Workers' CompXPress Suite

Modernize Your Workers' Compensation Solution

- **Boost your efficiency** with integrated Policy, Billing and Claims systems

- **Streamline decision-making** with advanced analytics and predictive modeling

- **Leverage Workers' Compensation expertise** with Insurity's 30+ years of domain expertise and experience deploying insurance technology solutions

- **Provide outstanding service** with integrated self-service web portals for agents and policyholders

- **Lower costs and increase security** with our state-of-the-art cloud hosting model

Policy Administration & Billing

Manage the entire lifecycle of a workers' compensation policy from application/quote to renewal, while maintaining statutory reporting requirements effortlessly. Billing and commission functionality are fully automated and supported, making plan setup, statement creation, premium collection, and commission payment simple, efficient and accurate.

Claims Administration

Leverage the power of a multi-jurisdictional workers' compensation claims processing and claims financial system. Improve productivity by integrating documents, forms, images and a powerful rules engine to help automate common tasks. Stay on top of a demanding workload with a diary system to organize and structure activities.

Self-Service Portals

Set your company apart by providing agents and customers convenient and easy access to their information online. From application submissions to paying bills, reporting new claims to document downloads; self-service functionality is a required element in business today.

Business Intelligence

Transform your data into meaningful and actionable information that enables better, more informed decisions. Information is powerful but a mountain of insurance data is meaningless without the right tools to analyze it. The Workers' CompXPress Suite is packed with dozens of pre-designed reports and fully extend-to-use chart and report building tools for customer analysis and ad-hoc inquiries.

Don't just take our word for it...

"Insurity continues to impress us with its software functionality and expert support. When we decided to upgrade our workers compensation policy and claims systems, we performed a thorough assessment of the technology vendors servicing this industry. We are very pleased with our decision to partner with Insurity. The Insurity team exceeded our expectations during the implementation project and they continue to provide responsive, thorough support since going live with the system. Insurity's core system functionality is robust, reliable and has received praise from our staff, agents, and outside auditors."

~Mark Young, Fund Manager Alabama Retail Comp
