STANDARDS

Standards mean everything to K&L Ross. From the rigorous compliance, testing and product performance standards demanded by end users working in hostile environments, to the customer service standards on which we pride ourselves, these are the cornerstones of our success.

Our goal is simple. We want to ensure that each customer receives the best products for their needs, whilst experiencing the very highest quality of service we can offer, from initial enquiry to final delivery. Our £4.5m stockholding is a serious declaration of our intent in meeting customer demands, and as part of the Red Wing Shoe Company, we enjoy the benefits of global supply sourcing and significant market place clout.

We are accredited to ISO 9001, ISO 14001 and OHSAS 18001, and are proud of our FPAL Verify profile, but mere adherence to these standards is not enough. The KLR team are committed to achieving excellence throughout our business and each of us is challenged to look for improvement opportunities in all that we do, whatever our contribution.

HEAD PROTECTION

MSA Linesman Hard Hat

Peakless linesman's hard hat is made from ABS plastic. For use when unrestricted upward vision is required - i.e. scaffolders, overhead cable work and confined spaces.

Manufacturer: MSA

MSA 3-Point Chin Strap

This particular chinstrap has 3 points and is only suitable for use with Fast-Trac suspensions. It is made of nylon webbing. The V-Gard chinstraps are compatible with the V-Gard helmets and are ideal for working at heights or in windy conditions due to the stability the helmet brings. Another beneficial feature is that the V-Gard chinstraps are designed to release from the helmet to avoid snagging and strangulation.

Manufacturer: MSA
Size: One size
Stock Code: 010218848
Colour: Black

Elasticated Chinstrap for MSA Hats

Durable, elasticated, adjustable chinstrap.

Manufacturer: MSA
Size: One size
Stock Code: 010STRAP
Colour: Black

Petzl VERTEX A10 Peakless Hard Hat

Peakless helmet for work at height and industry. Six-point mesh liner conforms to the shape of the head for improved comfort. Shock absorption achieved through deformation of the outer shell. CenterFit adjustment system ensures centring and optimal stability of the helmet on the head. Chin strap designed to limit risk of losing helmet during a fall (strength greater than 50 daN). The helmet's unventilated shell protects against electrical hazards and molten metal splash.

Manufacturer: Petzl
Size: One size
EN Standard: 397 / 12492 / 50365
Stock Code: 010A1606
Colour: Yellow

Howard Leight LS500 Earplug Dispenser. Made from heavy duty anodised aluminium and designed for wall mounting. The system dispenses ear plugs with a simple turn of the handle. Holds 500 pairs of Howard Leight disposable ear plugs. Plugs sold separately.

Manufacturer: Howard Leight
Size: One size
Stock Code: 035LS500
Colour: Blue

Moldex Pura-Fit 7700 Ear Plugs

Moldex 7700 Pura-Fit ear plugs are tapered so are easier to insert in any size ear canal. Designed for increased compliance and fewer complaints, the special foam is formulated for softness and comfort, and the outer surface is smooth, so it doesn't irritate the ear canal. SNR 34.

Manufacturer: Moldex
Size: 200 pairs per box
EN Standard: 352-2
Stock Code: 0367700
Colour: Green

Moldex 7800 Spark Plugs Soft Ear Plugs

Moldex Spark Plugs are available packed in 200 pair boxes. Each pair of plugs is individually pre packed in paper envelopes for ease of dispensing and hygiene purposes. Contoured shape helps anchor the plug within the ear canal, preventing the need for constant adjustment and possible cross contamination. SNR 35.

Manufacturer: Moldex
Size: 200 pairs per box
EN Standard: 352-2
Stock Code: 0367800
Colour: Various

Scott Safety Z1HME - Zone 1 Clip-On Ear Defenders

ZONE 1 for environments with low to medium noise levels. Zone helmet mounted ear defenders are suitable for environments that require the use of head protection in combination with hearing protection, such as construction, forestry, oil and gas and heavy industry. Zone helmet mounted ear defenders can be simply converted into a head, face and hearing protection combination utilising the universal 30 mm attachment post fitted as standard. Standby and parked positions allow the product to 'stand off the head' ready for use or to park the ear defender out of the way on the rear of the helmet when not in use. SNR 27.

Manufacturer: Scott Safety
Size: One size
EN Standard: 352-3

Bolle Cobra Safety Spectacles with Foam

The essential all-rounder with a panoramic visual field. Wrap-around fit without any visual interference, Cobra offers 180° vision and perfect optical quality. The option of swapping the temples for an adjustable strap and foam edge means Cobra is a highly versatile model. The anti-fog coating allows you to work in optimal conditions by removing the effect of condensation that occurs when there are large temperature differences or when wearing non-ventilated frames. The anti-scratch coating acts as a shield that improves the resistance of lenses and reduces the formation of scratches. It lengthens the life of the lens and improves user comfort, preventing any scratches that could impair vision.

Manufacturer: Bolle

Uvex Carbonvision 9307 Safety Goggles

The intelligent use of ultra-modern materials and manufacturing technologies enables Uvex to design frames which combine reduced size/volume and high mechanical resistance. Uvex Carbonvision 9307 safety goggles provides the wearer with unparalleled comfort levels despite the very high level of mechanical stability. The TPU layer is permanently fixed to the frame, ensuring a perfect individual fit and it's easy to clean and maintain. The Uvex Carbonvision 9307 safety goggles, weighing just 46 gr is undoubtedly one of the lightest wide-vision safety goggles on the market, enabling the wearer to work for longer periods without the distractions and problems caused by discomfort, thereby increasing his or her productivity.

Browguard IB2000 Interchange

The Interchange IB2000 browguard offers the perfect balance of comfort, protection, stylish aesthetics and ease of use. Comfort is optimised through use of a high quality and absorbent Terry Towelling sweatband, which removes sweat and provides wearer comfort without skin irritation. IB2000 features a wide adjusting ratchet headgear to deliver an individual fit and also utilises a foam comfort pad to cradle the head without excessive pressure. The IB2000 in combination with the extensive Interchange visor range protects against impact, splash or heat hazards; shielding the front and top sections of the head as well as the eyes and face. The IB2000 promotes wearer acceptance through its stylish visual aesthetic. Its uniquely designed flexible hammer-head clips make the fitting and removal of visors both quick and intuitive.

Please note, this browguard does not come complete with Face Shield - this must be ordered separately.

Manufacturer: Scott Safety
Size: One size
Stock Code: 023IB2000
Colour: Black

Protector KF010 Nylon Helmet Visor Carrier

The KF visor system offers a lightweight compact alternative to the Interchange range and is popular in certain industrial and forestry applications. Best suited with Scott Safety's Style 300 and Style 600 safety helmets and modern peaked helmets.

Uvex 9963 moist, silicone free cleaning tissues are individually sealed and fit Uvex 9990 cleaning station.

Manufacturer: Uvex
Size: 100 per pack
Stock Code: 0249963

RESPIRATORY PROTECTION

Mask & Filter Chart

Selecting and specifying the appropriate respiratory protective equipment can seem daunting with so many factors to consider. However, with our simple selection process, it's easy to make sure the disposable respirator you choose is offering the correct levels of protection and comfort required by your employees.

Our respirators are classified in the following three categories:

Premium	Our top of the range respirator . The Premium series of 3M respirators offers advanced features including a lightweight, cup-shaped off-the-face design, providing excellent wearer comfort as well as maximum protection. Cool Flow™ valved and with effective protection against dust, mist and metal fumes, this superior series is available in FFP2 and FFP3.
Comfort	Our 'built for comfort' respirator . Available in cup-shaped and fold flat designs, the comfort series sets the benchmark in wearer comfort. With effective protection against dust and mist as standard, and additional metal fume protection from the FFP3 product, the Comfort range is a popular choice both Cool Flow™ valved and unvalved. Available in FFP1, FFP2 and FFP3, for a comfortable wear to suit all your respirator needs.
Classic	Our most affordable respirator . The Classic series of cup-shaped and flat fold respirators offers simple and effective protection against dust and mist. Cost effective Classic respirators are available unvalved or with Cool Flow™ valve incorporated. Available in FFP1 and FFP2 to suit all your basic respirator needs.

Which protection factor suits your needs?

	Protection Factor	Typical Applications	Easy Identification
FFP1 Respirators	APF 4	Low level fine dust/oil or water based mists (hand sanding, drilling and cutting)	Identified by YELLOW straps or noseclip
FFP2 Respirators	APF 10	Moderate level fine dust/oil or water based mists (plastering, cement, sanding and wood dust)	Identified by BLUE straps, noseclip or valve lettering
FFP3 Respirators	APF 20	Higher level fine dust/oil or water based mists (hazardous pharmaceutical powders, biological agents and fibres)	Identified by RED straps, noseclip or valve lettering
Welding Fume Series	APF 10	Lightweight and comfortable, the welding respirators offer FFP2 protection against dust, mist, metal fumes and ozone. Available in a soft faceseal and all variants come with 3M Cool Flow™ valve for a more comfortable wear.	3M Welding Respirators provide FFP2 protection which is easy to recognise by the BLUE valve lettering.

Classification explained: APF = Assigned Protection Factor.

When correctly used by a wearer who has passed a face fit test, an FFP1 respirator should reduce exposure to airborne particles by a factor of 4, an FFP2 by a factor of 10 and an FFP3 by a factor of 20.

Choose from our **Premium**, **Comfort** or **Classic** ranges or **Welding** respirators for specific applications. Some of our ranges offer a cup-shaped and fold flat respirator for your preference.

Particulate Respirator Options		FFP1		FFP2		FFP3
		Unvalved	Valved	Unvalved	Valved	Valved
Premium	Cup-Shaped	-	-	-	-	8835
Comfort	Flat Fold	-	9312	-	9322	9332
Classic	Cup-Shaped	8710	8812	8810	8822	-

3M A1 Filter (6051)

3M A1 6051 organic vapour filter connects directly onto the 3M 6000/7500 series respirators. Protection against inorganic vapours. Assigned Protection Factor 10 or 1000 ppm (whichever is lower).

Manufacturer: 3M
Size: Per pair
EN Standard: 141
Stock Code: 0426051

3M A2 Filter (6055)

3M A2 6055 organic vapour filter connects directly onto the 3M 6000/7500 series respirators. Protection against inorganic vapours. Assigned Protection Factor 10 or 1000 ppm (whichever is lower).

Manufacturer: 3M
Size: Per pair
EN Standard: 141
Stock Code: 0426055

3M ABE1 Filter (6057)

3M Filter 6057 ABE1 organic/inorganic vapour and acid gas filter which connects directly onto the 3M 6000 and 7500 series respirators. Has a low breathing resistance and high filter efficiency. Assigned Protection Factor 10 or 1000 ppm (whichever is lower).

Manufacturer: 3M
Size: Per pair
EN Standard: 141
Stock Code: 0426057

3M ABEK1 Filter (6059)

3M Filter 6059 ABEK1 compatible with 3M 6000 and 7500 series full and half face masks. Protects against organic vapours, inorganic, acid gases and ammonia. Assigned Protection Factor 10 or 1000 ppm (whichever is lowest).

Manufacturer: 3M
Size: Per pair
EN Standard: 141
Stock Code: 0426059

3M Filter Retainer (501)

3M 501 Filter Retainer is used to connect a combination of 3M gas/vapour and particulate filters together for 6000/7000 series respirators.

Manufacturer: 3M
Size: Per pair
Stock Code: 042501

3M 105 Face Seal Cleaner

The 3M 105 Face Seal Cleaner is an individually wrapped wipe for cleaning and freshening the face piece without damaging it.

Manufacturer: 3M
Size: 40 per box
Stock Code: 042105

3M Respirator 8710E Cup Shaped Dust P1

Protection against fine dusts, water and oil based mists. Nominal and Assigned Protection Factor 4.

Manufacturer: 3M
Size: 20 per box
EN Standard: 149 : 2001 FFP 1 NR D
Stock Code: 0428710E

3M Respirator 8810 Cup Shaped P2

Protection against fine respirable dusts, fibres, oil and water based mists. Nominal Protection Factor 12. Assigned Protection Factor 10.

Size: 20 per box
EN Standard: 149 : 2001 FFP 2 NR D
Stock Code: 0428810

3M Respirator 8835 Dust/Mist/Metal P3

Protection against fine dusts, oil based mists and particulate metal fumes. Nominal Protection Factor 50. Assigned Protection Factor 20.

Manufacturer: 3M
Size: 5 per box
EN Standard: 149 : 2001 FFP 3 ND
Stock Code: 0428835

3M 9322 Valved Dust/Mist Respirator P2

3M high-performance filter material combines effective filtration with low breathing resistance, offering protection against fine dusts and oil/water based mists. Individually packed fold flat respirator. 3-panel design and soft cover web for greater comfort and better fit. Assigned Protection Factor 10.

Manufacturer: 3M
Size: 10 per box
EN Standard: 149 : 2001 FFP 2 NR
Stock Code: 0429322

3M Respirator 8812 Cup Shaped Valved P1

Protection against fine respirable dusts, oil and water based mists. Nominal and Assigned Protection Factor 4.

Manufacturer: 3M
Size: 10 per box
EN Standard: 149 : 2001 FFP 1 NR D
Stock Code: 0428812

3M 9312 Fold Flat Valved Dust/Mist Respirator P1

High quality filter suitable for all different types of dust. These are perfect for use in all climates as it allows for proper ventilation, to help keep you cool whilst still keeping you safe.

Manufacturer: 3M
Size: 10 per box
EN Standard: 149:2001 + A1: 2009 FFP 1
Stock Code: 0429312

3M Respirator 9925 Welding Fume P2

Protection against water and oil based mists, fine dusts, metal fumes and ozone. Nominal and Assigned Protection Factor 12.

Manufacturer: 3M
Size: 10 per box
EN Standard: 149 : 2001 FFP 2 D
Stock Code: 0429925

3M Respirator 8822 Cup Shaped Valved P2

Protection against fine respirable dusts, fibres, oil and water based mists. Provides new levels of comfort and effective protection against fine particulates. Nominal Protection Factor 12. Assigned Protection Factor 10.

Manufacturer: 3M
Size: 10 per box
EN Standard: 149 : 2001 FFP 2 NR D
Stock Code: 0428822

3M 9332 Foldable Valved Respirator P3

The advanced three panel design of the 9300 series means they are easier to breathe through and not prone to collapse. Foldable design offers more convenience than traditional cup shaped respirators. Headband material keeps a near constant tension, reducing strap pressure and ensuring secure fit. Protection against fine dusts, water-based mists and metal fume. Assigned Protection Factor 20.

Manufacturer: 3M
Size: 10 per box
EN Standard: 149 : 2001 FFP 3 NR D
Stock Code: 0429332

3M 9928 Respirator Valved Soft Seal Welding

For use with welding applications, protecting against oil, water-based mists, fine dusts, metal fumes and ozone. 3M Cool Flow valve counters heat and humidity. Soft-sealing inner ring ensures comfortable fit. Assigned Protection Factor 10.

Manufacturer: 3M

Size: 10 per box

EN Standard: 149 : 2001 FFP 2 RD

3M 5935 P3 Particulate Filter

3M 5935 P3R Particulate filters for use with 3M Gas and Vapour Filters. Use in combination with 3M 6000 Series Gas and Vapour Filters with a 3M 501 Filter Retainer for combined gas/vapour and particulate protection. Maximum use concentration: 40xWEL (Workplace Exposure Limit).

Manufacturer: 3M

Size: Per pair

EN Standard: 143

Stock Code: 0425935

3M P3 Filter (2138)

3M P3 Filter 2138 with nuisance level organic vapour and acid gas protection. Low breathing resistance. Durable, water-resistant, flame retardant and light weight. Bayonet fitting ensures precise and safer locking. Can be used on all 3M 6000, 3M 7000 & 3M 7500 Series half masks and full face masks. Assigned Protection Factor 20.

Manufacturer: 3M

Size: Per pair

EN Standard: 143 : 2000

Stock Code: 0422138

3M P3 Filter (2135)

3M P3 Filter 2135 contains advanced electret media for maximal filtration efficiency. Low breathing resistance. Durable, water-resistant, flame retardant and lightweight. Bayonet fitting ensures precise and safer locking. Protection against organic vapours with boiling point less than 65°C. Can be used on all 3M 6000, 3M 7000 & 3M 7500 Series half masks and full face masks. Assigned Protection Factor 20.

Manufacturer: 3M

Size: Per pair

EN Standard: 143 : 2000

Alpha Solway 3030V FFP3 NR Disposable Respirator

An alternative range of moulded disposable respirators from Alpha Solway. Independent feedback shows that the 3000 Series offers one of the highest pass rates in Face Fit Testing on disposable respirators on the market today. Excellent fit provides added comfort for the wearer. Preformed nose bridge throughout the range (maximises fit and improves compatibility with other PPE). Electrostatic filter media allowing low breathing resistance and increased comfort. 3030V model has full inner face seal and adjustable head straps.

Manufacturer: Alpha Solway

Size: 5 per box

EN Standard: 149:2001+A1:2009 FFP 3

Stock Code: 0403030V

Moldex Respirator 2445 FFP2

Moldex Respirator 2445 FFP2 welding mask offers 10 x MAC protection against dusts harmful to health and carcinogenic dusts, smoke and also water and oil based aerosols. Assigned Protection Factor 10.

Manufacturer: Moldex

Size: 10 per box

EN Standard: 149 : 1991 FFP 2 NR D

Stock Code: 0402445

MSA miniSCAPE Respirator

miniSCAPE is a one-time use escape device fitting into the pocket of any work clothing. Can be carried on a belt. In case of emergency it can be donned very quickly and is immediately operational. Offers ABEK-5 protection. Universal fit.

Manufacturer: MSA

Size: One Size

EN Standard: DIN - 58647 7 (ABEK-5)

Stock Code: 04110038560

Colour: N/A

MSA S-CAP Hood

This highly visible, one-size-fits-all yellow hood offers protection against smoke and gas from fires, especially carbon monoxide. The easy-to-use unit dons quickly and features a nose cup for a wide variety of head and face sizes, while the cotton neck seal ensures a tight fit. The high-performance filter offers thorough protection, while the wide lens provides an increased field of vision and the low breathing resistance reduces claustrophobia.

Manufacturer: MSA

Size: One size

EN Standard: EN 403 Duration: 15 Minutes

Stock Code: 04110064644

Colour: Hi-Vis Yellow

Scott Safety PF10 P3 Filter Cartridge

Scott Health & Safety's PF10 P3 Particle Filter has exceptionally low breathing resistance to provide comfortable and long duration use. The standard 40mm thread makes it suitable for use on the Proflo and Autoflow PAPR systems, the entire Full Face Mask range, and the Profile40 Half Mask.

Manufacturer: Scott Safety
Size: One size
EN Standard: 143:2000/ A1:2006
Stock Code: 044EC251
Colour: Black

Sundstrom SR100 Half Mask (Available in 2 sizes)

The SR100 half mask Air Purifying Respirator is made of silicone and is equipped with two exhalation valves, which ensures very low exhalation resistance. Valve covers with baffles effectively protect the exhalation membrane against dust and paint mist. The compressed air attachment SR307 can be connected to the SR 100 half mask, this combination is called a Type C Continuous Flow Supplied Air Respirator.

Manufacturer: Sundstrom
Size: Small-Medium / Medium-Large
EN Standard: 140
Stock Code: Small-Medium: 043SR100SM
Medium-Large: 043SR100ML
Colour: Blue

Sundstrom SR200 Full Face Mask

The Sundström SR200 Class 3 full face mask respirator is designed to the highest standards with both protection and comfort in mind. The SR200 full face mask Air Purifying Respirator is intended for use when maximum safety and breathing comfort are required. The full face mask is used with the same simple cartridge and filter system as our half masks. The material and pigment in the face piece are FDA and BGA approved for foods, and minimize the risk of contact allergies. The mask has two exhalation valves that provide minimum exhalation resistance, and an easily adjustable head harness. Some of the inhalation air is guided via the screen disc to prevent misting. The mask is very light, only 450 grams (16 ounce).

Manufacturer: Sundstrom
Size: One size
EN Standard: Complete system meets: 12942:1998 /Mask meets: 136:1998
Stock Code: 043SR200
Colour: Blue

Sundstrom SR230 Storage Box

The SR230 storage box is used for storing Sundstrom half masks, cartridges and filters.

Manufacturer: Sundstrom
Size: One size
Stock Code: 043SR230
Colour: Blue

Sundstrom SR218 A2 Gas Filter

SR218 A2 protects against organic compounds with a boiling point above 65°C. The gas filters can easily be combined with particle filter SR510 P3 (1C6610) in order to obtain protection also against aerosols (particles), e.g. during spray painting.

Manufacturer: Sundstrom
Size: One size
EN Standard: 14387:2004
Stock Code: 043SR218
Colour: Black

Sundstrom SR299-2 ABEK1HgP3 Combination Filter

The SR299-2 is a combined filter consisting of a Class 1 gas filter and Class 3 particle filter. The filter is of type ABEK1-Hg-P3 R and is designed for use in Sundstrom full face masks and half masks. Maximum use time for Hg Mercury vapour protection is 50 hours.

Manufacturer: Sundstrom
Size: One size
EN Standard: 14387:2004
Stock Code: 043SR299-2
Colour: Black

Sundstrom SR510 P3 Particulate Filter

Particle filter SR510 P3 R is a mechanical filter that provides protection against all types of particles (dust, fume, fog, spray, asbestos), even bacteria, viruses and radioactive pollution. Combinations of filters can be used if gases/vapours and particles occur at the same time.

Manufacturer: Sundstrom
Size: One size
EN Standard: 143:2000
Stock Code: 043SR510
Colour: Black

A welder wearing a protective mask and gear, working on a metal piece, with a bright blue color overlay. The welder is positioned at the top of the frame, looking down at the work. The metal piece is at the bottom, and the welder's hands are visible, holding the work. The background is dark, and the overall scene is dominated by the blue color.

WELDING PROTECTION

Red Wing Weld Pro Coverall

About Daletec®

Daletec®, formerly known in the global Oil & Gas market as Dale Antiflame, is a world-leading producer of flame retardant fabrics used in different apparels in upstream, downstream, metal industry and utility related industries. The brand has its origin in 1879 and was founded in the western coast of Norway. Dale Antiflame has since the 1970s been a leading brand in cotton based material and is known globally as a provider of high quality FR fabric products to the industry.

Over a million garments made out of Daletec material are being used every year throughout more than 100 countries!

DALETEC® Flame Retardant (FR) Fabric Information

Daletec® flame retardant material is tested for resistance against flame tongue and electrical arcs under realistic conditions. This strong yet comfortable product has the properties of cotton, including absorption and transport of moisture. Workwear made with Daletec® material comes with antistatic properties as a standard. Daletec® fabrics have been third party certified to meet the requirements of EN ISO 11612 for flame spread, EN ISO 11611 for welding protection, EN 61482-1-2 for Electric arc and EN 1149-3 for antistatic properties.

For more than 20 years Daletec material has been the preferred choice for companies working on the British sector in and around the North Sea. The fabrics are specially designed to suit rugged workers and made for harsh environments. The end user appreciation for the long lifetime and high comfort still keeps Daletec as the number one provider of protective material for the North Sea Oil & Gas sector.

DALETEC® is manufactured to OEKO-TEX Standard 100 class 2 for environmental certification.

Oeko-Tex standard 100 is an international testing and certification system for textiles, limiting the use of certain potential hazardous chemicals. Garments approved according to Oeko-Tex 100 class 2 are made with fabrics that are safe to wear directly against your skin. Class 2 articles that come in contact with large areas of the skin must contain <75 ppm Formaldehyde. By use of original Pyrovatex CP, Daletec® FR cotton products have a level of approximately 35-40ppm Formaldehyde, by far the most chemical friendly product to your skin!

Other DALETEC® environmental standards

DALETEC® FR fabrics do not contain any environmentally damaging or toxic substances such as bromine or halogens. Waste gas emissions during combustion of Daletec® products is actually less environmentally damaging than untreated cotton textiles! In addition, Daletec® is certified to the ISO 14001 Environmental Management Standard. Daletec® continues to reduce emissions to air and water while producing a product using the lowest level of chemical use possible, an aspiration which benefits end users and environment alike.

About DALETEC® Fabrics

Red Wing Flame Pro 220g Lightweight Coveralls	Red Wing Flame Pro 350g & Thermal Coveralls
<p>Material Features: Strong yet light, this fabric gives you protection against flames and at the same time keeps you cool.</p> <p>In warm and humid conditions this fabric is a great choice, as it removes sweat and keeps you dry whilst you are working. A soft feeling against the skin makes your work more comfortable, and in addition, the concealed antistatic stripes gives you protection against accidents caused by static sparks that can ignite gas or oil based liquid.</p> <p>Made from: 220gsm 2/1 twill, 99/1 cotton/antistatic</p>	<p>Material Features: The leading heavy weight fabric in European offshore garments.</p> <p>Strong yarns combined with Daletec's optimized processed leads to a strong and very stable product.</p> <p>Garments have good resistance against welding sparks, and the FR protection will outlast the garment's lifetime.</p> <p>The concealed antistatic stripes also protect you against accidents caused by static sparks which can ignite gas or oil based liquid.</p> <p>Made from: 350gsm 1/4 sateen, 99/1 cotton/antistatic</p>

Impact Injuries: A Common Occurrence

HexArmor's proprietary IR-X® technology shields gloves with a full back-of-hand Impact Exoskeleton™, so every joint and knuckle is protected. Gloves with HexArmor® IR-X® impact protection have been proven to reduce and even eliminate smash injuries on the worksite.

50% of Hand Injuries Are Cuts and Punctures

HexArmor® oil and gas safety gloves are proven to protect against cuts and punctures. We test our gloves both in the lab and out in the field to validate their performance. Our data shows that HexArmor® gloves deliver the highest degree of puncture and cut resistance performance.

ICON KEY

Co-Developed By OGSC
Co-developed by the Oil & Gas Industry's Safety Committee

Exclusive Palm Material
25% more abrasion resistant than normal synthetic leather

KONG® Metacarpal Protection
80% impact absorption

KONG® Knuckle Protection
90% impact absorption

KONG® Patent Pending Finger Protection
76.4% impact absorption offers sidewall and complete fingertip protection

HPT - Hybrid Polymer Technology
Channeled palm allows oil, sludge and mud to escape maximizing grip

Polyethylene Cut Resistant Yarn
CE EN388 level 5

4-Layer Palm
For Maximum Durability

Guaranteed Oilproof & Waterproof
Breathable waterproof; allows sweat to evaporate, keeping hands dry and warm

Patented Diamondclad® Silicone Fused Palm - Patent D568003
Ultimate grip on wet, oily surfaces

Duraclad® Rope Channel Reinforcement Strategically placed on rope channel for maximum durability while rigging

Hi Viz Reinforcements
Reinforced in critical areas for maximum visibility and durability

Duraclad® Reinforced Saddle & Thumb
Ironclad's Exclusive Abrasion Resistant Material

DuPont™ Teflon® Treatment
Palm treatment for oil and water resistance

TPR Cuff Puller
Get your glove in the proper position faster

KONG® Gloves are all Machine Washable and Hang to Dry

HAND PROTECTION

Ansell Alphatec 58-270 Gloves - 12"

AlphaTec 58-270 is a liquid-proof glove. The safety cuff shape is designed to prevent snagging, avoid itching on bare hands and ease size identification with colour over-edge. Wearers keep their hands clean and their skin protected from harmful contact with oils, chemicals and other liquids. Designed for light to medium chemical applications. The thin, double-wall nitrile shell and 15-gauge seamless nylon liner offer users excellent tactility and flexibility. In addition, the glove's lightness results in better comfort than any chemical-resistant glove.

Manufacturer: Ansell
Size: 6 - 11
EN Standard: 374-3:2003 / 388 X.1.3.1
Stock Code: 08258270
Colour: Black

Ansell Alphatec 58-535 Gloves

A unique combination of grip and chemical resistance. Sturdy, 13-mil glove features acrylic knit liner with gauntlet cuff. Ansell Grip Technology provides a nitrile layer filled with microscopic channels that actively repel oils and other lubricants, which allows for controlled handling. Enables users to handle wet or oily objects with less grip force. Offers tactility and dexterity for greater control and reduced fatigue. 12" length. Antistatic coating according to EN1149.

Manufacturer: Ansell
Size: 8 - 10
EN Standard: 388 4.1.2.1 / 374 / 347 JKL
Stock Code: 08258535
Colour: Red/Black

Ansell Alphatec 58-530W Gauntlets - 12"

The AlphaTec glove incorporates revolutionary Ansell Grip Technology to enable users to handle wet or oily objects with less grip force and more control. This unique combination of liquid-proof chemical resistance and grip, together with flexibility and dexterity, makes the AlphaTec glove the logical choice when working with chemicals. Reliable chemical protection for added user safety. The patented Ansell Grip Technology ensures that the coating polymer does not penetrate the liner during manufacture. The coating is therefore consistent and sound, significantly reducing the likelihood of chemical leakage onto the skin.

Manufacturer: Ansell
Size: 7 - 11
EN Standard: 374-3:2003 / 388 4.1.2.1 / Antistatic according to EN1149
Stock Code: 0825853
Colour: Red/Black

Ansell 87-950 Extra Black Latex Gauntlets

Extra protection for heavy duty applications. 50% thicker than standard flock lined gloves. Extremely high resistance to many ketones, salts, detergents, alcohols, alkalis and fats. 100% natural rubber with no fillers. Excellent resistance to mechanical hazards plus increased chemical protection. Chlorinated for better grip and increased chemical resistance. 100% cotton flock lining. Makes a heavy glove softer and more comfortable to wear. Helps absorb perspiration. 12" length.

Manufacturer: Ansell
Size: 8 - 11
EN Standard: 374 AKL / 388 X.1.2.1
Stock Code: 08287950
Colour: Black

Ansell Barrier 02-100 Gloves

Multilayer laminate inner glove providing excellent chemical resistance to most type of chemicals including warfare agents and biological hazards. Used with all NFPA 1991 certified suits. Excellent chemical resistance. Always to be combined with an outer rubber glove, for abrasion resistance. 3-dimensional 5-finger protective plastic glove. Should always be combined with another rubber glove, for abrasion resistance.

Manufacturer: Ansell
Size: 7 - 10
EN Standard: 374
Stock Code: 08202100
Colour: White

Ansell Premium Solvex 15" 37-900 Gauntlets

Premium quality nitrile gauntlet for high risk chemical handling. Super nitrile formula. AQL 0.065 - superior chemical resistance and reliability. 100% pressure tested for confidence in high risk areas. Reversed lozenge grip pattern. Flock-lined. Chlorinated to improve wet grip. Sanitised-bactericide treatment.

Manufacturer: Ansell
Size: 7 - 11
EN Standard: 374 / 374 AKL / 388 4.1.0.2
Stock Code: 08237900
Colour: Red

CHEMICAL PROTECTION

Ansell Solvex 37-185 Gloves - 18"

High comfort, chemical resistant glove for a wide range of applications. Offers superior snag, puncture and abrasion protection over rubber or neoprene gloves. High levels of flexibility, comfort and dexterity. Won't swell, weaken or degrade. 18" length. Antistatic coating according to EN1149.

Manufacturer: Ansell

Size: 7 - 10

EN Standard: 388 4.1.0.2 / 374 / 374 AKL

Stock Code: 08237185

Colour: Green

CHEMICAL PROTECTION

Ansell Solvex 37-675 Nitrile Gloves

The Solvex family of gloves has been an industry benchmark for the past decade, with their outstanding combination of mechanical strength and chemical resistance. The sandpatch finish of the 37-675 enhances sensitivity, whilst the flock lining aids in donning and removal of the gloves. Resistant to solvents, oils, fats, acids and alcohols. High resistance to snags and punctures. 13inch / 33cm long. Sandpatch 0.38mm thick.

Manufacturer: Ansell

Size: 8 - 10

EN Standard: 388 4.1.0.1 / 374 / 374 JKL

Stock Code: 08237675

Colour: Green

CHEMICAL PROTECTION

BM Polyco P45 Chemical Resistant Gauntlets - 18"

Superior chemical resistance against a variety of chemicals including concentrated acids, alkalis, oils and greases, Comfort Cotton interlock knitted liner. Performance Excellent abrasion and tear resistance. Gauntlets come in various lengths, protecting to the top of the arm. PVC extension sleeves available offering chemical protection to the upper arm.

Manufacturer: BM Polyco

Ansell 70-866 Vantage proFood Gloves

Reserved exclusively for our premium gloves, Ansell's cut resistance technology uses revolutionary engineered yarns containing Dyneema fibre, for the highest cut-protection-to-weight ratio available. Rated at Cut Level 5, Vantage proFood gloves offer ideal protection when working with sharp knives, increasing worker safety. The cool temperatures of hygienic food preparation can be both unpleasant and unhealthy for workers. Instead of common yarns, Vantage proFood gloves are manufactured with engineered yarns for better insulation and superb protection down to 0°C. Medium weight, excellent comfort and grip for higher productivity and compliant with EU food legislation.

Manufacturer: Ansell

Size: 6 - 10

EN Standard: 388 3.5.4.X

Stock Code: 08270866

Colour: Blue

Ansell Powerflex 80-602 Gloves

Raised crinkle finish gives excellent grip in both dry and wet conditions. Ergonomic 'dip line' removes tension from the finger joints on the back of the hand, whilst also covering the thumb. Anatomic seamless liner delivers superb fit, flexibility and helps to avoid irritations. Continuous cut-resistant cuff provides a secure hold on the wrist and additional protection. Silicone-free, the PowerFlex 80-602 glove prevents fingerprints on metallised warm insulation glass, leaving surfaces clean and avoiding the need for extra cleaning work. Superior resistance to cuts and abrasion. Back of the glove breathes for all-day comfort.

Manufacturer: Ansell

Colour: Black

V-Tech Bison V6000 Lace Boots

Constructed from water repellent full grain leather. Quadruple stitched and riveted for strength. Cut away collar for comfort. Cambrelle lining provides effective year round temperature control. Shock absorbing 3D sole.

Manufacturer: V-Tech
Size: 5 - 13
EN Standard: 345 S3
Stock Code: 090V6000
Colour: Black

Timberland Euro Hiker Lace Up Brown Boots

Timberland Euro Hiker is a rugged outdoor ankle boot with premium oiled leather upper to minimise water penetration. Comfort engineered ankle padding. Nylex moisture management lining keeps feet dry. Gusseted tongue keeps out dirt and debris. Anatomically contoured, removable foot bed decreases foot fatigue and provides easy care. Midsole features shock absorbing EVA offering lightness and flexibility to the boots. Cemented sole construction and Timberland PRO Nitrile outsole ensures slip resistance. Heat resistant up to 300°C. High resistance to fuel oil. Excellent shock absorption and abrasion resistance.

Manufacturer: Timberland
Size: 6 - 12
EN Standard: 345 S1
Stock Code: 0926201014
Colour: Brown

V-Tech Defiant E1300 Zip/Lace Boots

Supple, water repellent and breathable S3 leather upper. Stitched with Kevlar for added strength. The main seams are downward facing the shed water. A full bellows tongue helps to prevent ingress of dirt and water and an ergonomic padded collar provides added comfort when flexing the leg. Exclusive Soft Tex lining-moisture wicking and highly breathable. Full length replaceable, energy return foot bed incorporating rebound foam with air circulation vents. Wide fitting, composite toe cap. Tested to 200 Joules impact rating. Composite midsole. Triple density Phylon/Rubber providing high resistance. Anti-static and abrasion resistance to the latest EN standards. Heat resistant to 300°C. Acid, alkali, oil and hydrocarbon resistant. Shock absorbing defined heel for safety when working on steps and ladders.

Manufacturer: V-Tech
Size: 3 - 13
EN Standard: 345 S3
Stock Code: 090E1300
Colour: Black

V-Tech Lynx VR696 Pull On Rigger Boots

Soft and supple pull on rigger boot specifically developed for the offshore industry where it has been trialled and tested. Completely metal free to reduce weight and remove dangers of sparking. The special cut to the top and pneumatic collar provide superb comfort when flexing the leg. Ladder grips and an anti-torsion heel support add to the safety features. Full grain supple cow hide, water repellent upper. Pull on loops, padded ankle protector. Moisture wicking V cell fabric lining. Replaceable V Shock I anti-static foot bed with dual shock absorbing. Wide fitting composite toe cap. Resistant to 200 Joules. Composite anti-penetration protective midsole. 3D (3 density) polyurethane and rubber sole. High slip, heat and abrasion resistance. Multi-directional tread ensures good traction in a variety of conditions. Heat resistant to 300°C. Scuff toe and defined shock absorbing heel.

Manufacturer: V-Tech
Size: 5 - 13
EN Standard: 345 S3
Stock Code: 090VR696
Colour: Tan

V-Tech Thunder V1215 Lace Up Boots

Waxy smooth leather whole cut lace up safety boot. Minimum amount of seam enhances the waterproof qualities. Full bellows tongue. Soft padded collar. Speed lacing-easy access. Lining made of Hydroguard waterproof and breathable membrane- cool in summer, warm in winter. Full length, removable, shock absorbing foot bed made from 100% memory foam (non-compressing) with arch support. Washable and moisture absorbing. Wide fitting composite toe cap. Resistant to impact of 200 Joules and thermal insulating. Flexible powder coated protective steel midsole. Highly slip resistant sole. Triple density Flexlite Phylon/Rubber sole. Heat resistant to 300°C. Oil, alkali, and hydrocarbon resistant. Shock absorbing heel with defined heel breast for stability on ladder and steps.

Manufacturer: V-Tech

Size: 3 - 13

EN Standard: 345 S3

Stock Code: 090V1215

Colour: Black

Himalayan 310 Lace Up Shoes

Plain shoe with leather upper. Air light lining. Classic steel toe cap. Executive polyurethane sole.

Manufacturer: Himalayan

Size: 5 - 13

EN Standard: 345 S1

Stock Code: 090V6008

Colour: Black

Dunlop Wellington Boots

PVC upper with PVC nitrile sole unit. Anti-static. Stainless steel midsole.

Manufacturer: Dunlop

Size: 5 - 12

EN Standard: EN ISO 20345:2011 S5 CI SRA

Stock Code: 091B0108

Colour: Black

Dunlop Purofort Full Safety Wellington Boots

The ideal Purofort work boot for industrial applications. This boot has the highest non-slip certification, SRA. Insulated against the cold for temperatures down to -20°C. Lightweight and durable. Flexible for more comfort. Resistance: minerals, animal and plant oils and fats, disinfectants, fertilizer, solvents, various chemicals.

Manufacturer: Dunlop

Size: 6 - 13

EN Standard: EN ISO 20345:2011 S5 CI SRA

Stock Code: 095C462241

Colour: Yellow

Cofra Castor Wellington Boots

PVC wellington with oil resistant, ant-static, outer sole. Steel toe cap and midsole for added protection.

Manufacturer: Cofra

Size: 6 - 13

EN Standard: 345 S5

Stock Code: 095462241

Colour: Yellow

Harvik Fireman's Boots

Comfortable boots with reinforced toes and mid sole. Heat and oil resistant rubber sole with protection against penetrating nails.

Manufacturer: Harvik

Size: 6 - 12

EN Standard: ISO 90 : 2006.F2 IS.HI3. PT.CI

Stock Code: 0905-5260360

Colour: Black/Yellow

Sealskinz Boot Socks DS361

The Boot Sock is a longer, extended mid-calf length sock making it ideal to wear with both ankle and mid-calf length boots. The thick, padded loop piled Merino wool in the toe, sole, heel and Achilles areas give extra protection, comfort and support. 100% waterproof, breathable and windproof and provides protection against micro-organisms.

Manufacturer: Sealskinz

Size: S - XL

EN Standard: 374 1

Stock Code: 090DS361

Colour: Black

HAZMAX Chemical Wellington Boots

The Hazmax boot offers superior chemical protection and superb grip provided by a unique oil resistant vulcanized nitrile rubber sole which gives a 30% better slip resistance than a similar sole in PVC/Nitrile material. The special sole gives 2 to 3 times longer service life and is highly cut and hot contact resistant. The Hazmax boot is also flame resistant and 100% waterproof. Offers shin and ankle protection, adjustable height and kick off lug for hands free removal. Removable, machine washable, perspiration absorbent insole. Comfortable, durable and lightweight. 200 joules.

Manufacturer: Hazmax

Size: 6 - 12

EN Standard: 345 S5

Stock Code: 090HAZMAX

Colour: Green

Primo Metatarsal B11990 Wellington Boots

Provides optimum protection when using orbital - type ultra-high pressure cleaning equipment up to 800 bar. Complete with steel toecap and honeycombed metatarsal protection.

Manufacturer: Primo

Size: 6 - 12

EN Standard: 345 S5

Stock Code: 090B11990

Colour: Yellow

Latex Boot Insoles

Dual layer of cushion comfort waffle backed latex, impregnated with a long lasting pine scent. These add extra comfort to your footwear whilst absorbing moisture away from the foot.

Manufacturer: Shoestring

Size: One size - cut to size 3 - 12

Stock Code: 090006

Colour: White

Uvex Hydroflex Gel Insoles

The patented shock absorbing system fits into most industrial footwear and wellington boots. The top layer consists of hygienic, skin friendly cork with a sandwiched layer of odour preventing charcoal. The bottom layer includes an anatomically formed heel for superior support, also providing an orthopaedic foot bed, which prevents fatigue when walking or standing all day. The insole is also anti-static.

Manufacturer: Uvex

Size: 6 - 12

Stock Code: 09095984

Colour: White

Safety Boot Laces – 100cm

Black safety boot laces.

Size: 100cm

Stock Code: 090001

Colour: Black

Waterproof Polish Dubbin

Punchout – The new way to order: A K&L Ross Corporate Supply Chain Service

K&L Ross prides itself as a company which places the interests of the client and their requirements as being of primary importance. With this in mind we are continually striving to provide new innovations which will offer many benefits to our clients. Our online, e-commerce Punchout system provides a new way for your company to easily place orders online from your offices, any in the world straight to us here at K&L Ross.

Key benefits of the system include bespoke catalogues created in-house, which are designed specifically to your PPE needs. Auto logins provide your buyers with access to your catalogue, anywhere in the world, any time of day, 24/7. A fully integrated system automatically transfers basket selections to your preferred system to ease the ordering process. The easy to use system can reduce the costs associated with purchasing by as much as 15% by streamlining the process. The system is fully compatible with Ariba, SAP and Oracle.

For more information on our e-commerce Punchout system please contact us on 01224 241241 or sales@klross.com.

ACCESSORIES

A photograph of a person sitting on a bench, wearing a checkered shirt, a backpack, and a white sock with 'ECCO' written on it. The image is overlaid with a blue tint.

KNEEPADS

Redbacks Knee Pads

Flexible leaf-spring to spread weight and soft rubberised materials for 100% memory without loss of function. Abrasive resistant cover protects from objects penetrating the knee. Washable. Curved to fit around knee. Shallow scoop at base of kneepad prevents nerve 'deadening' in knee and leg. Elevates knee to reduce pressure on leg, ankle and foot joints. Fits knee-pocketed work trousers. Fits tight to avoid slippage. Breathable to keep you cool and dry in hot or damp conditions. Honeycomb design to absorb pressure. Have penetration protection against sharp objects such as glass, nails, needles and splinter up to 100 Newtons. Patented worldwide

Manufacturer: Redbacks

Size: One size

EN Standard: CE EN 14404-2004 + A1:2010 Type 2 Level 1

Stock Code: 140033

Colour: Black/Red

Corporate Branding

KLR offer both Heatsealing and Direct Embroidery on almost all of our products. Depending on the application where the product is to be used, we will advise accordingly. If you are unsure please ask one of our customer services staff who can explain in more detail.

Heat Applied Transfers

Probably the fastest and most efficient method of marking garments. Machine washable and extremely durable. Available as Non Flame Retardant or Flame Retardant. Lead time 1 - 3 days from point of order.

FR Transfers

Flame Retardant and suitable for industrial wash.

Endura Transfers

Industrial wash non flame retardant.

Trimax

Flame retardant and suitable for domestic wash.

Direct Embroidery

Embroidery direct onto the garment. The time constraints depend on the complexity of the logo being set up as an embroidery. The more colours and more detail it has the longer it takes to set up and apply to garments. There is a one off set up charge, again depending on the complexity and size of the logo. Machine washable and extremely durable. Non Flame Retardant. Lead time usually 3 - 5 days from point of order.

Direct Badging

Embroidery onto badges which are then sewn onto garments. There is a one off set up charge, again depending on the complexity and size of the logo. The more colours and more detail it has the longer it takes to set up and apply to garments. Machine washable and extremely durable. Non Flame Retardant. Lead time 3 - 5 days from point of order.

For more information on our Corporate Branding call us on +44 (0)1224 241 241 or email sales@klross.com

EN Standards

HEAD PROTECTION:

EN 397: Specifies the physical and performance requirements of industrial safety helmets. Certain tests are mandatory- shock absorption, resistance to penetration, flame resistance and chain strap anchorage.
EN 812: Specification for industrial bump caps which are intended to provide protection against bumps caused by walking into hazardous projections.

EYE PROTECTION:

EN 166: Specification for personal eye protection.
1 = Optical Class
3 = Liquid/Chemical Splash
4 = Large Dust Particles
5 = Gas & Fine Dust Particles
9 = Molten Metals & Hot Surfaces
B = Medium Energy Impact
F = Low Energy Impact
EN 169: Specification for filters used in eye protection for welding etc (braze-welding, arc gouging and plasma jet cutting).
EN 170: Specification for ultra violet filters.
EN 171: Specification for infrared filters.
EN 172: Specification for sun-glare filters.

HEARING PROTECTION:

EN 352-1: Specification for earmuffs.
EN 352-2: Specification for ear plugs.
EN 352-3: Specification for helmet mounted earmuffs.
EN 352-4: Specification for level dependent earmuffs.
EN 352-5: Specification for active noise reduction earmuffs.
EN 352-6: Specification for earmuffs with electrical audio input.
EN 352-7: Specification for level dependent ear plugs.

SNR (Standard Noise Reduction) is a general means of comparing several earmuffs. Generally the higher the SNR rating the better the performance of the earmuff across the range of noise frequencies. The figures associated with H, M and L indicate the level of protection within the range of High, Medium and Low frequency noise.

RESPIRATORY PROTECTION:

EN 136: Full face masks
EN 137: Self-contained open-circuit compressed air.
EN 138: Fresh air hose & mask/mouthpiece.
EN 139: Compressed air line & mask mouthpiece.
EN 140: Half masks and quarter masks
EN 141: Gas/vapour filters & combined filters
EN 143: Particle filters
EN 145: Self-contained closed-circuit breathing.
EN 146: Powered particle filtering devices (including hoods or helmets).
EN 147: Powered particle filtering device (including masks).
EN 149: Filtering half-masks against particles
EN 270: Compressed air line & hood.
EN 271: Compressed air line or powered air hose & hood (abrasive blasting).
EN 371: AX gas filters (against low boiling organic compounds).
EN 372: SX gas and combined filters (against specific compounds).
EN 402: Escape apparatus, SCBA with full mask or mouthpiece assembly.
EN 405: Valved filtering half mask respirators for gases and/or particles.

FILTER CLASSIFICATION:

FFP1 = Disposable particulate respirators are approved for use against solid and liquid aerosols according to EN 149:2001. They are suitable for protection from nontoxic harmful materials in concentrations up to 4 x OEL or 4 x APF.
FFP2 = Disposable particulate respirators are approved for use against solid and liquid aerosols according to EN 149:2001. They are suitable for protection from low to average toxicity harmful materials in concentrations up to 12 x OEL or 10 x APF.
FFP3 = Disposable particulate respirators are approved for use against solid and liquid aerosols according to EN 149:2001. They are suitable for protection from high toxicity harmful materials in concentrations up to 50 x OEL or 20 x APF.

FLAME RETARDANT WORKWEAR:

EN 469: Protection for fire fighters.
EN 470-1: Protection clothing for use in welding, grinding and cutting.
EN 531: Protection clothing for industrial workers exposed to heat (including molten metal splash in foundries-levels D (Alum) & E (Iron)).
EN 533: Protection against limited flame-spread limited materials.
EN ISO 11611:2007: Protective clothing for use in welding and allied processes.
EN ISO 11612:2008: Protective clothing to protect against heat and flame.
EN ISO 14116:2008: Protection against heat and flame – Limited flame spread materials, material assemblies and clothing.
EN 1486: Fire-fighting specialised clothing.
EN 50354: Electrical arc test method for material and garments, for use by workers at risk from exposure to an electrical arc.

EXPOSURE TYPES:

A = Limited flame spread
B = Protection against conductive heat
C = Protection against radiant heat
D = Protection against molten aluminium splash
E = Protection against molten iron splash
Under D and E there are also design requirements including specifications for pockets and closures.

GENERAL PROTECTION:

EN 340: This European standard specifies general performance requirements for ergonomics, innocuousness, size designation, ageing, compatibility and marking of protective clothing and the information is to be supplied by the manufacturer.
EN 342: Protection against cold (more than - 5C).
EN 343: Protection against foul weather.
EN 1149 -1: Protection against electrostatic discharge to avoid incendiary.

CHEMICAL PROTECTION:

EN 465: Liquid chemicals (spray tight). Type 4 equipment.
EN 466: Liquid chemicals (liquid tight). Type 3 equipment.
EN 467: Liquid chemicals (partial body e.g. Apron sleeves and hoods).

HIGH VISIBILITY:

EN 471: Protection against low visibility hazards. Grouped into three classifications according to the conspicuity provided, with the classes dictating the minimum quantities of background and retroreflective materials to be used.
Class 1 = Lowest level of protection where enhanced visibility is an advantage, but for minimal risk/off road purposes only. Bands of reflective material shall not be less than 50 mm wide. Minimum background material 0.14m². Minimum retroreflective material 0.10m².
Class 2 = Intermediate level of protection. Bands of retroreflective material shall not be less than 50mm wide. Minimum background material 0.50m². Minimum retroreflective material 0.13m²
Class 3 = Highest level of protection. Bands of retroreflective material shall not be less than 50mm wide. Minimum background material .80m². Minimum retroreflective material 0.20m². Horizontal reflective bands can now have an incline of +/-20°.

HAND PROTECTION:

Category 1 = Simple design - For areas of minimal risk.
Category 2 = Intermediate design - For areas of specific risk.
Category 3 = Complex design - For areas of applications that can seriously harm the wearer's health

EN 374: Protective gloves against chemicals/micro organisms
EN 388: Protective gloves against mechanical (abrasions, cutting, puncture and tearing. This also covers the risk of electrostatic discharge.

PERFORMANCE RATINGS

- (a) Abrasion resistance 0-4
- (b) Blade cut resistance 0-5
- (c) Tear resistance 0-4
- (d) Puncture resistance 0-4

EN 407: Protective gloves against thermal risks (heat and/ or fire).

PERFORMANCE RATINGS

- (a) Burning behaviour 0-4
- (b) Contact heat 0-4
- (c) Convective heat 0-4
- (d) Radiant heat 0-4
- (e) Small splashes of molten metal 0-4
- (f) Large splashes of molten metal 0-4

EN 420: General requirements for gloves.
EN 421: Protective gloves against ionising radiation/ radioactive contamination.
EN 511: Protective gloves against convective and contact cold.

PERFORMANCE RATINGS

- (a) Convective cold 0-4
- (b) Contact cold 0-4
- (c) Water repellancy 0-1

FOOTWEAR:

EN 344-1: Requirements and test methods for safety footwear.
EN 344-2: Additional requirements for protection against water, cut resistance and metatarsal protection.
EN 345: Requirements and test methods for protective safety footwear, where footwear made to the standard requires a safety toecap providing 200 joules protection. In addition it has passed a compression test; the upper is of a certain thickness and quality. The sole is tested for heat resistance, abrasion, oils, chemicals and shock absorption.

CATEGORIES:

SB = Minimum requirements (standard basic), Class 1 or 2
S1 = SB + Closed heel + antistatic + shock absorbent heel, Class 1
S2 = S1 + Water repellent upper, Class1
S3 = S2 + Protective midsole, Class 1
S4 = S2 Where footwear is made with rubber/PVC/ PU, Class 2
S5 = S3 Where footwear is made with rubber/PVC/PU, Class 2.
Class 1 = Leather Upper
Class 2 = Rubber/PVC/PU Upper

P = Protective Midsole

A = Antistatic

E = Shock Absorbent Heel

WRU = Water Repellent Upper

HRO = Heat Resistant Sole

CI = Cold Insulation

HI = Heat Insulation

EN 346-1: Additional requirements for protection against impact at 100J.

EN 346-2: Additional requirements for protection against water, cut resistance and metatarsal protection.

EN 347-2: Additional requirements for protection against water.

EN 381: Protection against hand-held chain saws.

FALL ARREST:

EN 354: Lanyards

EN 355: Shock Absorbers

EN 358: Impact

EN 360: Retractable type fall arrest

EN 361: Full body harness

EN 362: Connectors

EN 363: Fall protection methods

EN 364: Test methods

EN 365: Requirements to labelling and user instructions

Whilst every effort is made to ensure that all information in our catalogue is correct at the time of print, KLR's policy of continuous development may result in specifications being altered from those stated.

K&L Ross Ltd
