Kim Technologies appoints EMEA Customer Director
to support rapid expansion

Kim Technologies today announces the appointment of **Chris Clarke** as **Customer Director - EMEA.**

Chris brings with her over 20 years' experience in senior leadership roles most recently as CEO of AdviserPlus, a leading provider of HR managed services, technology and data solutions (www.adviserplus.com). In her role at AdviserPlus Chris worked with customers from all sectors including banking, telecoms, utilities and transportation and led the successful sale of the company to private equity.

Chris's appointment follows the appointment last week of **Ammar Zuriki** as S**oftware Delivery Director** (https://kim.world/AmmarZuriki). On the appointment of Ammar, **Richard Yawn, CTO** of Kim Technologies, said that the Kim team will double in size over the next 12 months to support its global customers and channel partners during a period of significant growth and investment in the company.

Andy Daws, Chief Customer Officer, Kim Technologies says *'We are thrilled that Chris is joining us. We have known Chris for many years and she brings with her a wealth of experience to support our EMEA customers and channel partners. Throughout her career Chris has grown a number of businesses and we look forward to her help in the next stage of the Kim journey.'*

Chris Clarke says *'I am delighted to join Kim at such an exciting time. The business has been growing rapidly and winning clients across EMEA and I look forward to building a team to support existing and new customers so that they get maximum value from the Kim Platform.'*

Kim v10.0 was released in September 2019 and combines the dynamic case management, automation and no-code configurability of Kim, with the Microsoft Word universal interface and the security and scalability of Microsoft Azure; all the functionality of Kim without leaving Microsoft Word. In April 2020 Kim v10.1 will be released. This release will extend the seamless integration of Kim with Microsoft Word, Office and Office 365.

Notes to Editors

1. Kim was established by Richard Yawn in September 2013 and is a cloud-first, no-code, configurable multi-tenant case management and workflow and document generation and automation platform applicable to all functions and sectors. View the story of Kim here - https://kim.world/KimStory

2. Customers configure Kim to combine intake management, work allocation (internally or externally), self-service, document automation, creation and negotiation, dynamic case management, escalation and supervision, approval process and e-signature. All cases and documents are held in one repository in Kim and are fully searchable. Configurable live and trend dashboards support all these activities.

3. In September 2010 Kim launched Kim 10.0, all the functionality of Kim without leaving Microsoft Word and Office365 - Kim 10.0: https://kim.world/Kimv10 All the functionality of Kim without leaving Microsoft Word / Office: https://kim.world/Kimv10Demo

 4. Kim has a three-tiered model that enables integration with other enterprise-wide systems and point solutions (from Office365 through Salesforce to DocuSign). This three-tiered model combines (i) configuration, (ii) APIs and (iii) Dell Boomi.

5. Microsoft Word, Microsoft Azure and Microsoft Office and Office 365 are registered trademarks of Microsoft Corporation.
