

metroSTOR PTM Outdoor Storage Units

metroSTOR Outdoor Storage Products

Specified across a broad range of sectors from facilities departments to social housing; metroSTOR PTL, PTM and PTH provide flexible, tough outdoor storage unit systems for equipment and belongings. Neatly styled with custom wall panel and roof type options, metroSTOR Outdoor Storage Units can be specified to complement the surrounding architectural fabric and enable the creation of uniform street furniture across a development.

With a brief to obviate the requirement for traditional costly and difficult to procure purpose-built storage on site, metroSTOR lockers, units and buildings available as efficient, all-inclusive packages; are fast becoming firm favourites for specifiers, housing managers and contractors across the UK.

metroSTOR PTM Outdoor Storage Units

metroSTOR PTM offers secure and easily accessible storage space with a full height access door to each individual compartment. Linear in design format for location in narrow spaces such as along pathways and close to buildings, metroSTOR PTM is ideally suited to residential schemes as a configurable system that optimises multi-purpose outdoor storage requirements in a neat and unobtrusive way. metroSTOR PTM is the solution to help ensure the safety of residents and their belongings with communal areas that can be maintained clear of obstructions and any combustible items at all times.

There is a flexibility central to metroSTOR PTM product design that means that you can specify locker units to suit project specific requirements, with two standard depths at 1200mm and 1800mm, two standard widths at 1050mm and 1250mm and any number of modules from a single unit upwards, including stepped arrangements for sloping sites. All units are available as CAD blocks / BIM models for ease of planning and site layout design.

This highly flexible specification extends to a class leading choice of panel types, finishes, access systems and roof options, enabling metroSTOR PTM Outdoor Storage Units to add a welcome architectural impact to the scheme in addition to fulfilling the practical storage function. Our integrated design model extends to the proven WILD® greenroof system, underscoring a commitment to championing the environment and its fragile ecosystems.

Flexible Design

A choice of 4 product series to optimise storage type and available footprint. Multiple units can be added in linear format in accordance with requirements.

Configurable Specification

metroSTOR PTM product design allows for greenroof to be specified from standard design. Integral galvanised steel shelving units can be fitted to accommodate the intended storage items.

Cladding & Finishes

metroSTOR PTM panel module cladding can be specified from a broad range of standard finishes.

Access Options

The highly configurable lockcase accommodates lock only and deadlock with key management options and also mechanical or powered keypad access.

Adjustable Base Design

Unique adjustable plinth enables metroSTOR PTM units to be installed in uniform line and level without costly groundworks.

Secure Design

Fully welded steel frame with security fixings ensures possessions secured inside cannot be removed even if panel integrity is compromised by attempted theft.

Fire Safety

metroSTOR products can be specified to meet relevant fire risk assessment criteria. Our fire retardant options for TGV and sheet type cladding have a Fireboard MgO internal liner with either treated SW timber, HDPE 100% recycled plastic or coated steel panel outer to provide Euro-class A1, UK class 0 reaction to fire. The panels are manufactured from materials of limited combustibility throughout to provide 30 minutes fire resistance to BS 476. Where fire retardant properties are required for an open-spaced cladding type, SE timber plank can be specified with an HR Prof treatment process providing a Euro-class B, UK class 0 Reaction to Fire classification

metroSTOR is the leading outdoor storage system for today's built environment, delivering social, economic and environmental value. Combining superb aesthetics with durability for the toughest environments, metroSTOR offers a configurable, modular product system to comprehensively address the challenges of outdoor storage; from waste and recycling bins, mobility scooters and cycles to household items, site equipment and service plant enclosures.

Mobility Scooters

metroSTOR PSL, PSM and PSH provide space-efficient, mobility scooter storage with user-friendly integral battery charging, making for safer communal areas while helping users to maintain their independence.

Waste & Recycling

metroSTOR PBL, PBM, PBE, PBC and PBH products help control waste-streams with robust enclosures and stores for all standard bin sizes. Their smart appearance and unobtrusive physical profile enable recycling centres to be located in spaces that may not have previously been considered.

Household Items & Site Storage

metroSTOR PTL, PTM and PTH are tough, versatile products providing attractive, secure storage for equipment and bulky items in an unobtrusive design. Highly configurable for capacity, layout, access, security and finishes, the proven modular system makes for ease of specification.

Cycles & Motorcycles

metroSTOR PCL, PCM and PCH for custom cycle parking solutions with the efficiency of modular build from transit shelters to cycle hubs. Stands, racks and carousels can all be specified with a number of options available for roofing, enclosure and layout type, finishes and access control.

Service Plant & Industrial

metroSTOR Custom Build is driven by the inherent design flexibility of our products, working in partnership with client input informing the design process. This enables the development and delivery of effective solutions, achieving a consistent design aesthetic.
