

OPTIMISING HYBRID CLOUD THROUGH END-TO-END IT TRANSFORMATION

Enhance your journey to hybrid cloud with Pathway

Together, Equinix and Bell Integration deliver end-to-end transformation of your IT infrastructure to ensure optimal hybrid cloud adoption.

By designing a new, bespoke hybrid cloud solution for your IT infrastructure that precisely meets your needs, we are able to deploy your infrastructure in the most connected, high quality data centres in any major location – ensuring unmatched connectivity to customers, network and cloud and IT service providers. We then support and monitor your infrastructure with best-in-class services.

The challenges you face

Move from operating to consuming IT infrastructure and services

How can you maintain control over critical internal systems and legacy platforms, while minimising costs and infrastructure by leveraging cloud efficiently and cost effectively?

Maintaining agility and connectivity

You need to be readily available to adapt as customers and competition demand, while maintaining business continuity and providing customers with the information, and cloud connectivity required.

Reducing operational costs

Your staffing, data centre and IT infrastructure are significant operational expenditures. With increasing budget pressures, how can you reduce costs by migrating to hybrid cloud?

Meeting security requirements

Data security is now critical. How can you be sure of securing and not compromising privileged client and internal data in your hybrid cloud environment?

We design and deploy hybrid cloud solutions aligned to your IT infrastructure needs

The key benefits of our solution

Data centre optimisation

Appreciating that a data centre property challenge is also a technology issue, we provide world-leading property advice to optimise and monetise your data centre assets.

Proving you with the flexibility you need

Working with you throughout the entire transformation process, we design the bespoke hybrid cloud solution for your IT infrastructure aligned to your requirements.

Controlling costs and optimising cloud consumption

Our proven analysis and discovery processes factor your different solution options based on cost, risk and regulations to ensure accurate cost projections.

Best use of resources

Our monitoring and analytical capabilities give you full visibility of your internal systems and cloud usage, helping you maintain operational excellence while controlling costs.

Our leading capabilities enable your success

World-leading property advice for your data centre assets

We work hand-in-hand with you to monetise your corporate-owned data centres, and reduce both your technology real estate and colocation deployment costs. Our analysis of data centre monetisation strategies enables you to optimise your portfolio.

Bespoke hybrid cloud platforms

Bell Integration's connected hybrid cloud offerings comprise of private cloud, public cloud, connectivity, orchestration, monitoring and support – all fully managed and integrated as one seamless, end-to-end solution.

Seamless data migration

Our tried and tested discovery and analysis eliminate the risks of migration. We perform full discovery of applications and data interdependency, whilst undertaking analyses of potential solutions based on cost, risk and regulation. The result is a fixed price with a guaranteed outcome.

Industry-leading data centres in more locations than anyone

Place your apps, data security and networking controls next to your users, clouds and networks. Equinix has 200+ world-class data centres in over 52 metros globally. Our large ecosystems maximise your choice, with over 1,800 network and 2,900 cloud and IT service providers. You to build here, reach everywhere, interconnect everyone and integrate everything.

State-of-the-art monitoring platform

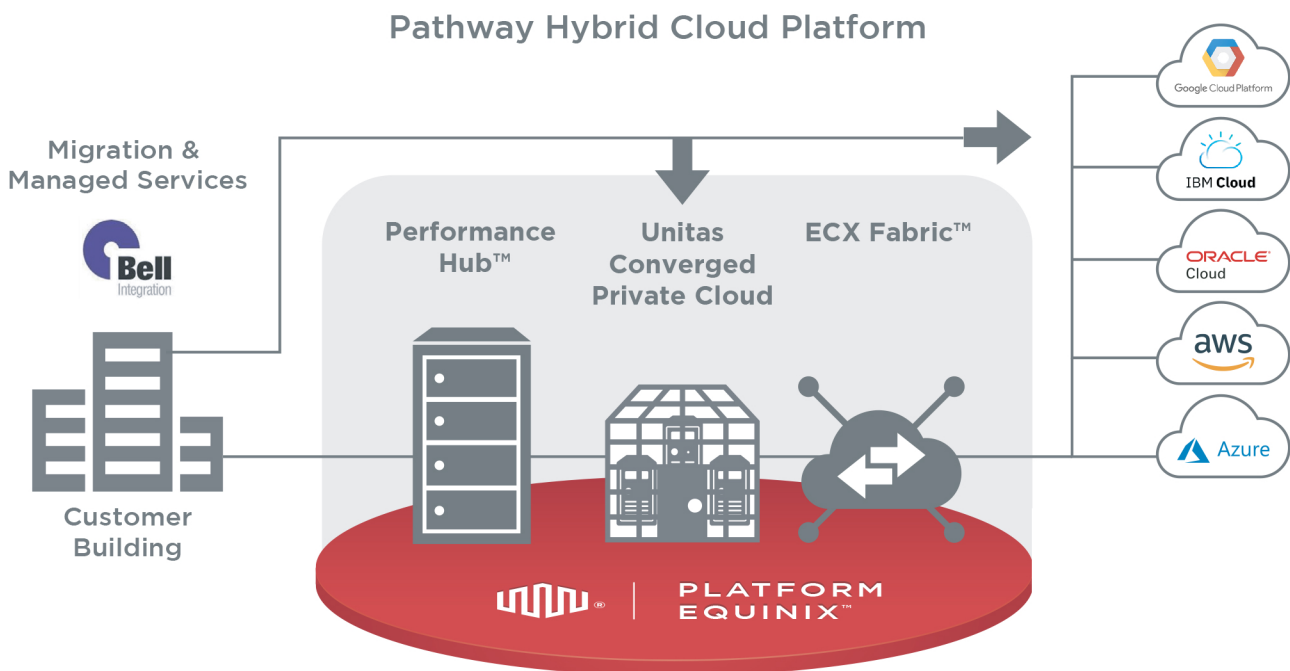

As part of our fully managed services, we replace the traditional set of disparate tools with our unified solution that provides unprecedented monitoring, analytics and visibility of your infrastructure and the apps it supports.

About Equinix

Equinix connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centres. In 52 markets across five continents, Equinix is where companies come together to realise new opportunities and accelerate their business, IT and cloud strategies. We operate the only global interconnection platform, sparking new opportunities that are only possible when companies come together.

About Bell Integration

Bell Integration's technology-agnostic, carrier-neutral and globally deployed cloud solutions are purpose-built to fit enterprise business objectives. With a partnership mentality, Bell Integration works with clients to meet business needs and integrate as a true extension of their IT team. Whether the enterprise needs hybrid cloud, network monitoring, managing or optimisation, Bell Integration has it covered.
