

# Minitool Pro Starter Kit

The Minitool Pro Starter Kit has everything you need to set up a patrol monitoring system easily and efficiently. This robust yet lightweight reader is ideal for companies and organisations that require a system for proof of presence, ensuring every task, operative and event is logged and accounted for as it should be. The full starter kit includes: Minitool Pro reader, Magnetic USB download cable, 10 Touch Buttons, 10 Touch Button holders, an event book and the GPP Patrol Management software. This standalone software is unlimited, so you can expand the system by adding extra Minitool Pro Readers, Event Wallets or Touch Button checkpoints without incurring any additional software costs. The Minitool Pro reader is also Cloud ready, meaning that it can be connected to our Cloud Server (\*) via a Windows computer and an Internet browser to upload the collected data. Patrol Plan and History reports can then be viewed from anywhere in the World via an Internet browser.

*\* Launching January 2018*

Innovative magnetic connector for improved reliability and high speed data transfer.

Impact detection system to alert management of equipment abuse and reduce maintenance costs

Integrated high brightness LED flashlight for added convenience whilst patrolling at night.

Internal alarm clock function to prompt guards to perform patrols.
