“Comprehensive HSE reporting no longer a pipedream” - ShawCor implements Pro-Sapien’s HSEQ Innovate on SharePoint as their Health, Safety and Environmental Portal.

ShawCor is a growth-oriented, global energy services company specializing in technology-based products and services for the pipeline and petrochemical and industrial segments of the oil and gas industry and other industrial markets.

Working with the North America based HSE and IT teams, Pro-Sapien has implemented its HSEQ Innovate application to meet the H&S requirements of ShawCor across 10 business divisions in 22 countries.

ShawCor is committed globally to achieving HSE excellence and is dedicated to continuous efforts to provide a safe and healthy workplace that protects people, property, and the environment. Part of their strategy is the implementation of Pro-Sapien’s HSEQ Innovate application.

George Brandon, ShawCor Group Health and Safety Manager commented, *‘The primary objective of this project was to provide ShawCor with a system to meet immediate health and safety management requirements. The business has invested in SharePoint which is why we first considered Pro-Sapien who have worked closely with us to meet our requirements. The HSEQ Innovate product has proven to be a very good choice. In addition, it gives us the flexibility for future enhancement and on-boarding of additional processes such as audit tracking (which is also applicable to the wider business).’*

ShawCor Project Manager Dan Lefebvre stated, *‘The Pro-Sapien team have been great to work with and have delivered a solution that can be extended to incorporate other processes and workflows as we need them. We have replaced a Lotus Notes based application along with other software that no longer met our H&S requirements. ShawCor now have a single application to meet our needs and in addition, have a comprehensive view of how the business is performing using a multitude of measures by division, region and process.’*

The Project

Pro-Sapien implemented the SharePoint 2010 Enterprise version of HSEQ Innovate which delivers the following key functions:

- Electronic forms including:
 - Incident Report
 - Request for Action
 - Audit Tracking
 - Leading & Lagging Indicators
 - Custom alerting
- Corrective Action List for action management including:
 - Action Approval
 - E-mail Notification
 - Action Verification
- Approval processes
- SQL Server data warehouse and analysis cube
- Dashboards and reports
- Slice and dice analysis of data via the dashboard
- Various reports including
 - Recordable Analysis by Division
 - Audit Findings Tracking

Murray Ferguson, Commercial Director of Pro-Sapien said, *'The ShawCor implementation is a good example of how we can provide clients with a tailored solution that meets their specific requirements by extending the out of the box functionality. The ShawCor team now have the ability to assess the HSE process data captured across their divisions and regions down to the most granular level.'*

About Pro-Sapien

We are software development experts that offer a number of 'Portals for Compliance' products built on Microsoft SharePoint, various business intelligence tools and cutting-edge mobile technologies. The team have years of experience working with large enterprise organisations across a number of sectors including engineering, oil and energy, FS and the health service.

Our flagship product, HSEQ Innovate has been advocated by some of the world's largest companies and deployed in Europe, North America and the Middle East. For more information on Pro-Sapien or to arrange a HSEQ Innovate demonstration contact the team on:
