SHEMESH AUTOMATION WET WIPES is the world's leading manufacturer of round wipes packaging machinery. With over 25 years experience, it is uniquely positioned to offer dedicated expertise and support to the Wet Wipes market and provides innovative, high quality solutions not found elsewhere.

Products supported:

- Rigid Canister or Bucket packs
- Ready-made / Pre-made flexible pack bags, stand up pouches & refills

Equipment modules manufactured:

- Feeders
- Wipes canister loaders
- Liquid Fillers
- Sealers
- Cappers
- Labelers
- Form Fill & Seal Case Packers
- Full quality control

Complete line throughputs offered range from **30ppm** up to **60ppm**, **120ppm** and **200ppm**.

To complete its product portfolio **Shemesh Automation Wet Wipes** has built a long-

standing partnership with Elsner Engineering Works Inc. – the US based converting machinery manufacturer. Through this relationship the company is able to further enhance its range with the ENR-1000 Fully Automatic Nonwovens Rewinder. This means it can provide a truly one-stop-shop solution for the complete wet wipes process, from master roll to finished, packed and boxed product.

Key Products

RIGID PACKAGES

1. **In-line turnkey systems.** Starting at 60ppm and running up to 200ppm these systems feature the company's flagship canister loader – the **SAS Series**. Officially launched in 2013 and with more than 15 units already installed globally, the SAS Series is the only truly proven vertical nonwovens donuts canister stuffer in the world.

2. The **XPANDER** and **XPANDER PLUS** round wipes packers offer an **all-in-one Monoblock** design. These innovative systems boast the only technology in the world to date capable of delivering **complete**, 30-35ppm, round wipes packing all in a strikingly small footprint. The **XPANDER** serves both entry-level operators and high volume wet wipes manufacturers looking to diversify production.

FLEXIBLE PACKAGES

1. The **FORTRESS** is designed to create flexible packs from a master roll of film. It forms the bag, loads the wipes, fills, seals and discharges the finished product. The **FORTRESS** provides two

Mr. Eli Shemesh (President and CEO) and Mr. Shai Shemesh (Managing Director) at the Xpander global rollout in London / January 2015

levels of efficiency through the economic use of raw materials and savings gained from process automation.

2. The **SAW-MB200**, an all-in-one monoblock packer is designed for ready-made bags. With the **SAW-MB200**, bags are stacked in a magazine and fed into a rotary index table where they are opened, loaded with wipes, liquid filled, sealed and discharged.

The **FORTRESS** and **SAW-MB200** are made to service the jumbo rolls, standard wet wipes in flexible packs and refill markets.

SHEMESH AUTOMATION WET WIPES is a division of SHEMESH AUTOMATION LTD., a family owned and run business operating across the pharma, consumer goods, cosmetics, food and beverage and chemicals industries.

Shemesh Automation is currently celebrating its 25th year servicing and supporting over 500 Shemesh machines installed in nearly 30 countries worldwide. The company was founded in 1990 in Tel Aviv, Israel by Mr. Eli Shemesh, an industry veteran with over 40 years' experience and is co-managed by Mr. Shai Shemesh, an ex-investment banker who is spearheading the company's London operation and its 11 locations around the world.
