

SILOTANK

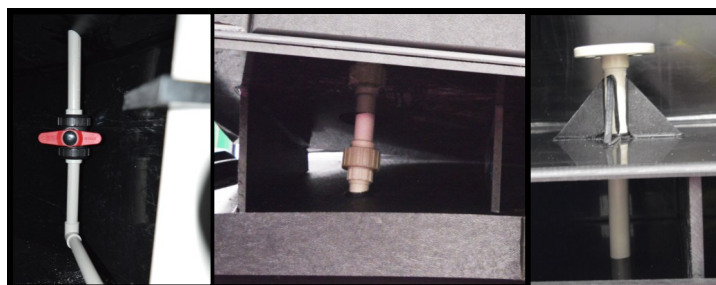

Dosing Kiosks

Silotank manufacture a range of chemically resistant kiosks from Polypropylene. Our kiosks are built to customer specifications and come standard with stainless steel hinges, aluminium side vents and barrel lock on a double door. Designed primarily for installing chemical dosing pumps they can be used for many applications within the water, waste water, pharmaceutical, petrochemical and food industries.

When incorporated with one of our minitank ranges the kiosk can be placed above the bund to allow for the pipe work to be kept within the bund area and also allow for a return to bund drain.

Options:

- Sight glass on door
- Pump shelf
- Integrated bund Drain
- Internal Pipe work in bund
- Control Back boards
