

HARON

SMART GLASS TECHNOLOGY

A Truly Unique Range of
Smart Glass and Vinyl Solutions

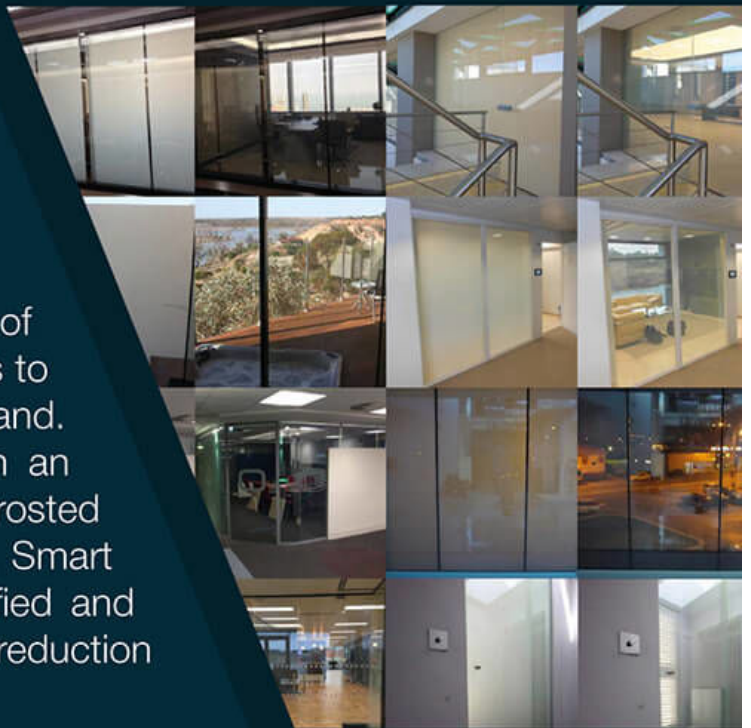

HELLO

Haron Technology is the leading smart glass and smart vinyl technology in the middle east. The products imported by Haron.co are designed to offer instant and controllable privacy using switchable technology.

PRIVACY ON DEMAND

With the most comprehensive range of solutions on the market, our vision is to create a world with privacy on demand. Smart Glass and Vinyl operates on an electrical principle switching from frosted to clear at the flick of a switch. Smart Glass technology offers a CE certified and Eco friendly solution providing solar reduction and UV protection by up to 98 %

SMART GLASS

Smart Glass technology is available in a number of formats to suit a wide range of applications. The range includes laminated and double glazing where the Smart element is incorporated within the glass or alternatively toughened glass where the smart layer is coated onto the surface of the glass. Specialist solutions are also available, combining Smart Glass technology with Sound Insulating Acoustic Glass, Fire Rated Safety Glass and Coloured Switchable Glass.

SMART FILM

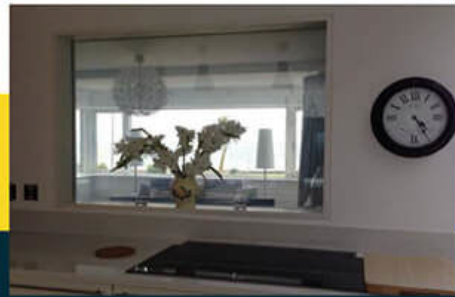

Our self-adhesive Smart Film offers the ideal solution for the retrofit market. Simply peel and stick the film to any existing glazing. We also offer a non-adhesive version ideal for lamination by specialist glass processors.

SMART VISION PANELS

The Smart Vision Panel allows discreet visibility into (or out of) a room at the push of a button. Powered by a replaceable AA battery pack which is concealed within the door, the panels work independently of mains power, offering excellent flexibility and privacy on demand.

RESIDENTIAL

Why not install Smart Glass and Vinyl at home. Applications include dividing partitions, external glazing, vision panels, sky lights, shower screens and bi-fold doors.

COMMERCIAL

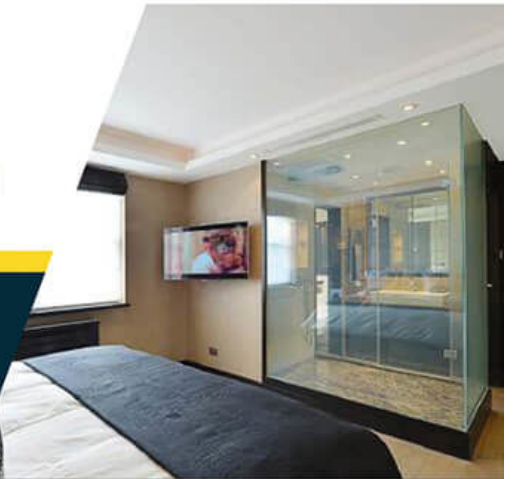

The commercial sector represents the biggest market for Smart Glass and Vinyl with many of the world's largest corporate brands opting for Smart Glass.

HOSPITALITY

Smart Glass and Vinyl provides the ideal solution for many hospitality requirements. Dividing wall partitions, shower rooms and door privacy panels are just a few examples demonstrating the versatility of Smart Glass.

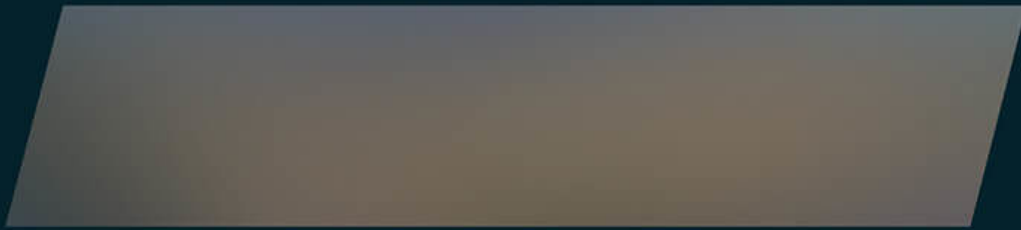

HEALTHCARE

Serving as a more hygienic solution compared to privacy curtains, Smart Glass and Vinyl is also a lot easier to clean and maintain, saving healthcare staff valuable time. The latest innovations from Smart Glass only enhance what is possible with smart technology, which is now available as Sound Insulating Glass for the ultimate privacy solution or even touch interaction to assist with healthcare education.
