Energy Management
Approved Installer

Save money with energy saving solutions from Marshall-Tufflex

Reducing energy consumption is key to cutting bills, lowering carbon emissions and reducing exposure to fluctuating energy prices.

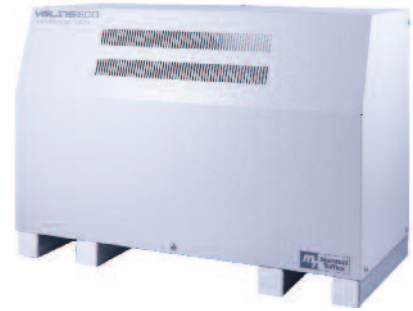

Marshall-Tufflex is committed to developing energy saving solutions for the future and offer a range of products for both the home and in the workplace.

Voltage optimisation

Voltage optimisation manages incoming voltage and reduces it to a level more suitable for your appliances, resulting in greater efficiency and savings on energy bills.

- ⚡ Saves money on your electricity bills
- ⚡ Increases the life of appliances and equipment
- ⚡ Single and three phase solutions available
- ⚡ Solutions for domestic to commercial buildings
- ⚡ Cost savings are immediate

VOLTIS
From Marshall-Tufflex

Boiler Management

Boiler Management is an intelligent way of controlling the cycles of domestic and commercial boilers, reducing dry cycling, maximising efficiency and typically saving 20% off annual fuel bills whilst still delivering the required heat and hot water.

- ⚡ Typically reduces boiler running costs by 20%*
- ⚡ Compatible with mains gas, LPG and oil boilers
- ⚡ Payback typically 2-3 years
- ⚡ Domestic and commercial systems

** Subject to boiler usage pattern*

Power Factor Correction

Power Factor Correction units will improve operating efficiency of electrical systems.

- ⚡ Reduces power consumption
- ⚡ Increases your supply capacity
- ⚡ Lowers electricity bills
- ⚡ Reduces transformer and distribution equipment losses
- ⚡ Increases life expectancy of electrical equipment
