

Economy Work Platform (WP-MK4)

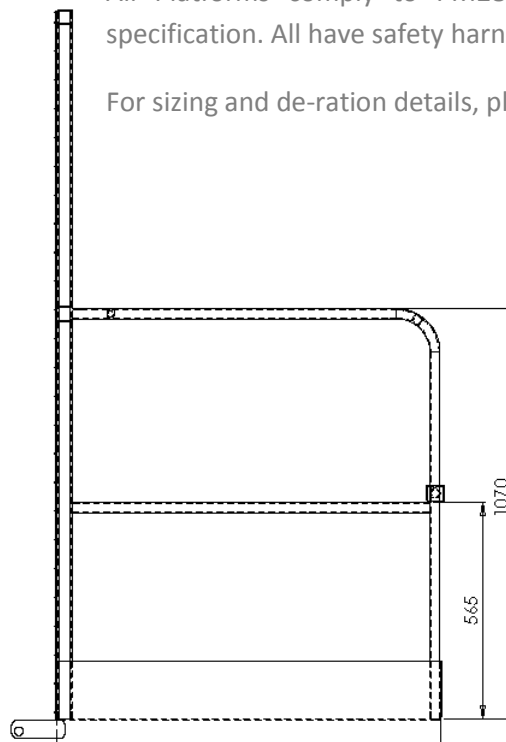

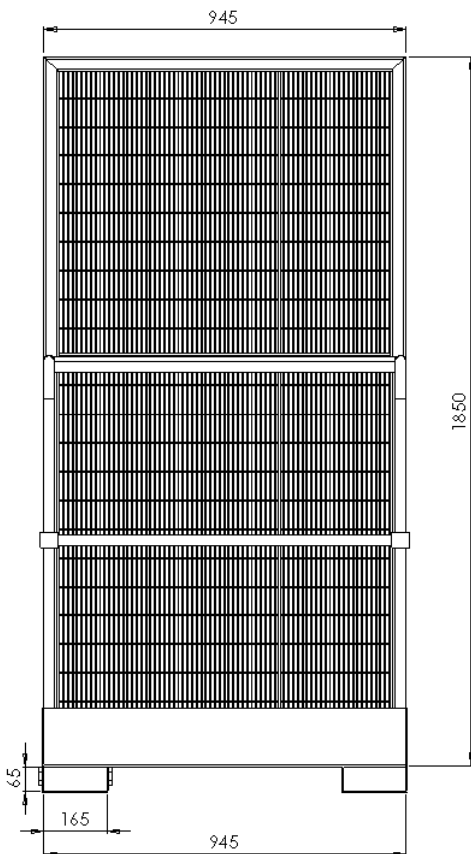

Our best selling Economy forklift platforms offer the ideal solution to you needs, when elevation is needed during non routine, emergency tasks, such as building maintenance, high level racking inspection, light bulb changing etc. Our platforms come complete with fully enclosed fork pockets and heel pin truck retention, with anti slip base plates and a fully meshed rear guard for user safety whilst offering clear line of sight between the truck operator and the platforms occupants.

To fit; simply drive the truck slowly into the platform sleeves, once the forks are fully sleeved simply re-fit the heel pin behind the truck forks, thus retaining the attachment.

Note: The truck parking brake must be applied when personnel are inside the platform. Vertical movement permitted only.

All Platforms comply to PM28 and are manufactured to a high specification. All have safety harness rails and positive heel locking.
