum level of protection required for any persons working on a private road or to be used in conjunction with a higher classed garment. Must incorporate a minimum of 0.14m² of background material and 0.10m² of retro-reflective material.
(2 metres of 5cm wide reflective tape)

EN 343 - FOUL WEATHER PROTECTION

EN 343 is the harmonised European standard that applies to garments worn in adverse weather conditions. It specifies the characteristics of protective clothing against the influence of foul weather, wind and cool above - 5°C.

The standard provides for two performance parameters:

EN 343

X = Waterproofness (3 levels)
Y = Breathable properties (3 levels)

GO/RT 3279 - RAIL INDUSTRY STANDARD

Railway Group Standard sets out the minimum specification for high visibility warning clothing in the Rail Industry.

EN 510 - ANTI-ENTANGLEMENT

EN 510

This standard specifies the properties of protective clothing that minimise the risk of its entanglement or drawing-in by moving parts when the wearer is working on or near hazardous moving machines or devices.

EN 342 - PROTECTION AGAINST COLD

EN 342

EN 342 is the harmonised European standard that specifies requirements and test methods for performance of clothing ensembles (ie. two piece suits or coveralls) and of single garments for protection against cold environment.

EN 531 - PROTECTION AGAINST HEAT AND FLAME

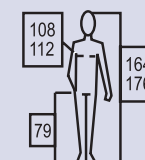

EN 531

EN 531 is the harmonised European standard for protective clothing for industrial workers exposed to heat (excluding firefighters' and welders' clothing). The following categorisation states performance levels:

- A - limited flame spread
- B - protection against convective heat
- C - protection against radiant heat
- D - protection against molten aluminium splash
- E - protection against molten iron splash

EN 340 - PROTECTIVE CLOTHING - GENERAL REQUIREMENTS

This European standard specifies general performance requirements for ergonomics, innocuousness, size designation, ageing, compatibility and marking of protective clothing and the information to be supplied by the manufacturer with the protective clothing.

EN 1150 - PROTECTIVE CLOTHING

This European standard specifies the optical performance requirements for high visibility clothing to be worn by adults and by juveniles, and designed for non-professional use.

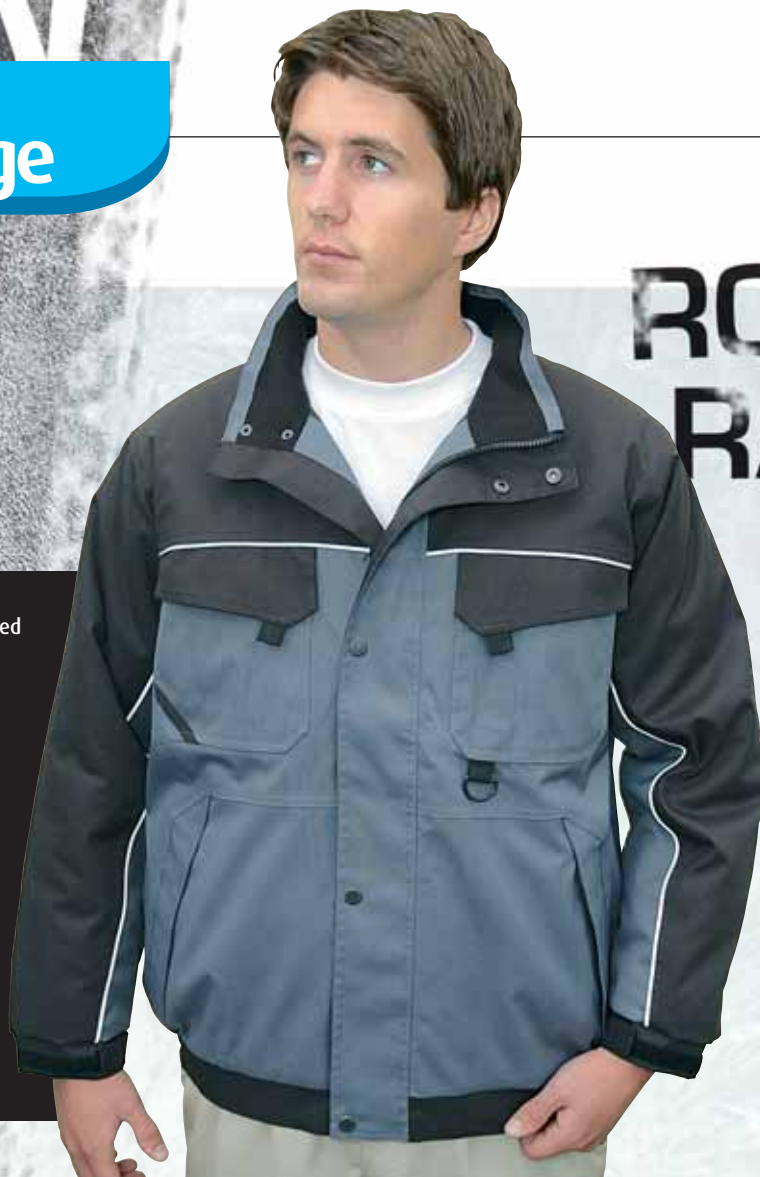

600D Range

ROBUST RANGE

Portwest's new technologically advanced 600D range has been designed and developed to deliver a durable hardwearing garment. On-the-job comfort is equally as important. The range includes both one colour and two-tone styles to suit all tastes and work requirements.

600D Fabric

Constructed from 100% Polyester with a PU coating, this 600 Denier Oxford weave fabric is made up of strong filament yarns. This guarantees a heavy durable fabric suitable for the most demanding work environments. Weight 220g.

PROTECTION IN THE MOST HOSTILE CONDITIONS

All Portwest ColdStore styles are certified to EN 342 standard for Coldstore Clothing and are CE marked accordingly. These stylish, practical designs include reflective strips, which gives greater visibility thus improving the safety of the wearer. The garments guarantee to cover chill (2 to minus 5°C) through to cold store (minus 25°C) to deep freeze (minus 40°C).

CS10: Cold-Store Jacket

Certified EN 342, Class 1

Lined attached hood concealed under collar with drawstring. Fleece-lined collar for extra warmth. Reflective strips front and back for high visibility. Extended cuffs with opening for glove effect. Storm flap with Velcro fastening. Mobile phone pocket under storm flap. Drawcord waist. Heavy duty front zip. Two lower pockets with zip and Velcro. Chest pocket with clear ID pocket.

Fabric: 100% breathable Polyester, Oxford weave, with a stain resistant finish, 190g

Lining: Nylon with a Thermal 300g Interlining

Colour: Navy

Sizes: S - 3XL

ColdStore Fabric

At Portwest we use high specification 100% breathable Polyester, Oxford weave, 190g. The fabric is abrasion resistant and has a Texpel stain and water resistant finish. This means it stays cleaner for longer. For the inner layer we use a 300g Polyester wadding which provides excellent insulation and retains its properties after washing. These fabrics combine properties that will meet all your coldstore clothing requirements: protection against the cold, excellent heat retention and outstanding breathability qualities.

REFLECTIVE TAPE FOR IMPROVED SAFETY

CS12: Cold-Store Coverall

Certified EN 342, Class 1

Lined attached hood concealed under collar with drawstring. Fleece lined collar for extra warmth. Reflective strips on front and back for high visibility.
