

## Sips UK | House Case Study

Residential ■ Commercial ■ New House Builds ■ Extensions ■ Garage/Annex ■ Leisure ■ Roofs

## Architect/Main Contractor/Client

Julien Payne

## Site Location

Worplesdon, Surrey

## Project Type

Self Build

## Build Cost

£40,000

## Services

- Sips UK were tasked with supplying and erecting the house using our Structurally Insulated Panels (SIPs) for the walls and roof of the building. The design of the property presented a number of technical issues, the main one being how to support the roof given the lack of internal height to the first floor and not being able to use downstand purlins.
- Our design team solved the problem by supplying and fitting a steel portal frame that the SIPs were then able to fit around.
