A team of skilled artisans hand make Ice Blocks and Rock Tablets in The Highlands of Scotland. Clear, jade edged glass, framed by a rugged edge, epitomises the natural beauty of the hewn rock of The Highlands - and the process is a carefully guarded secret!

Each piece is supplied in a stylish blue box, branded with the individual name of the piece. Soft plastic feet protect from scratching and a Certificate of Authenticity accompanies each piece, guaranteeing its provenance.

12mm (1/2") thick float glass is first cut to shape on a large cutting bench. The secret process of fashioning the edges is then applied to all appropriate sides.

For Ice Blocks, the edges are then ground to form safe and smooth edges. This process leaves small white areas, which are complimented by the white look of engraving.

For Rock Tablets, the ground edges are then polished and so, white areas are returned to clear glass. Tops and bases are optically cemented together and each piece is quality controlled, prior to packaging.

The prestige of 'Hand Made in The Highlands of Scotland', is endorsed by the Certificate of Authenticity, accompanying each Rock Tablet & Ice Block.

Hand rolled and tied with a tartan ribbon, Rock Tablet certificates are displayed with pride alongside the Award. Ice Block Certificates are presented inside the box lid.

Soft plastic feet are a thoughtful addition to the product and save scratching.

Rock Tablets®

Certificate of Authenticity

Your Rock Tablet was made entirely by hand at Dingwall, the Ancient Capital of the beautiful Scottish Highlands.

Using a secret technique, the craftsmen created a unique 'running scallop' along each edge of the raw glass.

All edges and scallops were first ground, then highly polished to a rich sheen.

Then, using modern adhesives, the top and base were optically cemented together, creating a unique Rock Tablet - No other will ever be the same!

Epitomising the surroundings of their Birthplace, Rock Tablets mirror the rugged mountains and wild, rough terrain of the Highlands.

Combined with specialist engraving, your Rock Tablet is a Presentation piece to be proud of.

Care for your Rock Tablet by regularly hand washing in warm, soapy water - and its glistening scallops will enchant you for years to come.

Diamond

Dunvegan 185.31R 7" 0.86kg

Cawdor 185.32R 8.5" 1.26kg

Dunrobin 185.33R 10" 1.64kg

Rock Tablets - Made to your size and specification.

Provide a sketch, along with approximate dimensions of your idea/s. Drawings and costs will follow, usually within a week. The pieces are cut from 12mm thick glass, by hand, so not all shapes are possible, for example, a circle. There's also a limit to the size; no bigger than 17" (43cm) in any direction.

After you approve the drawing and cost, allow approximately 10 working days for production and engraving. It should be possible to provide a box with your order, providing your design suits a standard size. This will be confirmed at the time of quoting.

Below shows the result of a request for Rock Tablets, made to resemble the Pitons in St. Lucia. Hand Made, in Scotland...!!

Sutherland 185.38R 7.5" 1.56kg

Gold blocked boxes are a superior presentation accessory, enhancing the perceived value of the award.

Engraving, thoughtfully prepared, can utilise all three 'engraving areas' – front and rear of the upright creates a '3D' effect. The base is also suitable for a message.
