PRESS RELEASE

October 29, 2019 – Mississauga, Canada

Axiomatic releases an Automotive Ethernet Converter for rugged applications.

The Axiomatic Automotive Ethernet Converter provides a purely physical, bi-directional conversion between Automotive Ethernet (100BASE-T1), and Ethernet (100BASE-TX) via PHY transceivers. No packets are stored or modified in this device. The converter supports a baud rate of 100 Mbit/s. Status LEDs provide information on connection link, and communication.

The converter is designed to work on off-road machinery or in a harsh industrial environment with power transients, high humidity and vibrations.

Other Axiomatic connectivity products include the Ethernet Switch, CAN/Ethernet Converter as well as the CAN-Bluetooth Bridge.
