

# RollMatic TDL

The cost-effective roller garage door version with tubular drive

The RollMatic TDL roller garage door creates more room in front of and inside the garage. It is available in 11 stylish colours and three Decopaint surface finishes.

The space advantage: the door construction incl. standard curtain cover requires very limited fitting space.

The convenience advantage: the tubular operator with emergency crank handle as standard is conveniently operated via a hand transmitter with rolling code radio 433 MHz.

The safety advantage: an opto-sensor in the floor seal offers reliable protection. It monitors the closing edge acc. to DIN EN 13241-1.

## Harmonious overall appearance

The exterior of the RollMatic TDL rolling shutter is distinguished by a balanced clear look. This is primarily due to the evenly ribbed profiles. All coloured doors come with the side guides, fascia panel and the shaft cover matching the colour of the curtain. For Decopaint, the side guides, fascia panel and shaft cover are supplied in the base colour of the door curtain.

## Overview of benefits

- particularly space-saving tubular operator with emergency manual gear
- compact door design with only 290 mm required headroom and only 75 mm sideroom.
