Ultra-stretch, Eco Heat Transfers

(Product Reference: USE 1)

ITL's ultra-stretch heat transfers are produced with eco-friendly, water-based inks. These inks have a high opacity and superior stretch characteristics.

They are ideal as a graphic and brand identification embellishment.

Product attributes

- Available in warm and cold peel cut singles.
- A soft, creamy hand, ideal for against the skin use.
- Excellent opacity on dark fabrics.
- Oeko-Tex Standard 100 product class 1 certified.
- Available in standard colours or custom shades, a maximum of 3 colours.
- A slight halo is visible.
- Durable to match the life of the garment and maintain brand integrity.
- Excellent stretch, recovery and elasticity.

End uses

- Ideal for lingerie and intimate wear.
- Safe for infant wear.
- Active wear embellishments on performance fabrics.
- General apparel, men and women.
- Corporate wear.
- Footwear.
